

To whom it may concern

On behalf of the Community of Hollis, the Council would like to express our support for Whale Tail Pharmacy. They have been an asset to the island benefitting every community with their professional care. The pharmacy has deep roots within Prince of Wales, with each employee serving the community in multiple ways outside the workplace. Every community on this island including Hollis heavily relies on the services provided by Whale Tail.

Without Whale Tail pharmacy, we would be forced to go off island for these services which is a great expense and a great inconvenience of time. This pharmacy makes it possible for Prince of Wales to support our loved ones of all ages regardless of their medication needs. The convenience of a professional pharmacy allows for the generational benefits of the elderly living in the community instead of being required to move away due to medication requirements. Even those who come to live in Hollis for the summer can be confident that they won't miss a prescription while out of their home state. Having this convenience and reliability is part of what makes Whale Tail so essential to the health of not only Craig, but every community on our island.

The community of Hollis relies on, and supports this valuable locally owned and operated business, committed to genuine service, going the extra mile, seeking the best care for each and every person that walks through their doors. They are not just pharmacist behind the counter, they are friends and family, they are quick to help everywhere they are, from accidents on the road to medicine advise off hours. Prince of Wales is proud of this incredible pharmacy, and each of their employees. We look forward to many, many years of their service for each person on this island, from the youngest to the oldest.
