

# VN-CUH143

## Emergency Break Glass Button

### Features:

- Photoelectric circuitry provides the control function for emergency door release.
- Fire-retardant housing for straightforward installation.
- Normally open and normally closed operating modes.
- Endurance tested to 500,000 operations.
- Emergency break-glass release for access-control doors.

### Technical Specification

|                              |                                                                                           |
|------------------------------|-------------------------------------------------------------------------------------------|
| Material                     | Fire-retardant Plastic                                                                    |
| Weight                       | 0.2 kg                                                                                    |
| Dimensions                   | 86*86*50 mm                                                                               |
| Working Temperature          | -20°C~+55°C                                                                               |
| Working humidity             | ≤95%                                                                                      |
| Fire-exit Release Connection | CUH143 emergency-release interconnection with the connected access-control circuit        |
| Emergency Egress             | Independent exit through the door panic or push-bar hardware                              |
| Re-entry Control             | Credential-authorised re-entry with access-event logging through the connected controller |
