## Gutter System Components

## Custom Gutter Colors

Legacy gutters are painted on our own in-house coil coating line – one of the most technically advanced paint lines in the industry under the supervision of experienced craftsmen.

All Legacy gutters are coated with our proprietary two coat paint system that resists dirt adhesion, is easy to clean and provides excellent color retention.

Choose from a selection of vibrant colors!\*

\* Printing processes vary – the colors above are printed in ink and may not represent the actual painted coil color – please contact your local Englert representative and request a color card or actual color chips before ordering.
