

Plasma Centers in the USA

K&A Schaefer Consulting

Summary Plasma Centers USA

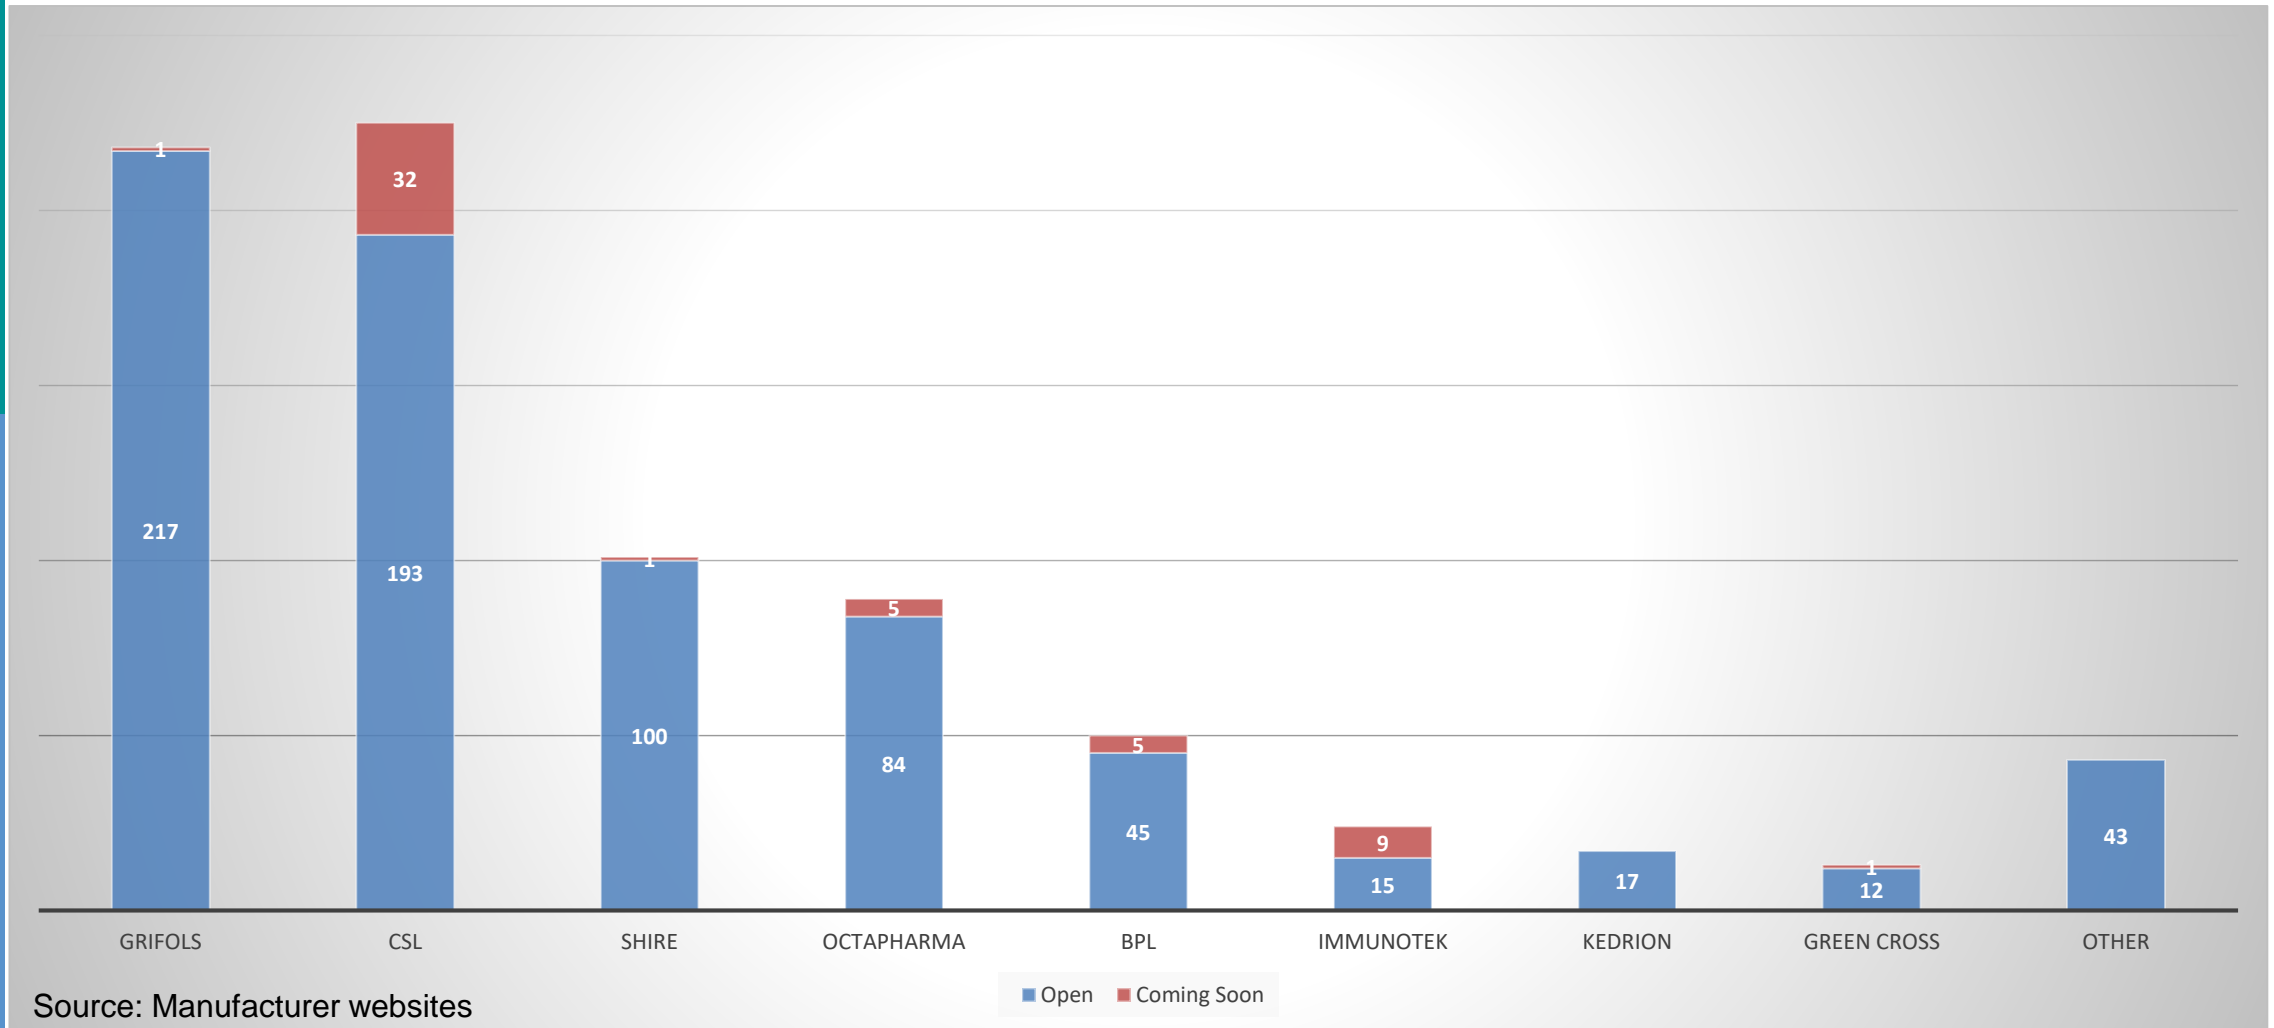

- The growth in the number of Plasma Centers in the USA continues.
 - In August 2018, a total of 726 centers were mentioned on the manufacturers websites as open.
 - Another 54 or 7% were mentioned as coming soon on the websites and the number of centers not mentioned, yet is unclear.
- The two biggest Plasma Collectors are Grifols and CSL with about 30% and 27%, respectively of all open centers and both companies are further growing their number of centers.
- The analysis showed that the state with the most Plasma Centers is Texas with more than double the number (113) compared to second state Florida with 55 Plasma Centers.
- Some states, like New Hampshire, Connecticut, Alaska or Hawaii do not have any Plasma Center.
- A comparison of number of centers with the Median Annual Income in the states shows that there is not a direct correlation between Annual Income and number of Plasma Centers or inhabitants in a state and the number of Plasma Centers.
- An analysis for the Top 10 cities for the number of Plasma Centers shows that four of cities are in Texas
