

Custom Amp Cover Measurement Form

Please provide the exact dimensions of the amplifier cabinet body. Do not add any extra "slack" or padding to these numbers—the cover maker will use these exact specs to calculate the proper fit.

Width _____
Height _____
Depth _____

*****NOTE: PLEASE EXCLUDE THE RUBBER FEET** on the bottom and the leather handle on top; measure just the wooden cabinet structure itself.

*****NOTE: If your amp slopes from the top to the bottom, please provide both top depth and bottom depth.**

2. Handle & Slit Placement

To make sure the handle opening on top lines up perfectly, please provide these additional placement measurements:

Please check one:

Handle Centered:

Handle Offset.

- **Front & Back-to-Handle:**

Measure from the front & back top edge of the cabinet straight back to the center line of the handle.

-Front to Handle: _____

-Back to Handle: _____

- **Sides-to-Handle:**

Measure from the left edge of the cabinet to the nearest metal handle mount. Same with right

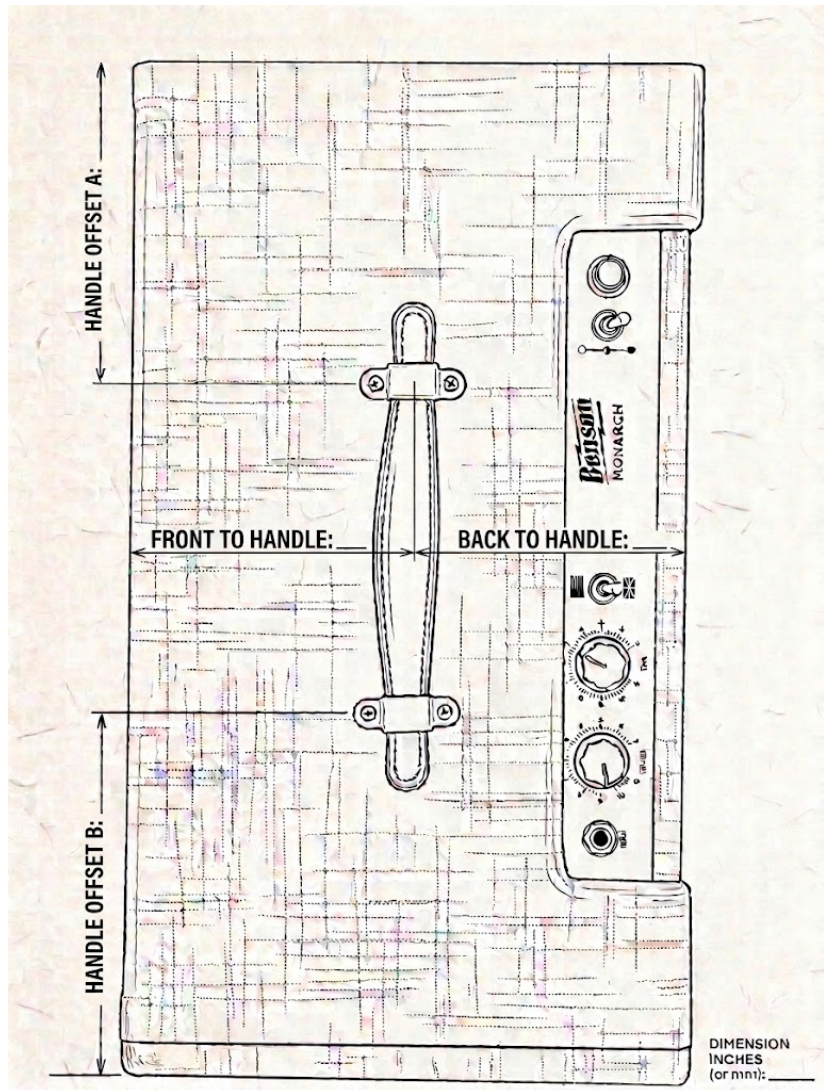

Left side: _____

Right side: _____

Measurement Checklist for Covers

- All measurements are taken to the nearest 1/8th of an inch (or millimeter).

- Measurements represent the naked cabinet size (feet and handle arch excluded).

- The tape measure was kept perfectly straight and taut along the edges.
