### DENTAL DIET FOR CATS

Delicate Care™ Dental Diet for Cats is an all life stage food specially formulated to provide complete and balanced nutrition for cats while at the same time promoting dental health. Delicate Care™ Dental Diet for Cats is a perfect complement to the dental management plan prescribed by your Veterinarian and is suitable for lifelong use.

### SKIN OR STOMACH FOR CATS

Delicate Care™ Skin or Stomach cat food has been scientifically formulated to nourish and support cats with sensitive skin or digestive systems. We use only the most natural, high quality and hypo-allergenic ingredients available in Australia. Most commercial cat foods use corn or gluten-based grains as a base. We proudly use Australian-grown whole sorghum as a highly digestible base instead, paired with prime Australian kangaroo and duck as the main protein sources. By eliminating the most common food allergens for cats such as wheat, corn, chicken or fish, our aim is to stimulate and maintain your cat's healthy immune system naturally. Best for Cats of all ages who enjoy a palatable, well-balanced and complete diet.

# MOBILITY SUPPORT

Delicate Care™ Mobility for dogs is scientifically formulated to provide nourishment for healthy joints. We use Australian-grown whole sorghum as a low GI base, matched with Australian kangaroo and duck as the main protein sources. We then infuse our natural, science-based formula with a powerful blend of functional foods that assist with mobility issues, and best of all, taste great.

Specifically formulated for dogs of all ages susceptible to mobility issues, or as a preventative maintenance diet. Suitable for those allergy prone dogs.

## GLUCOSAMINE AND CHONDROITIN

Delicate Care™ Mobility Support dog food contains several forms of glucosamine and chondroitin, part of the building blocks for the synthesis of lubricant proteins in joints. This aids with fluidity of movement, allowing your dog to move and play without limitations or discomfort.

## PROMOTES FREEDOM OF MOVEMENT

Delicate Care™ Mobility dog food contains Green-Lipped Mussel Extract and Celery Seed, combined with our Omega Magic™ Essential Oil Blend. These ingredients support an environment that is high in antioxidants and Omega 3 & 6 essential fatty acids. They may provide pets with comfort in carrying on daily activities like rising, walking and running.

# WEIGHT MANAGEMENT

## LIMITED INGREDIENT DIET

Delicate Care™ Weight Management Dog Food has been especially formulated by leading Australian Food Technologists and Nutritionists with the best complete and balanced nutrition delivered through a lighter caloric load, to make it the perfect choice for adult and senior dogs that need to manage their weight.

Delicate Care™ Weight Management Dog Food will manage your dog's weight while keeping your dog satisfied with a food that is palatable, low in glycaemic index and high in dietary fibre. Delicate Care™ Weight Management Dog Food also contains an array of functional ingredients to help mobilise body fat as well as boost immunity. Ideally Delicate Care™ Weight Management Dog Food should be fed in conjunction with a weight management plan devised in consultation with your veterinarian.

# DENTAL DIET FOR DOGS

Delicate Care™ Dental Diet for Dogs is specially formulated to provide complete and balanced nutrition for adult dogs while at the same time promoting dental health. Delicate Care™ Dental Diet for Dogs is a limited ingredient diet, making it ideal for dogs that suffer from skin sensitivities. It is a perfect complement to the dental management plan prescribed by your Veterinarian and is suitable for lifelong use.

## BIODENTAL™

Delicate Care™ Dental Diet for Dogs is fortified with Biodental™, our unique blend of phyto-derived organic acids, functional ingredients and botanicals. The phyto-derived organic acids in Biodental™ assist with the reduction of dental biofilms. Microbial Biofilms are complex communities of bacteria that form on the tooth surface and in the canine dental cavities. These come in the form of yellowish plaque that create environments where tooth decay can start. If left undisturbed, these conditions can lead to periodontal disease.

## KIBBLE DESIGN

The kibbles in Delicate Care™ Dental Diet for Dogs have been made to a size, shape and density that have been shown to be important in the mechanical reduction of calculus on teeth. The increased kibble size and shape encourage dogs to chew, thus providing a scraping action that delivers less accumulation of calculus on the dogs' teeth.

Salt, if present in our formulations, is naturally occurring.

# SKIN OR STOMACH FOR DOGS

Delicate Care™ Skin or Stomach for dogs is scientifically formulated for dogs with sensitive skin or digestive systems. We use only the most natural, high quality and novel ingredients available in Australia. While most commercial pet foods use corn or gluten-based grains, we proudly use sorghum as a highly digestible, low GI base, paired with prime Australian kangaroo and duck as the main protein sources. By eliminating the most common food allergens our aim is to stimulate and maintain a healthy immune system naturally.

While specifically formulated for dogs with food intolerances, sensitive skin or digestive system, Delicate Care™ Skin or Stomach is also suitable for dogs of all life stages that may enjoy a palatable, well-balanced and complete diet.

## HYPOALLERGENIC - LOW ALLERGEN & GLUTEN FREE

Ideal for dogs with food sensitivities and intolerances, Delicate Care™ Skin or Stomach does not contain common allergens such as chicken, beef, corn, wheat, soy or dairy. Instead, we've swapped the most common food allergens in favour of gluten-free sorghum, a highly digestible grain with a low GI ranking. Combined with prime Australian kangaroo and duck, Delicate Care™ Skin or Stomach is packed with protein and flavour.

## SUPPORTS IMMUNE FUNCTION

Delicate Care™ Skin or Stomach for dogs contains a blend of prebiotics to promote long term intestinal health, which in turn stimulates and helps maintain a healthy immune system. Delicate Care™ Skin or Stomach natural dog food contains FOS (Fructo-Oligo-Saccharides) which are special sugars that encourage the growth of beneficial bacteria like bifidobacteria in the gut.
