

FREQUENTLY ASKED QUESTIONS

Q:What is the difference between regular lump coal and anthracite coal?

A:Anthracite coal is harder, smaller sized and higher quality than lump coal (bituminous). Nut coal is the most common size to use in hopper stoves. However, some customers prefer to use pea size coal. Anthracite is available in easy-to-handle 40 pound poly bags. Anthracite burns clean, smoke-free and is dust free.

Q:What are some advantages to burning anthracite coal?

A:In addition to the above, anthracite burns hotter, cleaner, and twice as long as lump coal. Anthracite produces no soot or smoke, therefore there is no concern of build-up accumulating in your chimney. Anthracite coal has a higher BTU content (heat value) per pound, which means you will buy less coal, carry less coal, and in turn carry out less ash from the stove. Simply put, with a hopper stove, you will spend less time on firing and overall maintenance.

Q:What if I decide to burn wood?

A: Switching the stove over to burn wood is easy. Simply lift the hopper out of the top of the hopper door opening. You are then able to burn wood or lump coal in the unit.

NEW DESIGN - The specially designed internal hopper is gravity fed and requires no electricity, no auger and is maintenance free. With the controlled draft and even heat, a blower is not necessary. Aesthetics, performance and efficiency all exceed that of traditional coal stoves from the past.

FLAME VIEW WINDOW - An 8" x 10" "Flame View" glass window comes standard on all COAL-EZ stoves, so you can kick back, relax and watch the fire burn.

PORCELAIN ENAMEL CABINET - This feature must be ordered on your new stove. The porcelain enamel cabinet comes installed from the factory and **cannot** be added at a later time.

ADDITIONAL INFORMATION - Standard features include large ash pan, heavy duty latches, cool touch spring handles, high heat black coating and "Flame View" glass window. Units may be special ordered without the "Flame View" glass window.

SPECIFICATIONS

	EZ-25	EZ-50	EZ-100
Firebox Length	9-1/2"	17"	17"
Firebox Width	11"	18"	23"
Length	16"	19"	23"
Width	18"	24"	26"
Height from floor	36-1/2"	38-1/2"	43"
Cabinet Available	No	Yes	Yes
Top fuel door opening	7-1/2" x 9-1/2"	11-1/4" x 13"	11-1/4" x 13"
Pipe Collar	6"	6"	6"
Distance from floor to bottom of pipe collar	29"	30-1/2"	36"
Heating Capacity (SF)	1,500	2,500	4,000
Rated BTU/Hour	68,000	95,000	120,000
Weight (less cabinet)	225 LBS.	425 LBS.	475 LBS.
Shipping Weight	275 LBS.	450 LBS.	500 LBS.
Cabinet Weight	N/A	105 LBS.	125 LBS.
