Frequently Asked Questions

What monitor interface skins are currently available?

- **Monitor by Laerdal** – Generic | Generic 2
- **Zoll** – Zoll X | Zoll R | Zoll R+ |
- **Mindray** - BeneHeart D3 |
- **Physio-Control** - LifePak 15
- **Phillips** - Tempus Pro | IntelliVue MP30

Can the instructor's iPad control two monitors at the same time (one defib and one vent)?

- No, but the instructor can toggle back and forth between the TruMonitor and TruVent easily

How do you present labs on the screen?

- Select the *Investigation* tab and then choose your labs – make sure to enable test in the upper right corner

How is LLEAP for SimPad involved?

- Only one Bluetooth connection can be used at a time. You cannot use LLEAP for SimPad (with RAAST/RAS) and Monitor by Laerdal concurrently. Future integration is not currently planned, but if market demand is high, this can be revisited.

How is SimCapture involved?

- SimCapture and Monitor by Laerdal integration is being developed. We do not have timelines or anything more sharable at this moment.

Can we order without the iPads?

- This is currently planned to release without iPads if customer choose to purchase themselves. On track for December 2022.

What happens at the end of subscription?

- The email associated with the TruVent/TruMonitor account will get an email notification

What if the customer wants both TruVent and TruMonitor?

- Customer can purchase the additional software (separate line item)
