

Empowering Futures

Farewell 2020:

That's it, we are about to say goodbye to 2020, we think everyone can agree it has been a very strange year with many twists and turns, lots of downs and not many ups.

We like to emphasise the positives at Empowering Futures, firstly by using our brand new name (see what we did there). You can check out our new name and all the other things we have been up to on our website: www.empoweringfutures.co.uk

If you have visited our Facebook page, you will have seen our daily updates and our weekly vlog, which is posted every Sunday. We are on site daily, but still love watching the videos of what has been happening.

You may have heard we put out a request for any Christmas Trees that were being taken down, so they we can repurpose them for mulch, enrichment and crafting. Kelly had an interview with BBC Radio Bristol (if you missed it, we have uploaded to our facebook page) We were so overwhelmed with the response and have arranged to collect, or people have delivered over 250 trees. We cannot thank our local community enough.

The trees can be given to our sheep and goats as treats and the chickens as enrichment activities. They can only eat the Christmas trees if they have not been treated with pesticides and whilst we appreciate not everyone is going to know this, the trees will not be going to waste. We will be using them either to create mulch or for activities in our crafting sessions and forestry school activities. We have a busy couple of months ahead of us.

11th December
2020

National Christmas
Jumper Day

In a polytunnel

Things to sow:

Coriander,

Things to harvest:

Beetroot, Cabbage,

Carrot, Cauliflower,
Celeriac, Celery,
