Building Classroom Community Online

We have had our share of crazy times here at Kid's Journey Academy, formerly known as Sprouting Tree Learning Center. But those crazy times have allowed us to learn and grow our knowledge about virtual teaching. Since March we were able to test out many different ideas about how we can grow from a distance. We believe we have come up with a wonderful plan to help keep those little minds active. Here at KJA we will be offering a virtual classroom experience for 45 minutes twice a week held through Zoom. Each 45-minute session will include:

- 2 songs
- Interactive work with the letter, number, shape, color, and sight word of the week
- Themed discussion
- Movement activity
- Other activities such as read alouds, sharing, etc.

In addition to the virtual session experience, we will be providing supplemental activities that focus on our letter, number, shape, color, and sight word of the week. These activities will be provided both through email and a learning management system called Seesaw. Seesaw is a platform built on student engagement. Here the teachers will be able to post the activities provided for the week, send videos, and a lot more. We have decided to use this program as we know sometimes it is difficult to print many pages for your kiddos. This gives you the opportunity to save paper and ink! When your child is finished with an activity, they will send it in to their teacher and it will be looked over. After the teacher has approved their work, it will be posted in their e-journal. This is similar to a digital student portfolio where we can measure their growth through their videos, recordings, activities, etc. If you choose the email route, we ask that you still take a picture of their work and post it under the correct assignment tab in Seesaw. We are so incredibly excited for this NEW adventure with our NEW little ones! We are here for you. If at any point you are concerned or have questions, please feel free to reach out to us.
