If you don't have artwork but have your own ideas, we can still help. Send us an email or fax with your ideas and/or examples. We will then quote you on a personalized design.

What else is needed?

For projecting your gobo image, you will need a gobo projector. Ask your DJ or venue if they have a light for projecting gobos and write down the make and model or the gobo dimensions. We need this information for producing the correct gobo. Alternatively you can rent a projector from a local event lighting store or buy one from us.

How to read a Gobo Template

Typical Wedding Gobo Types

Metal Wedding Gobos

- the most affordable gobo type.
- Most Glass Gobos can be "downgraded" to metal designs.
- for rather complex designs the gobo size should be larger than 1.5 inch (38mm), smaller gobos require simple designs or an upgrade to glass.

B/W Line Art Glass Wedding Gobos

- Glass Gobos are laser etched and work well for any gobo size, even small gobos for automated lights.
- Many glass gobo designs are also available as metal versions but require certain minimum image sizes. Pls see note with the designs.

Grayscale Glass Wedding Gobos

- for even more elegant designs.
- Glass Gobos work well for any gobo size, even small gobos for automated lights.
