

SSE SUPER STRUCTURE EQUIPMENT

#WeBuildBig

OUR STORY

Super Structure Middle East is a leading provider of large-scale structural solutions across the MENA region.

With over 28 years of industry experience, we have established ourselves as experts in delivering innovative, reliable, and high-quality structural systems for a diverse range of projects and events.

Our build is supported by detailed engineering drawings, structural calculations and certified rigging team to ensure optimal safety, reliability, and precision.

VISION

Our vision is to become the market leader by consistently delivering customer satisfaction through the use of advanced technology, creativity, quality, and safety. We are committed to upholding the highest service standards in the industry, driven by dedication and perseverance.

At SSE, our mission is to be a customer-focused company, closely aligned with the needs of our clients, as we lead the industry in designing and creating large, complex structures. We are dedicated to continuous growth and improvement, with the goal of becoming the region's most trusted and reliable partner for event structures.

Adhering to ISO 45001:2018 & ISO 9001:2015

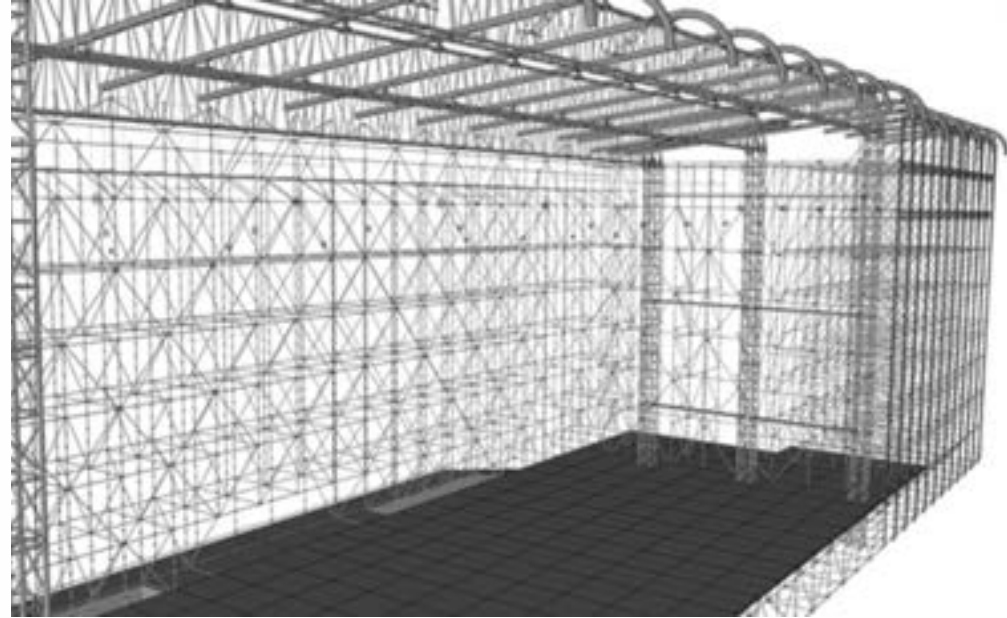

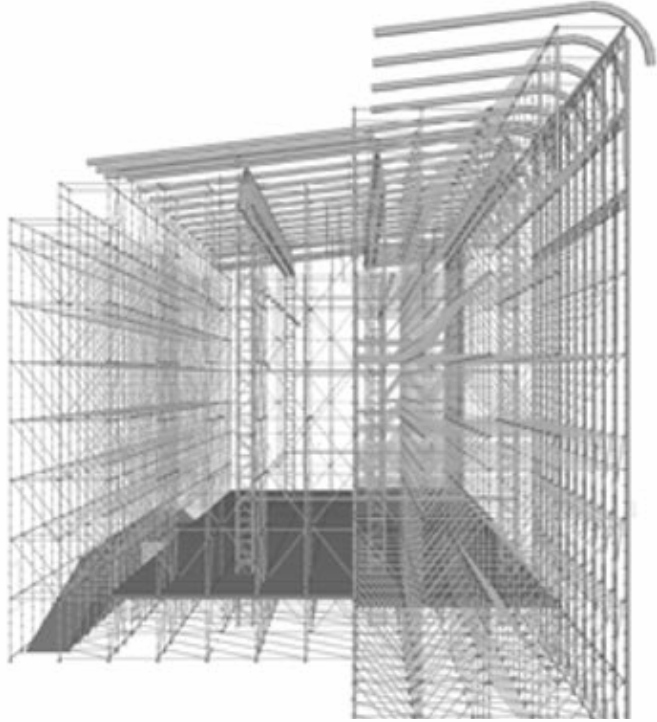

MISSION

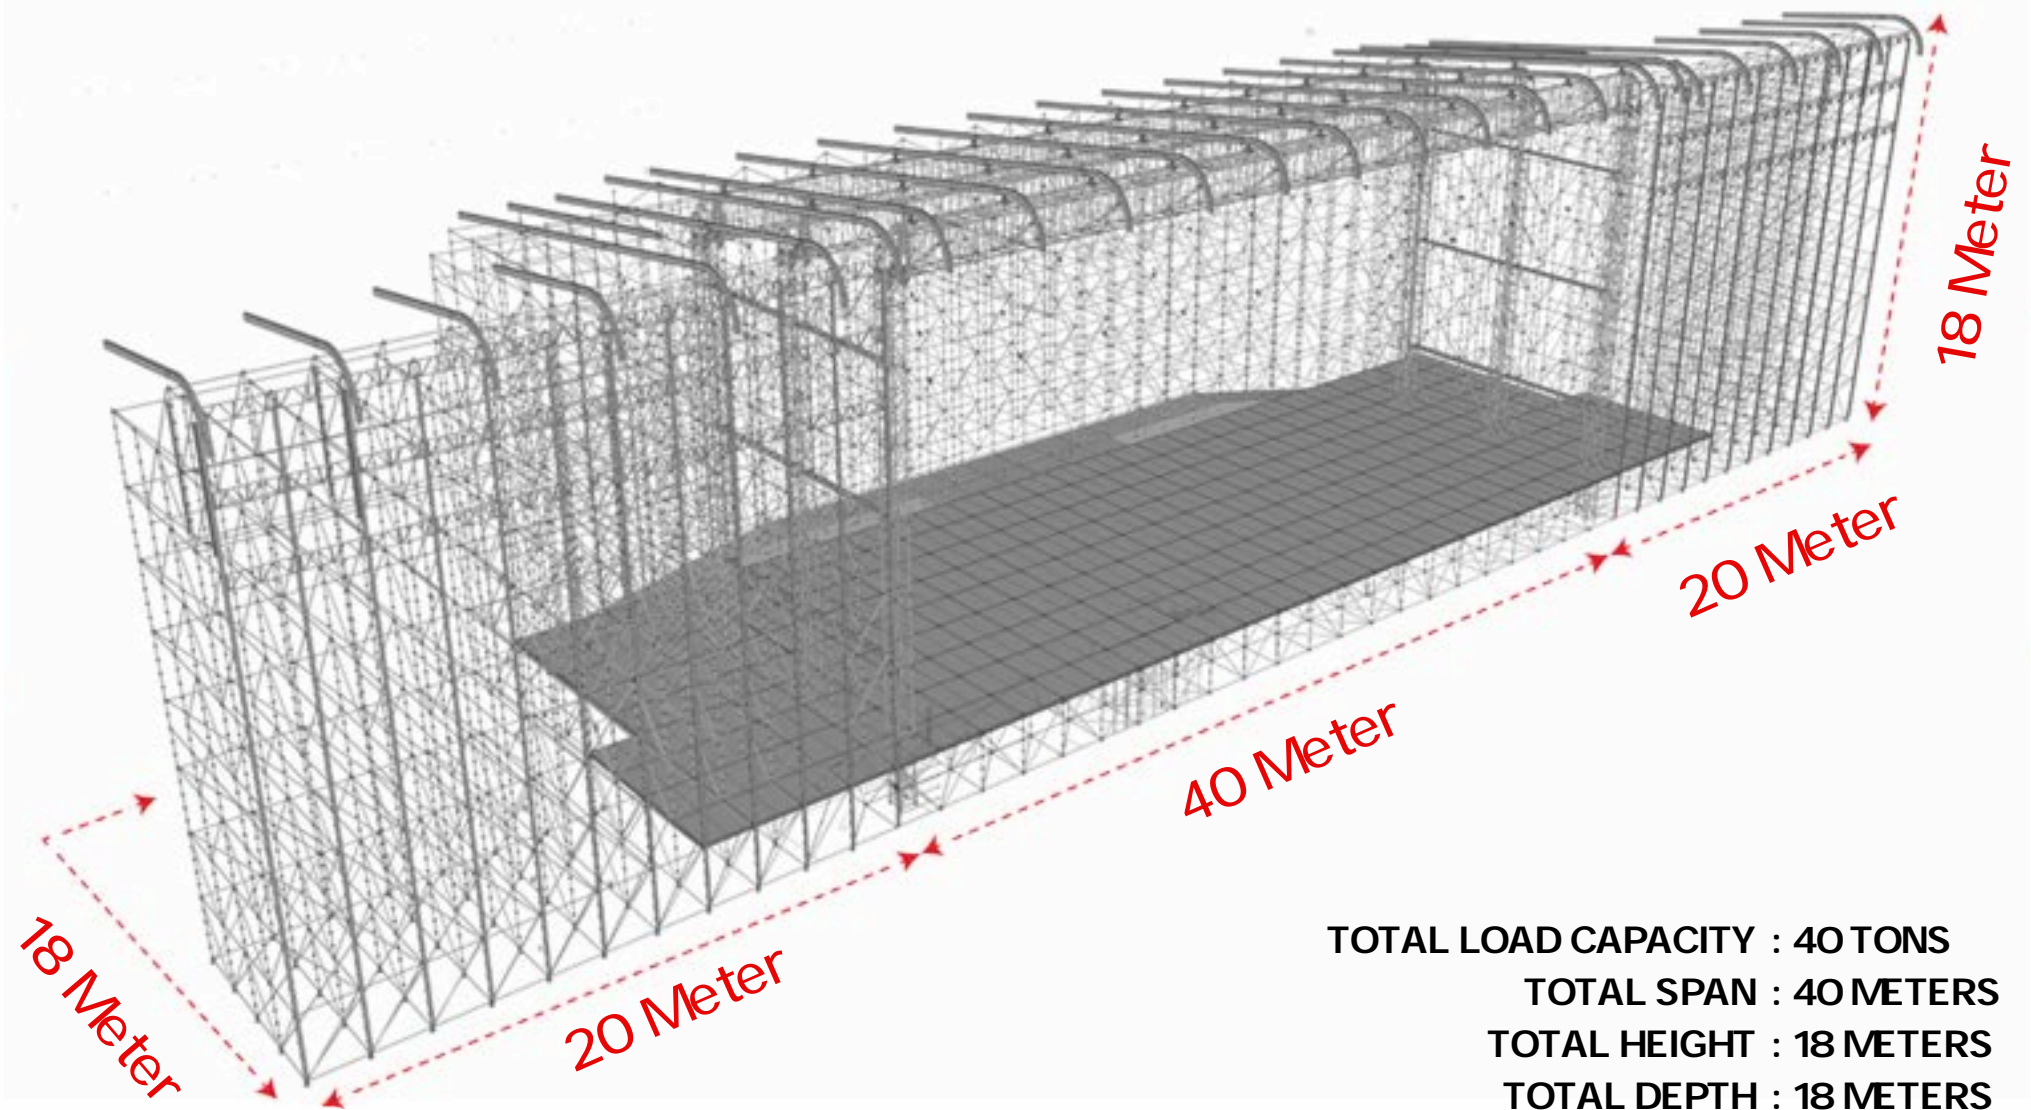

TRIFOLD

Every structure needs a solid backbone for support and stability. The integrity of any build is defined by the core framework that holds it together.

