SUBSOIL RIPPER

SUBSOIL RIPPER ADVANTAGES & SPECIFICATIONS

- Improve yields otherwise compromised due to compaction
- Innovative hydraulic reset shank units keep the implement moving even in tough or rocky conditions
 - Heavy duty 1.25" thick shank with replaceable points and shins
 - Hydraulic manifold and accumulator are engineered for cylinder retraction at tillage speed
 - Backup safety release with shearbolt
 - Straight shank, with near-vertical orientation, fractures compaction zone while minimizing dirt clumps pulled up to surface
- Industry leading oversized 28" diameter coulters slice the ground and residue directly in front of the shanks
- Current models from 5 to 9 shanks at 30" O.C. spacing. (Larger model sizes in development.)
- 3-pt. attachment with Cat. 2, 3N, 3 or 4N.
- Optional pull-type attachment recommended for larger shank quantities.
- Heavy double tube frame bar for long-term durability.

"Head and Shoulders above the rest."
