-Majestic Voyager Management

Our commitment to environmental responsibility is evident in several key initiatives.

**Reducing Plastic Usage:** We understand the detrimental impact of plastic on our oceans and ecosystems. That's why we have taken significant steps to limit plastic onboard. Each guest is provided with a personal tumbler, ensuring that single-use plastic bottles are minimized, helping reduce plastic waste.

**Innovative Water Solutions:** Water is a precious resource, and we strive to use it efficiently. To achieve this, we employ advanced water osmosis technology onboard. This system allows us to transform ocean water into purified, clean water that is used for our toilets. By reusing and purifying seawater, we not only conserve freshwater resources but also minimize the environmental impact of water discharge into the ocean.
