MasterLink

Level Control Panel

About

The MasterLink is a PLC-based control panel with a digital touchscreen designed for level control applications. This UL 508a Listed control panel utilizes a continuous level transmitter input to read the tank level, as well as manage fill valve and alarm settings.

The PLC operation provides maximum flexibility for various control functions, including the number of alarm/control points, types of inputs, configurable outputs (both discrete and analog), and custom control sequencing.

The panel-mounted touchscreen displays system operation and alarm status, while also allowing for easy selection of all control and alarm set points.

Features

- UL 508a listed
- Type 4X polycarbonate enclosure
- Visual/audible alarm indication with silencing
- LED illuminated HOA switches
- PLC based control system
- Door mounted touch screen
- Level indication continuous level transmitters
- Incoming power circuit breaker (115/1 VAC)
- Remote monitoring dry contacts
- Optional BAS communication (Modbus RTU)

Configurations

- Valves (number and type)
- FTC Tanks (compartments and applications)

SmartLink

Level Monitor Panel

About

The SmartLink control panel is a versatile solution equipped with a digital touchscreen for level control applications. This UL 508a Listed control panel utilizes a continuous level transmitter input to accurately read tank levels and configure alarm settings.

The PLC operation provides maximum flexibility for level alarm setpoint adjustment, including the number of alarms, types of inputs and remote alarm outputs.

The touchscreen provides an intuitive interface for the selection and adjustment of all alarm set points. This advanced interface ensures precise monitoring, enhancing the efficiency and reliability of alarm applications.

Features

- UL 508a listed
- Type 4X polycarbonate enclosure
- Visual/audible alarm indication with silencing
- Door mounted touch screen
- Level indication continuous level transmitters
- Incoming power circuit breaker (115/1 VAC)
- Remote monitoring dry contacts
- Optional BAS communication (Modbus RTU)

Configurations

- FTC Tanks (compartments and applications)

LiteLink

Level Alarm Panel

About

The LiteLink control panel is a cost-effective solution designed for alarming applications. This UL 508a Listed control panel utilizes a straightforward float switch level alarm circuit.

Features

- Type 4X polycarbonate enclosure
- Visual/audible alarm indication with silencing
- Simple relay logic controls
- General alarm remote monitoring dry contact
- Color coded wiring
- Easy to access field terminals
- Optional UL 508a listing
