## FURNITURE CARE PRODUCTS

A Texas artisan's compound unites natural beeswax and selected natural oils in a furniture care formula you can trust. Created out of necessity to do the job better!

### Benefits and Uses

Maintaining, Restoring, Polishing, and Protecting Wood Furniture. Excels on finished & unfinished wood. Polishes, revives and enriches wood, forming a protective surface; prevents wood shrinkage and cracking.

### Products

A Scientific Blend of Pure Bees Wax & Selected Natural Oils, 100% Biodegradable, All Natural, Non-toxic, Non-flammable, No Solvents, Unscented & Eco-Friendly; free from petroleum distillates and silicates, and contain no harmful ingredients (safe around children and pets)

**Finisher's Formula** A premium furniture care polish that is safe for all wood products. It unites bees wax and carefully selected oils creating a "goof proof" natural wood polish, easily applied to intricate and large areas. It's lotion-like consistency makes it easy to use.

**Finisher's Touch** A silky wax paste with a touch of carnauba wax for a harder wax finish; for added protection on finishes that see more contact. It was developed to be a barrier coat of protection after using Finisher's Formula. It is the primary choice for previously waxed, highly polished finishes.

## Application

Simply apply a small amount of polish with a lint free soft cloth and rub with the grain of the wood, let stand a few minutes, wipe dry and buff to the desired sheen using a clean cloth or natural bristle brush. Apply sparingly but often. Store the cloth for applying in a zip lock bag.

Finisher's Touch can be used over an existing varnish, lacquer, polyurethane, or shellac finish to polish and shine. The wax will help fill in any scratches, cracks or minor imperfections, allowing the light to reflect at a more even level, producing a beautiful finish.
