

ENTERPRISE DATA SECURITY & INFRASTRUCTURE OVERVIEW

 **Bank-Grade Encryption**

 **US-Based Cloud Hosting**

 **Total Data Isolation**

EXECUTIVE SUMMARY

ShowMe Dashboards protects sensitive agency and client data (including insurance policy details, passport numbers, and real estate contracts) using enterprise cloud security built on the Google Cloud Platform (GCP).

1. Enterprise Cloud Infrastructure

- **Provider:** Google Cloud Platform (GCP) – US Central Data Centers.
- **Physical Security:** SOC 1, SOC 2, and ISO 27001-certified facilities with 24/7 biometric access controls and redundant power.
- **Reliability:** 99.99% infrastructure availability SLA.

2. End-to-End Encryption

- **Data in Transit:** 256-bit SSL/TLS encryption enforced across all web and mobile connections.
- **Data at Rest:** Database records and uploaded documents are automatically encrypted using AES-256 bit encryption.

3. Multi-Tenant Isolation & Access

- **Row-Level Security:** Complete tenant isolation prevents cross-agency data access or querying.
- **Role-Based Access Control (RBAC):** Granular admin controls govern individual staff permissions and document access.

4. Automated Redundancy & Backups

- **Continuous Backups:** Automated backups with point-in-time recovery capabilities.
- **Geographic Replication:** Redundant storage across independent US data centers for rapid disaster recovery.

Data Ownership Guarantee

ShowMe Dashboards will never sell, rent, or monetize client data or agency records. Your agency retains 100% ownership at all times.
