

# Ask the Experts Transcript

**Dr Andrew Kaufman, from the UK, said:**

This pandemic is not a real medical pandemic. The Covid-19 vaccine is not proven safe or effective, because there has not been enough time. In addition, there is not a clear definition of any new disease for which it can be tested against. There has not been a virus that has been purified or shown to be the cause of an illness, thus there is no target for a vaccine. However, the bottom line is that since no additional deaths have occurred in relation to a new disease there is simply no need for a new vaccine.

**Dr Hilde De Smet, from Belgium, said:**

The new Covid-19 vaccine is not safe, and there is no global medical pandemic. For almost 20 years, the pharmaceutical industry has been trying to develop corona vaccines - but never managed - because they saw in the animal trials that there were serious side effects - auto-immune disorders - when the animal was exposed to a new, wild-type virus. These auto-immune disorders are comparable with the complications we have seen in some Covid-19 patients. Now, due to the excuse of a global pandemic, the pharma industry has the permission to skip the animal trials. This means that we humans will be the guinea pigs, and we might get severe side effects when we are exposed to new viruses.

**Dr Nils R Fosse, from Norway, said:**

The Covid-19 vaccine has not been proven safe and effective. It's a new technology and it has been tested on a few thousand people, in a few months. Please do your own research. This is not a real medical pandemic. The death rates in Norway are not higher than in an average year.

**Dr Elizabeth Evans, from the UK, said:**

The Covid-19 vaccines are not proven to be safe or effective. We believe it is reckless and unnecessary to roll out these essentially experimental vaccines - that are using a completely new mRNA technology - to millions of people, when there is only limited, short-term safety data; no evidence that they will prevent transmission of the virus; and no long-term safety

data to rule out late-onset negative effects - like auto-immune diseases, infertility and cancers.

**Dr Vernon Coleman, from the UK, said:**

Doctors aren't allowed to question Covid-19 in public. Material containing the truth about the alleged disease and about the vaccine is banned. In the last year I've been demonised, lied about, and a 50-year career and reputation trashed by those promoting a pandemic that never was and a vaccine that was never needed. The whole Covid-19 scam is, as I said in March 2020, the greatest hoax in history. The principle of informed consent is essential in medicine, but patients now having vaccines can't give informed consent – because they aren't being informed. Thank heavens for sites such as Brand New Tube, who carry uncensored videos by doctors who have been censored or banned elsewhere.

**Professor Dolores Cahill, from Ireland, said:**

We have good news. The coronavirus and the lockdown were not as severe as was thought. We know that we can treat the symptoms of Covid-19 very successfully with vitamins D, C and Zinc, and with very safe medicines. So therefore, the lockdown and the measures like quarantining, social distancing and masks were not necessary. Also, the vaccine is then also not necessary. There has never been a licensed RNA vaccine, and this is not because there haven't been many clinical trials, but that in the safety studies there was significant adverse events and deaths, in the animals that were used in these studies over the past 20 years.

**Dr Zac Cox, from the UK, said:**

The pandemic is fundamentally over and was so in the summer. There is no long-term safety data for any of the Covid vaccines. This means that they are essentially experimenting on us, which is against the Nuremberg code.

**Dr Anna Forbes, from the UK, said:**

There has been an overestimation of the public health risk from SARS-Cov-2 due to misrepresentation of data and inappropriate use of the PCR test. We call for the preservation of informed consent, medical choice and bodily autonomy. As doctors, we believe this is absolutely crucial to maintain.

**Dr Ralf Sundberg, from Sweden, said:**

The PCR test is inaccurate - it actually causes so many false positive - so we are scared into vaccination. I don't trust this vaccine.

**Dr Johan Denis, from Belgium, said:**

The corona vaccine is not proven safe or effective. There is no medical emergency, it is a fake pandemic. The coronavirus is in terms of harmfulness, mortality and transmissibility, comparable to a seasonal flu. And I can only reject the extreme, disproportionate measures that are taken by our governments. There is no emergency situation. It was all orchestrated to make you fearful enough to take the vaccine. This vaccine is just not proven safe - it has been developed too quickly. We have no idea what the long-term effects will be. It needs much more investigation. There is no hurry, or emergency. It might possibly change your DNA. This is irreversible and irreparable for all future generations. An experiment on humanity. I would never give it to myself, my patients or my loved ones. We are no guinea pigs.

**Dr Daniel Cullum, from the USA, said:**

This is not a real medical pandemic the world is enduring at this time. The vaccine has not been proven safe or effective, and I will not be taking, and/or recommending it, because there is no safe vaccine. Period.

**Moritz von der Borch, from Germany, said:**

Do not take this vaccine. This vaccine is dangerous. This pandemic is a fraud.

**Dr Anne Fierlafijn, from Belgium, said:**

The Covid-19 vaccine is not proven safe nor effective and I think it's unacceptable that all liabilities have been waived for the companies that are producing it. If Pharma doesn't take responsibility for the products they make, how can they expect doctors to inject them to their patients without doubt of doing harm? More and more, we see that this is not really a medical pandemic. The measures for corona cause far more collateral damage than the virus causes itself. Worldwide we see that the numbers of cases are falsely presented in order to drive the population into obedient behaviour and to vaccination. So please be critical, do your own research, and don't let the media manipulate you. I think it's time to react, time to stand up for your freedom, for the future of your children. Don't give in to anxiety, to governmental control and to restriction of your freedom – all under the false pretext of a virus – because that's what is happening.

