Hand Operated

The Simple Pump Hand Operated Water Pump is a piston rod pump that is machined from aerospace-grade, lead-free, stainless steel and can be used with static water levels of up to 325 vertical feet.

- Gives you **FULL USE** of all of your home's water taps and plumbing fixtures
- Fits alongside your submersible pump [In the great majority of domestic wells]
- Pumps from as deep as 325' water level which is **MUCH** further down than any other hand pump
- Dramatically **EASIER** to pump when compared to other hand pumps
- And the Simple Pump is **MORE** affordable than comparable pumps!

Motor Operated

The Simple Pump Motor Operated Water Pumps are built on the Simple Pump piston rod pump system where the motor is added to the base water pump structure to provide an automated pumping system for your water well.

- Works with DC power sources and our Solar Panel systems
- 12V and 24V DC motor options
