

Wi-Fi Friendly

Crystal clear heat control technology.

VortexTM
SPECTRALLY SELECTIVE

Vortex is an almost invisible shield of window film that protects you, your home or your building's interior from the sun's damaging heat and harmful UV Rays. Featuring the finest in nano-crystal ceramic technology, Vortex provides maximum Ultra Violet protection and selectively controls heat producing InfraRed rays while preserving maximum natural light with enhanced visual optics.

The supreme clarity of Vortex is ideally suited to boosting the performance of existing clear or tinted glass without making any noticeable change to the appearance of your windows, inside or out. Enjoy uninterrupted two-way viewing through glass with 50% less solar heat and total UV protection for improved fading control that helps prolong the life of your valuable interior furnishings or display window merchandise.

Vortex is a metal-free, signal friendly construction that will not compromise your Wi-Fi signal, mobile phone and radio reception. It is a durable, fade and corrosion resistant window film that is perfectly suited for Australia's harsh coastal environment. Exclusively made with the highest quality components and adhesives, Vortex can be installed without the need for special edge sealing treatments and is fully backed by a comprehensive warranty offering many years of performance and protection.

Vortex - technology driven performance with supreme vision.
