

Lifting Trolleys

## newton® REFLEX

Newton lifting trolleys is the perfect combination of ergonomics, safety and functional design. The lifting mechanisms and cables are well protected with the uncomplicated control panel positioned at a convenient working height. Rounded shapes and high-quality materials make Newton easy to manoeuvre and keep clean. In addition, we tailor your Newton's height, skids and lifting tools to create the perfect solution for your business. The Reflex lifters have been specially designed to withstand tough tasks in all kinds of environments. The Reflex models are made of stainless steel and particularly resistant to chemicals.

**NEWTON 50**

The smallest, but yet robust lifting trolley for handling goods up to 50 kg. Very suitable for lifting assistance in tight spaces.

**NEWTON 70**

Designed based on professional demands on flexibility and functionality. A small, sturdy lift, easy to use for goods up to 70 kg.

**NEWTON 100**

Working efficiently involves working safely and comfortably. Use the Newton 100 to handle goods weighing up to 100 kg.

**NEWTON 150**

Need to lift even more? Then have a look at the Newton 150 – a versatile and reliable lifter suitable for most industries and environments.

**NEWTON 250**

For the really heavy goods, our efficient Newton 250 is a really helpful lift. Heavy duty performance with easy handling.

**REFLEX 75 WHITE**

Small but strong lift for handling goods up to 75 kg.

**REFLEX 75 STAINLESS IP 54**

The stainless steel option for more demanding environments. IP 54 classified. Lifts up to 75 kg.

**ACCESSORIES: PUT COLOR ON YOUR LIFT**

Now you can get your lift lacquered in your company's profile color – or in your own favorite color.

**ACCESSORIES: CENTRAL BRAKE**

A central brake, that quickly locks the rotation and turning of the wheels, is available for all models.

## Selection of accessories

**ROLL-TURNER**

An expander for e.g. turning rolls of material back and forth between vertical and horizontal.

**MILK PLATFORM**

Simple and convenient handling in the kitchen. Easily lifts 20-litre packs of milk, for instance.

**STAINLESS STEEL SHEET**

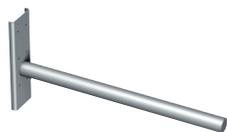

A removable stainless steel panel to replace the standard plastic platform when needed.

**FOLD-AWAY PLATFORM**

A combination of a fold-away platform and a fork for containers or trays, for example, greatly expanding the lift's areas of use.

**FORK**

A versatile tool for pallets and cylindrical objects.

**SINGLE BAR**

Rolls, tyres, sacks... Lifts everything with a hole or hook.

**GRIP AND ROTATE UNIT**

Lifts and turns large containers, gas cylinders and other cylindrical items.

**V-BLOCK FOR ROLLS**

The V-block is ideal for safely handling rolls of material. The block can also be rotated to different positions.
