

MULTI-SPECIALTY CLINIC SERVICES

FQHC RESOURCES

Your Needs Are Unique. Let Us Lighten Your Load.

Report for More Measures
Improve Your Billable Events
Improve Quality and Efficiency of Documentation
Group Reporting of Benchmarks
Improved Revenue

Our services help community health centers meet mandatory performance and accountability requirements, and uphold the FQHC mission of providing comprehensive, coordinated care in your community.

- UDS support including consolidated report that lets staff meet changing reporting requirements without deviating from normal workflows, plus support for UDS submission and auditing process
- Our program provides participating FQHCs with 35.25 PCMH points just by using our EMR.
- Integrated patient engagement services, including automated calls and pre-built campaigns, drive more patient visits with less work
- Dedicated onboarding and account management teams understand the unique needs of FQHCs

FIVE BENEFITS OF UTILIZING OUR SERVICES

LARGE PROVIDER GROUP ADVANTAGES

We offer special advantages for MCO, IPA, ACO, Hospital Groups, Community Clinic Groups, PCCH and FQHCs. EHM enables large provider groups the flexibility and customization to ensure benchmarks. Goals of your practice group are met without workflow disruptions. Our comprehensive pre-screens enable your practice to accurately report, document the medical necessity for lab orders and services, and improve communication between caregivers.

GRANT WRITING

Our service offering can be customized for public clinics to achieve grant specifics and provide analytics for reporting. Our specialized screening helps your group access chronic condition funding available to your community. Our real-time results give providers instant information on which patients qualify for programs, classes and special services. Our analytics enable your clinic to show the progress needed to qualify for second round funding.

CUSTOMIZED ASSESSMENTS

We offer customized assessments for public clinics, ACOs and hospitals. Prediabetes, hypertension, sleep disorders, ACES and other screenings are available to offer your clinic the best in proactive patient care.

HOME AND TELEHEALTH

Our unique mobile format enables flexibility for Home Health providers and telehealth providers to provide whole-patient care to patients who are difficult to reach.

MACRA/ MIPS

We have screening tools for ACO, MCO, CPC+ clinics, community clinics and patient centered care homes to meet these specialized screening requirements. Your organization will always be in compliance without workflow disruptions.