**Dr Tom Cowan, from the USA, said:**

Health does not come from the injection of toxins into our body, but rather from deciding what it means to be human and pursuing that with all your heart.

**Dr Kevin Corbett, from the UK, said:**

The Covid vaccines are not proven safe or effective. Covid is not a real medical epidemic. The vaccines use synthetic products that will alter your genes, allow monitoring of your vaccination status, and produce dangerous chemical reactions. Scientists are therefore demanding that all Covid vaccinations be immediately stopped. The real epidemic is fear and hysteria. It started in China and quickly spread via the World Health Organisation. The hysteria was accelerated by corporations who gained financially, through selling fast-tracked, flawed medical tests, toxic antiviral drugs and now unproven and potentially dangerous vaccines. Standard precautions, which normally protect the public, have been disregarded due to ignorance, hysteria and profits. For example, the vaccines have not undergone proper phase 3 tests. The Covid test – the PCR – is fatally flawed. It was never examined in the standard way by the United Kingdom National Health Service, and it should never have been used on sick people, or those with no symptoms. You can read about the flaws in the PCR test in the Corman-Drosten Review.

**Dr Carrie Madej, from the USA, said:**

There is no worldwide pandemic for Covid-19. We are using testing mechanisms called PCR that have never been indicated or created to diagnose any infection. This is not the way we should be diagnosing. In addition, hospitals and doctors are getting financial incentives to diagnose Covid-19. On top of that we have multiple lab errors happening around the world, over and over, indicating more false-positives. On top of that I'm here to tell you that I will not take the Covid-19 Vaccine, and I will not recommend the Covid-19 vaccine for any of my patients. This vaccine is experimental on the human race, because they are proposing to use modified messenger RNA, or modified DNA – synthetic to the human body. This is the first time ever this will ever be launched on the human race. We don't know what could happen to us. In addition, they are proposing to use nano-lipid technology or nanotechnology on the human race as well. There are so many different, awful things that could happen to us and we need to investigate this before we go forward. This is my alarm call to the world.

**Dr Barre Lando, from the USA, said:**

I've treated many vaccine-damaged children. Due to the lack of proper testing, and the spurious conditions surrounding the alleged pandemic, I would highly caution anyone taking the Covid-19 vaccine.

**Kate Shemirani, from the UK, said:**

Do I believe there is a pandemic? Absolutely not, there is no evidence of that. Do I believe that Covid-19 exists? Absolutely not. It has never been proven. Do I believe that the population need this new Covid-19 dangerous vaccine, that's not had the safety trials done, and it hasn't ever been done before? Absolutely not. No one needs it. Do I believe that our government should be arrested, possibly for genocide? Absolutely.

**Sandy Lunoe (pr. Lunar), from Norway, said:**

The Covid-19 vaccines are not proven safe or effective. I'll focus on just two safety issues. The vaccines carry the risk of immune-enhancement – instead of protecting against infection the vaccine can actually make the disease worse when a vaccinated person is infected with the virus. Secondly, in the UK, the medicines and healthcare products regulatory agency has made an urgent request: “The MHRA urgently seeks an artificial intelligence software tool to process the expected high volume of Covid-19 Adverse Drug Reactions.”

**Boris Dragin, from Sweden, said:**

This Covid pandemic is not a real pandemic! This is an assault on our human rights, our freedom and our societies. You'd have to be completely mad to accept untested, experimental vaccine from a criminal manufacturer, that rushes its safety programs and profits enormously from pressuring people to take it. And do you really think that there is an insurance company somewhere in the world that would dare to insure such a vaccine? Let our leaders and all other proponents of this toxic mix take it.

**Dr Piotr Rubas, from Poland, said:**

I strongly disagree to getting vaccinated with this experimental preparation called a corona vaccine. Firstly, each and every new vaccine has to undergo a period of clinical trials which is at least five years. Secondly, why should I expose my body to something unknown due to the virus, which has a mortality rate similar to deaths from the seasonal influenza virus

**Dr Natalia Prego Cancelo, from Spain, said:**

The Covid-19 vaccine is not proven safe or effective. This is not a real medical pandemic.

**Dr Rashid Buttar, from the USA, said:**

I want you to remember that each one of you - every single one of you - independently, is a beacon of light for those around you. So set the example, stand up, continue to fight, continue to speak out – especially for your children. Let your children see what it means to be free. Allow your children to witness your heroism, and that you are willing to stand up and do what's right, regardless of what's going on around you.

**Nour De San from Belgium, said:**

The problem is not the principle of the vaccine, rather the problem is that they want us to believe that it was possible to develop a new vaccine in less than one year, against a new disease, using new adjuvant technology, and to do so on such a very, very large scale. It's not just the target population that will be vaccinated, they plan to vaccinate nearly every person on Earth. Anyone who has worked on vaccinations knows that it requires time, so that we are able to collect enough data to ensure its efficacy and safety, and properly understand the long-term effects on our health.

