

Sl.No	Topic	Contents
1	Postman Tool	API Testing Introduction
		Tool details
		Environment Setup
		Environment Variables
		Authorization
		Workflows
		GET Requests
		POST Requests
		PUT Requests
		DELETE Requests
		Create Tests for CRUD
		Create Collections
		Parameterize Requests
		Collection Runner
		Assertion
		Mock Server
		Cookies
		Sessions
2	REST Assured API Testing	Introduction to Rest Assured
		Setup Basic REST Assured Maven Project In Eclipse IDE
		How to test GET Request using Rest Assured
		How to test POST Request using Rest Assured
		How to test PUT Request using Rest Assured
		How to test DELETE Request using Rest Assured
		How to test PATCH Request using Rest Assured
		How to test POST request from JSON Object in Rest Assured
		How to test POST JSON Object request using Java Map in Rest Assured
		How to create JSON Array Request Body – org.json
		How to print pretty JSON using org.json library in Java?
		Assertion of JSON in Rest Assured using Hamcrest
		Extraction from JSON in Rest Assured
		How To Send A JSON/XML File As Payload To Request using Rest Assured

		Logging in Rest Assured
		How to test SOAP Services using Rest Assured
		How to send basic authentication credentials in Rest Assured
		How to add Content Type to request in Rest Assured
		How to verify the response time of a request in Rest Assured?
		How to verify JSON response headers in Rest Assured?
		How to perform multiple assertions in Rest Assured?
		How to handle HTTP Query Parameters using REST Assured
		How to validate JSON body in Rest Assured?
		Compare JSON Objects using JSONAssert Library
		Compare JSON Arrays using JSONAssert Library
		How to blacklist headers in Rest Assured
		How to pass authorization token in header in Rest assured?
		OAuth 2.0 Protocol and Access Token Generation
		Parameterizing REST Assured Tests with junit4-dataprovider Dependency
		REST Assured: Validating HTTP Response Status Code, Line, Body, Headers, Content Type
		How to handle token expiration and automatic refreshing of tokens in REST Assured?
<b>3</b>	<b>Karate API Testing</b>	Features of the Karate Testing Framework
		Comparing Karate Vs Rest-Assured
		Tools Required For Working With Karate Framework
		Structure Of Karate Test Script
		Creating The First Basic Karate Test Script
		Understanding the various sections of Feature file
		Creating tests under Maven project
		Creating tests for various API Methods (GET/POST/PUT/PATCH etc.)
		Running multiple features and scenarios as maven project
		Analyzing Karate Reports
		Implementing Karate with CI/CD
