

VN-EST-H8

Counter LED Display

Technical Specification

Pixel-pitch	3.75mm
Specification	2-line display, 8 characters per line
Power Supply	220V
Operating Current	8A
Power Rating	10W
Service Life	≥ 100,000 hours
Communication Method	Wireless

Features:

- Adopts ultra-thin black aluminum alloy frame with matte sandblasted surface finish.
- Fully wireless connection. No cabling renovation required; existing decoration remains unchanged. Plug-and-play upon power supply.
- Displays welcome slogan or service type information after power-on.
- Scroll slogan from right to left. Users can customize the slogan content as required.
- The window screen instantly shows calling information when staff triggers a call. It displays slogans when idle. Switching interval is configurable. It can also be set to permanently show calling information without slogans.
- Display modes: flash, scroll up, scroll down, roll and other animation effects.
- Standard message format: Please take ticket No. A001.
- Supports "Service Suspended" display.
- Customizable window display size according to on- site client requirements.
