

AGRICULTURAL EQUIPMENT *SUGAR BEET CART*

COMPANY OVERVIEW

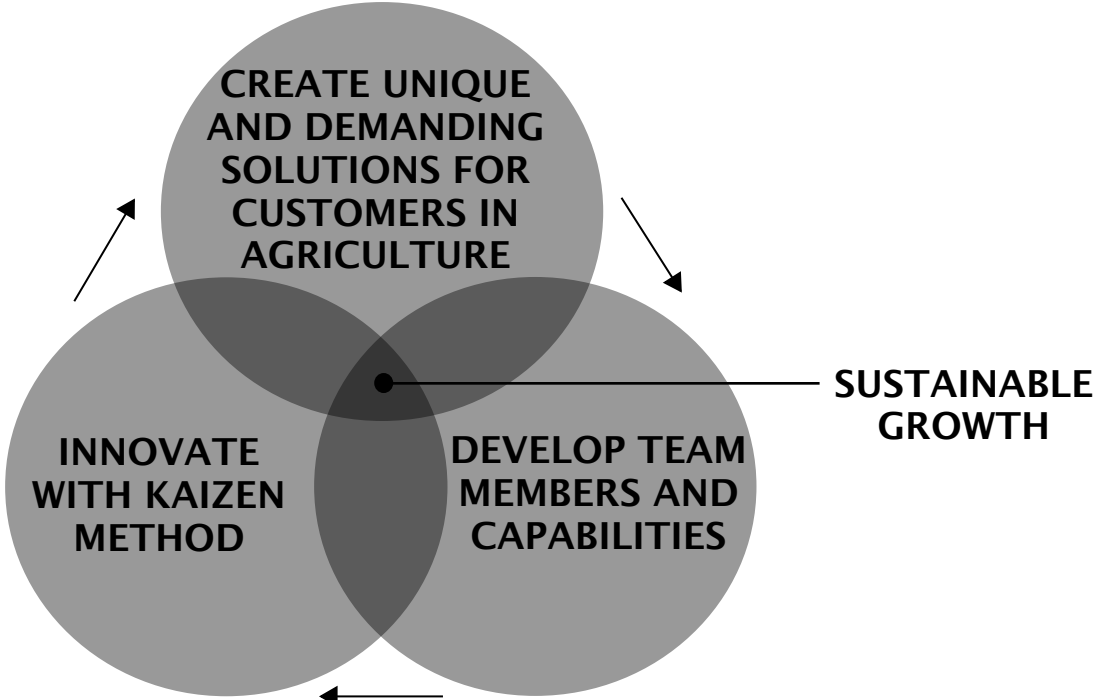

OUR STORY

H&S Manufacturing began in 1971 by developing row crop equipment for the sugar beet industry in the Red River Valley. In the nearly 50 years since then, product lines continue to expand to meet the ever changing needs of the agricultural industry. More recently, H&S has been a leader in the manufacturing of beet carts.

OUR EXPERIENCE

H&S Manufacturing has been manufacturing sugar beet carts for over 25 years. As a North American leader in the sugar beet cart industry, H&S strives to make the best sugar beet cart in the world. When H&S isn't manufacturing their efficient, tare cleaning sugar beet cart, the team of experienced H&S staff are creating new products or continually improving with the production of existing H&S products.

OUR PROCESS

PRODUCT SPECIFICATIONS

Beet Cart Specifications:					
Main Frame	Heavy Duty 10" x 4" (25,4cm x 10,2cm)
