

*The perfect balance for protection & beauty.*

# harmony™

DAY & NIGHT NATURAL

Harmony emulates the look of expensive tinted glass with a soft natural tone and extremely low reflectivity while additionally offering enhanced solar control benefits. All at a fraction of the cost of alternative performance window systems.

During the day, Harmony provides outdoor privacy and a warm indoor ambience that is ideal for glass areas where maximum glare and fading control is a desired requirement. In the evening, Harmony's anti-glare charcoal tone reduces annoying back reflections and maintains clarity to night time views.

Harmony's proprietary alloy construction is Wi-Fi friendly and delivers strong summer heat rejection, combined with excellent UV Ray and fading protection.

Harmony window film is durable, resistant to colour fade and optical distortion, offering many years of enjoyment and satisfaction.

*Harmony - the perfect balance for protection & beauty.*
