Smart Building Solutions

VIDEO SOLUTIONS

ACTI IP-based video camera solutions including NVR 3 software platform for ease of use and expandability. No license fees for upgrades. Options for Digital Signage and a migration path from analog to IP-using rack mount encoders.

INVID TECH Cost-effective solutions for video platforms that include the popular elevated skin temperature tablets and fixed cameras with calibration units. Wide selection of 4K monitors. Solar kits to accommodate remote locations for powering cameras at your facilities and construction sites.

VIDEOTECH Harsh environments are no match for Videotec's wide selection of intrinsically safe cameras and housings. The perfect solution for oil, gas, chemical, mining, and industrial facilities.

ARTECO Event based video management software that focuses on what's important to the security profile of the user. Arteco stands out from the crowd as a cost-effective, easy to use resource and event management tool for electronic security.

BUILDING INTELLIGENCE AND ACCESS CONTROL

HARTMANN CONTROLS Leading North American access control company that has been in the industry since 1998. PROTECTOR.Net controller is PoE powered and can be installed at the door to save labor and material costs.

SERA4 Armored Padlocks and cabinet controllers for remote facilities that are off network. Manage your locks, users, sites, and credentials with an easy to use cloud portal. Unlimited devices and users for ultimate expandability.

INFRASTRUCTURE

GREAT LAKES DATA RACKS AND CABINETS Wide range of enclosures for data closets and megawatt data centers. Heat containment and security panels along with new PowerLOK PDU's complement the cabinet line. We also offer cable management and cable runways.

TELLABS World leader in Passive Optical LAN market Utilize the unprecedented bandwidth of fiber to deploy networks that save energy, space and network resources. This is the technology recognized by the US Government and military as the preferred specified solution.
