

VN-AF910

Self-service Kiosk

Technical Specification

General

Screen	21.5-inch capacitive touch screen
Resolution	1920 × 1080
Brightness	280 cd/m²
Processor	I5 industrial control motherboard, CPU: 2.0 GHz
Memory	4GB
Storage	128GB
Printer	Built-in 80mm printer with auto-cutter; Printing speed up to 200mm/s
OS	Windows
Scanner	Integrated QR/ Barcode scanner
Interface	USB / HDMI / WIFI / RJ45
Passport reader	Support OCR identification and ID document reading
Operating Voltage	110-240V 50HZ/60HZ
Operating Current	1600mA
Power Rating	250W

Features:

- Brand-new appearance with standard VESA mounting holes for easy installation. Streamlined steel enclosure with automotive-grade metal paint finish, aesthetic and multiple options available.
- 21.5-inch industrial touch monitor, resolution 1080*1920, supports 10-point multi-touch.
- Panel-mounted printer, metal paper guide for smooth paper output and anti-paper-jam performance.
- Low-power industrial IPC motherboard featuring high reliability and good expandability.
- Integrated QR code scanner.
- Integrated passport reader.
- Built-in automotive power amplifier speaker, delivers clear sound within 300 sq.m. No external speaker required to save deployment effort.
- Supports up to 16 wireless channels, avoiding mutual interference between queuing terminals at nearby business outlets.
- Power-on auto boot; shutdown time can be freely configured.
- Remote management and real-time monitoring. Headquarters/branch offices can push unified business messages to all outlets, and monitor & count queuing status in real time.