**Dr Kelly Brogan, from the USA, said:**

For the better part of a century vaccination has relied on corrupt science, propaganda, and the systemic suppression of true informed consent. With the Covid vaccine we reach an inflection point where the truth is available for all to see. Will you trust GMO and 5G subsidising eugenicist technocrats with your health? Or will you see through their claims, to a transhumanist agenda, that aims to dispossess you of trust in your body, of any agency around your own life, and even of the fabric of your own humanity. Vaccination is penetration of the body, mind and spirit, by the state. The Covid-19 vaccine is not proven safe or effective. This is not a real medical pandemic.

**Professor Konstantin Pavlidis, from the UK, said:**

The Covid-19 virus is not a real pandemic, and for this reason the vaccine being produced is not proven safe or effective because there are four stages: the latent asymptomatic stage; the developmental stage where there is a manifestation of symptoms; the virus convinces the t-cells that it's not an invader, and then it hacks into the immune system; and finally the fourth

stage is the decline of the virus's presence, where it is undetectable by any test, and it's not present in the body liquids. The viral DNA becomes a part of the DNA's hosts immune cells, so for this reason, no Covid tests are truly accurate and no produced vaccine could be accurate as it tricks the immune system into reacting as if there is a real viral attack, where this triggers monocytes in the attempt to access the immune memory cells. These actions appear as viral symptoms, for example: chronic fatigue, muscular contractions or mental health disorders (ranging from depression to suicidal tendencies) - all of these are in fact side effects of the vaccines influence.

**Dr Sherri Tenpenny, from the USA, said:**

Know that when they develop this, it's under the umbrella of the 2005 Krep??? act. They have complete liability protection – you can't sue them, and you have no recourse if this vaccine harms you. They have been trying to develop a coronavirus vaccine since 2002 – since we had SARS – and every animal study that they've done, particularly the ferret study, where the ferret's immune system most mimics the human adult immune system – ferret studies, rabbit studies and rat studies – all the animals ended up with a paradoxical immune response, in which the antibody levels that were very high actually accelerated the infection – made it much worse – and allowed pieces of the virus to go inside of the cell, and be incorporated into the DNA of the recipient of that vaccine, by a process called transduction. That transduction irreversibly puts that snip of virus into your DNA and transforms your cells.

**Senta Depuydt, from Belgium, said:**

We want to alert you to the fact that the current Covid vaccines are an experimental product, based on the injection of genetic material into our cells, and the risk of using these new technologies on humans – and the environment – are unknown, while they could have irreversible consequences. In April, the Pandemic Accelerator Act of the European Union, allowed vaccine producers to have a free pass for safety, and on July 15<sup>th</sup>, the European Parliament agreed to remove the need of risk evaluation, requested under the GMO regulations. That decision was made in ten days – there were no scientific reports, no hearings in health commission, no debate and no amendments prior to this verdict. So, Children's Health Defense Europe has asked for the annulment of this decision, in the European Court of Justice, in Luxembourg. Please share this information, as it is extremely

important to understand that the current Covid vaccines are not proven safe. All legislators have abandoned the principle of precaution by putting blind faith in a dangerous experiment.

**Dr Heiko Santelmann, from Germany, said:**

This is not a real medical pandemic, and the Covid-19 vaccine is not proven to be safe or effective. I agree with the British Medical Journal that the testing is not done honestly – they claim 90% effect when actually it's only 0.2% if you study the results. I wonder, why did Gates and his conspiracy terrorists spend billions to develop vaccines that can sterilise men, women and even their unborn children.

**Dr Margareta Griesz-Brisson, from, said:**

Uniform and forceful measures – medical measures – are unethical and cannot be implemented on a defenceless population, neither as tests, nor as vaccines. Any medical intervention, testing, treatment, or vaccine can only be implemented in ethical and legal ways based on an individual medical consideration, well-informed patient consent, and clinical evidence of harmlessness beyond doubt.

**Dr Mikael Nordfors, from Sweden, said:**

There is no pandemic, and the vaccine is neither safe nor effective, and to give an untested vaccine to the entirety of humanity and to use them as guinea pigs is complete madness, and we must stop it, now. And it's even more madness to give it to children, when children don't suffer from Covid-19 – nobody died under the age of 15 in my country so far. There are only side effects, and risks and costs and that is a waste of money and a waste of human life and safety. So, stop it now. And I also bet that there will never be a vaccine as safe and effective as vitamin D, that can reduce mortality between 50 and 95% depending on the level of vitamin D you have in your blood

**Dr Elke F. de Flerk, from Holland, said:**

First of all, this vaccine could be sterilising woman and girls. Secondly, this vaccine could cause a viral interference – a priming – and then it can cause a cytokine storm, which is very dangerous for your health – for people. This has been seen in human and animal testing with other vaccines. Thirdly, this vaccine could change your genetic blueprint, your genetic code, your DNA forever and we don't know what that's going to bring.
