The film also includes a special interview with Michael Phelps, a mental health advocate and one of the greatest athletes of all-time. In addition, the documentary provides discussions with mental health experts about the causes of anxiety and its sociological effects, along with the help, resources and tools available to address the condition.

Part of the beauty of this film is the openness of the children and young adults featured; for some of them, the “Angst” project marks the first time they are publicly sharing their experiences with anxiety. Our hope is that their candidness and bravery will inspire our community to do the same.
