🔥 Sermon-Based Small Group Questions Generator

Instructions:
I'm providing a sermon. I need you to create small group discussion questions that follow this structure and tone:

✅ SECTION 1: Opening Icebreaker Questions (6 total)

• The first **3** should be **light, fun, and relational** — think easy conversation starters that help people laugh and open up.
• The next **3** should be **reflective, personal, and gently spiritual** — bridging into the sermon's deeper theme.
• All 6 should loosely connect to the sermon's topic (themes, metaphors, or illustrations) and be accessible to **both new and growing believers**.

✅ SECTION 2: Substantive Discussion Questions (15 total)

• Focus on **application, spiritual transformation, and real-life relevance**.
• About **50%** should tie **directly to specific Bible verses used in the sermon** (include references).
• The other **50%** should flow from **how the verses were taught or applied** in the sermon.
• Questions should spark honest reflection, healthy vulnerability, and helpful discussion — not theological debate.
• Keep questions **clear, personal, and practical**.

✅ SECTION 3: Final Challenge Questions (5 total)

• These should be **action-oriented** and encourage participants to apply the message **in a concrete, personal way** this week.
• Think: real-life steps, changes in behavior, spiritual practices, or relational commitments.

✍️ Tone & Style:

Use the clear, warm, conversational tone of small group pastors from churches like **Life.Church** or **Church on the Move**.
Make the questions sound **natural** — not too formal or too theological — while still going **deep**.
