

How to Set Up a Fire TV or Fire TV Stick

Setting up your new device is easy and only takes a few minutes.

Your device may look different than the ones shown but the steps remain the same.

1 Unbox your Amazon Fire Stick and plug it into your TV's HDMI port.

2 Plug the Fire Stick's power cord into an electrical outlet.

It's best to use the included power adapter for optimal performance.

3 Connect the Fire Stick to your Wi-Fi network.

If this is your first time setting up your Fire Stick, it will automatically scan for available Wi-Fi networks. Select your network and enter your Wi-Fi password. Your Fire Stick will now connect to your Wi-Fi network.

If you have an Amazon account, go ahead and sign in. If not, you can create an account during this step.

Once the Fire Stick is connected to power and your TV, turn on your TV and switch the TV input to the HDMI port you plugged the Fire Stick into.

4 After your Fire Stick has connected to Wi-Fi, it will check for any available software updates.

If updates are available, download them to ensure optimal performance.

5 Finally, you'll be prompted to set up your Fire Stick's parental controls.

You can choose to turn them on or skip this step if it's not necessary.
