

# C4 SOLUTIONS

WHERE QUALITY MEETS THE ROAD

## WHAT WE DO

We save you thousands by giving your old asphalt a more green life extension.

1

## WHAT WE ARE NOT

We are not a sealcoat that only puts a bandaid on your asphalt and disguises the underlying issues.

2

## SOLUTION

Our solution is carefully tailored to penetrate asphalt and re-bind the maltenes from your original asphalt.

3

## ASPHALT IS 1-3 YEARS

Rejuvenation is exceedingly beneficial, providing a seal on the surface protecting the underlying pavement preventing oxidation, and sealing hairline cracks. 4-year performance warranty

4

## 4-6 YEAR-OLD

Cracks begin to form between 4-6 years and our product, when used during this time of your asphalt lifespan, will add a guaranteed 4-year performance lifespan to your asphalt.

5

## 6-8 YEARS OLD

Restores the flexibility of your pavement and prevents further deterioration with a 4-yr performance warranty

6

“Comparing the cost of Rejuvenation vs re-paving, the break-even point is 9.25 months; resulting in paying for itself in that same time frame”