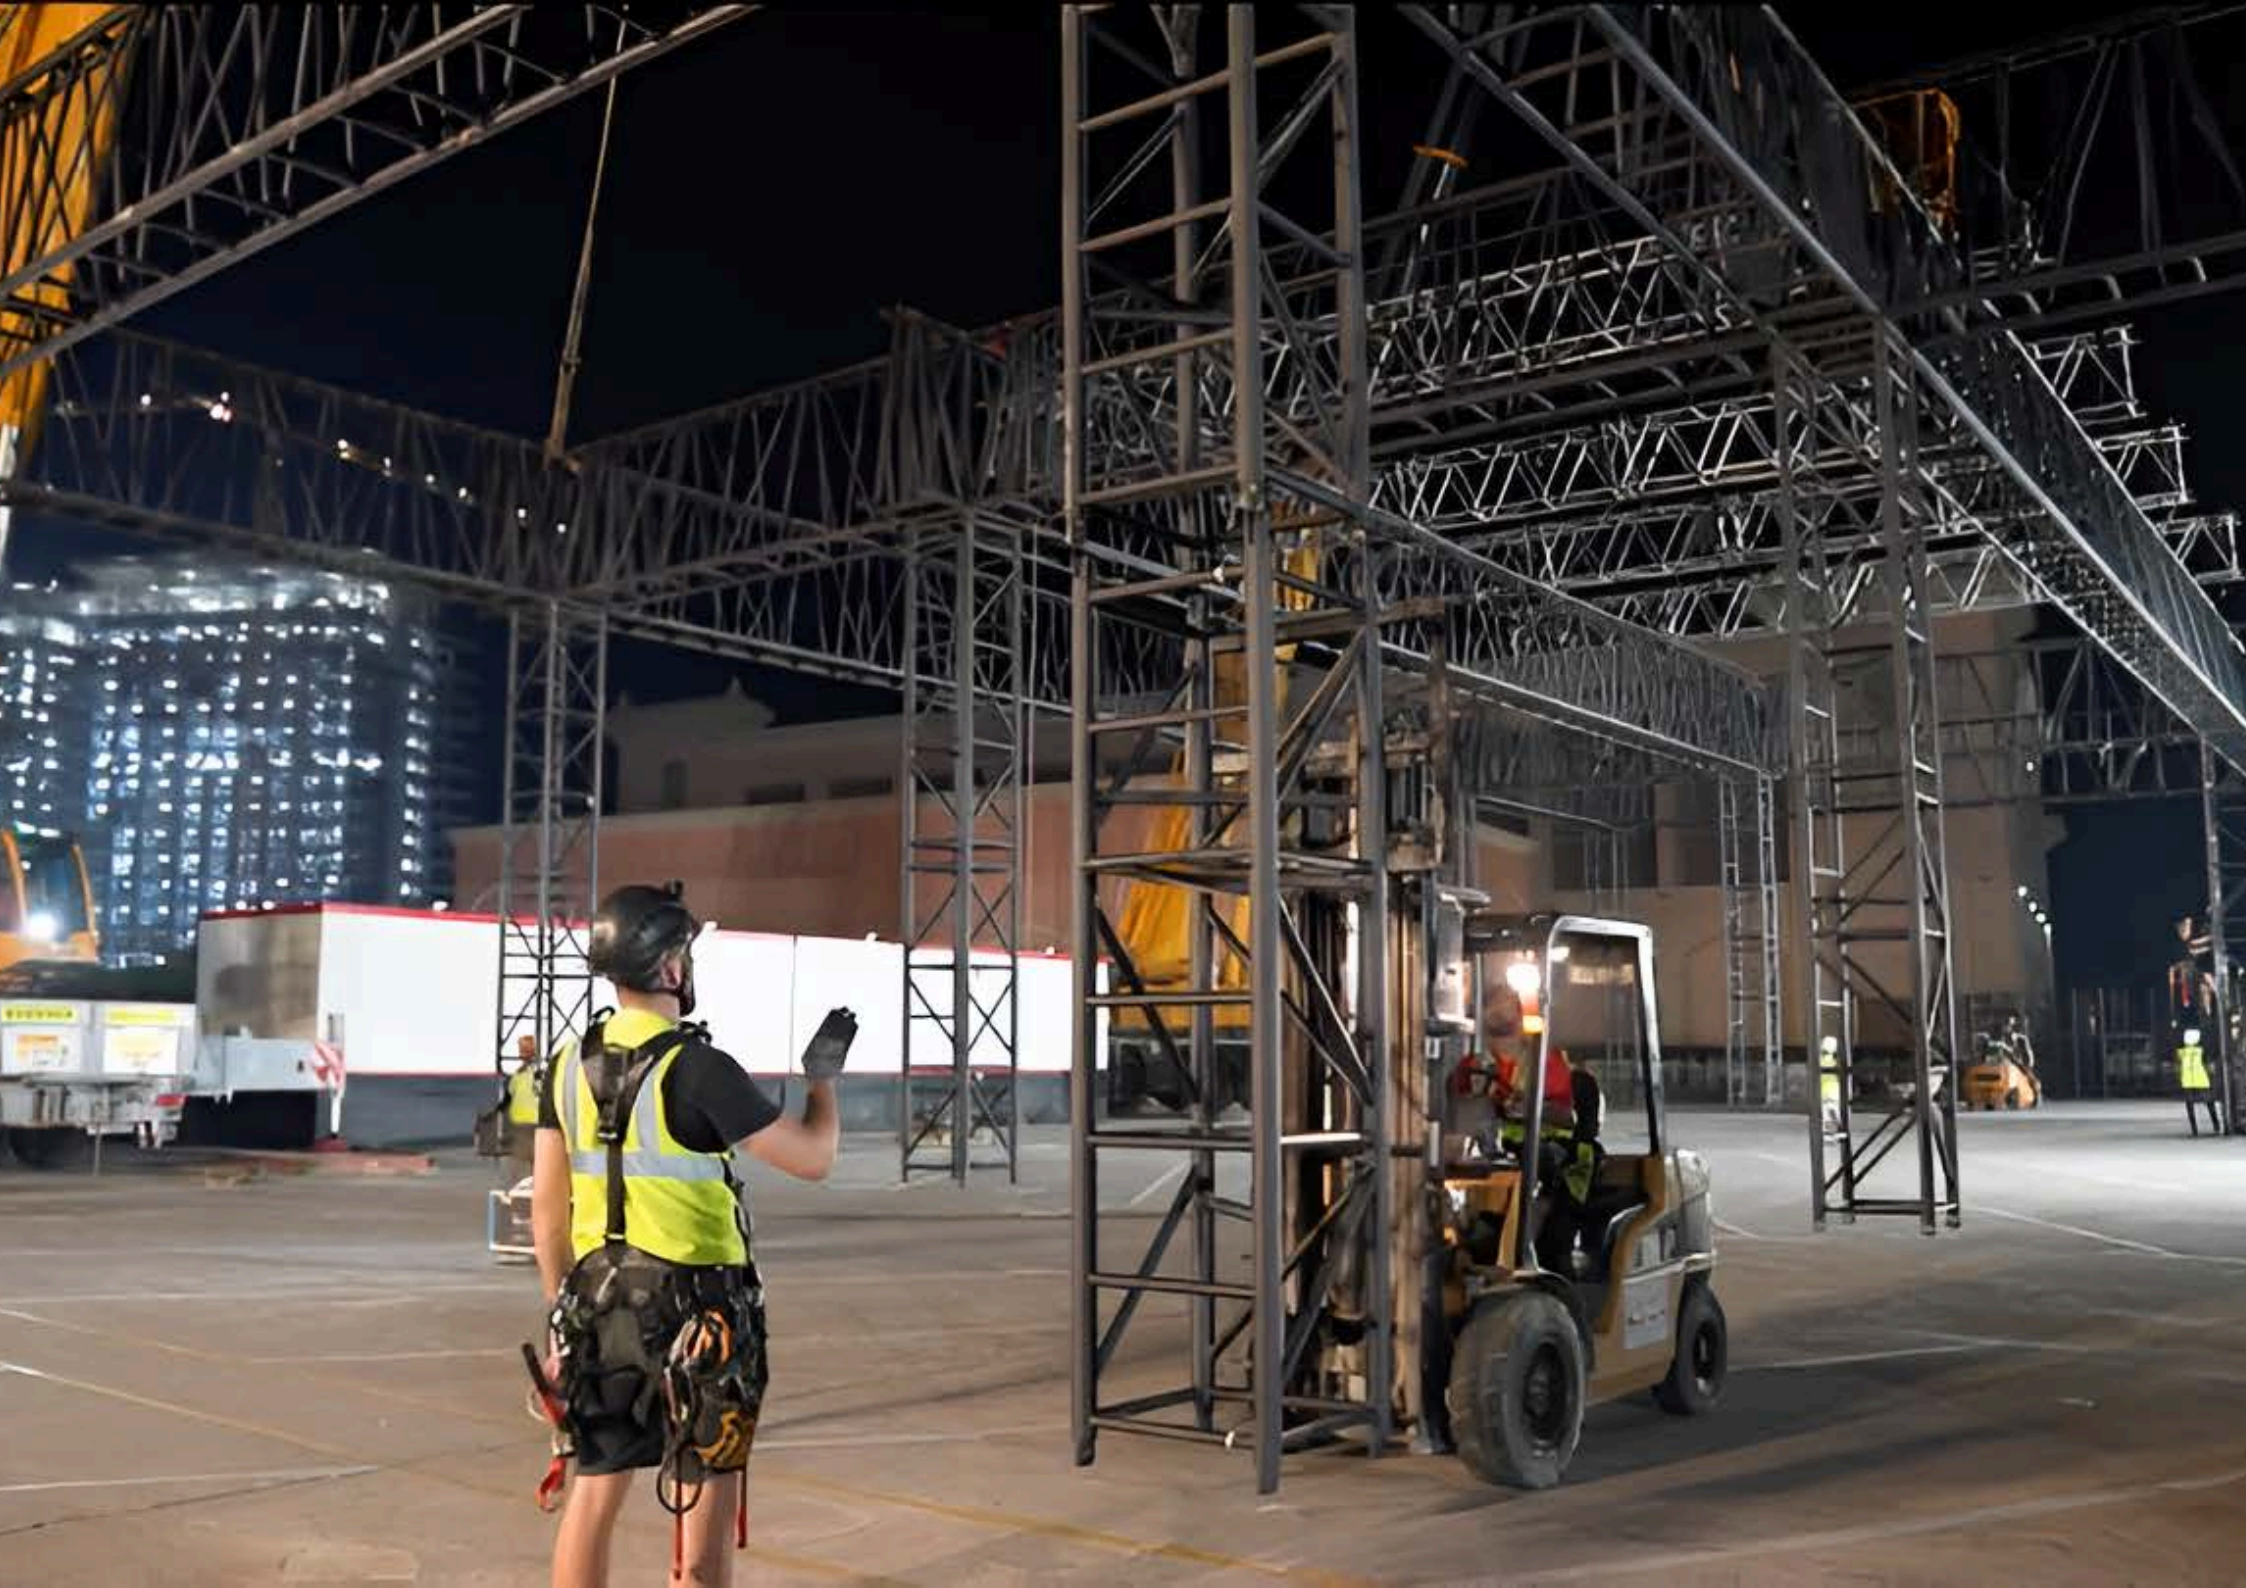

TOTAL LOAD CAPACITY : 40 TONS
TOTAL SPAN : 40 METERS
TOTAL HEIGHT : 18 METERS
TOTAL DEPTH : 18 METERS
PA SCREEN WINGS : 20 METERS

BUILD UP

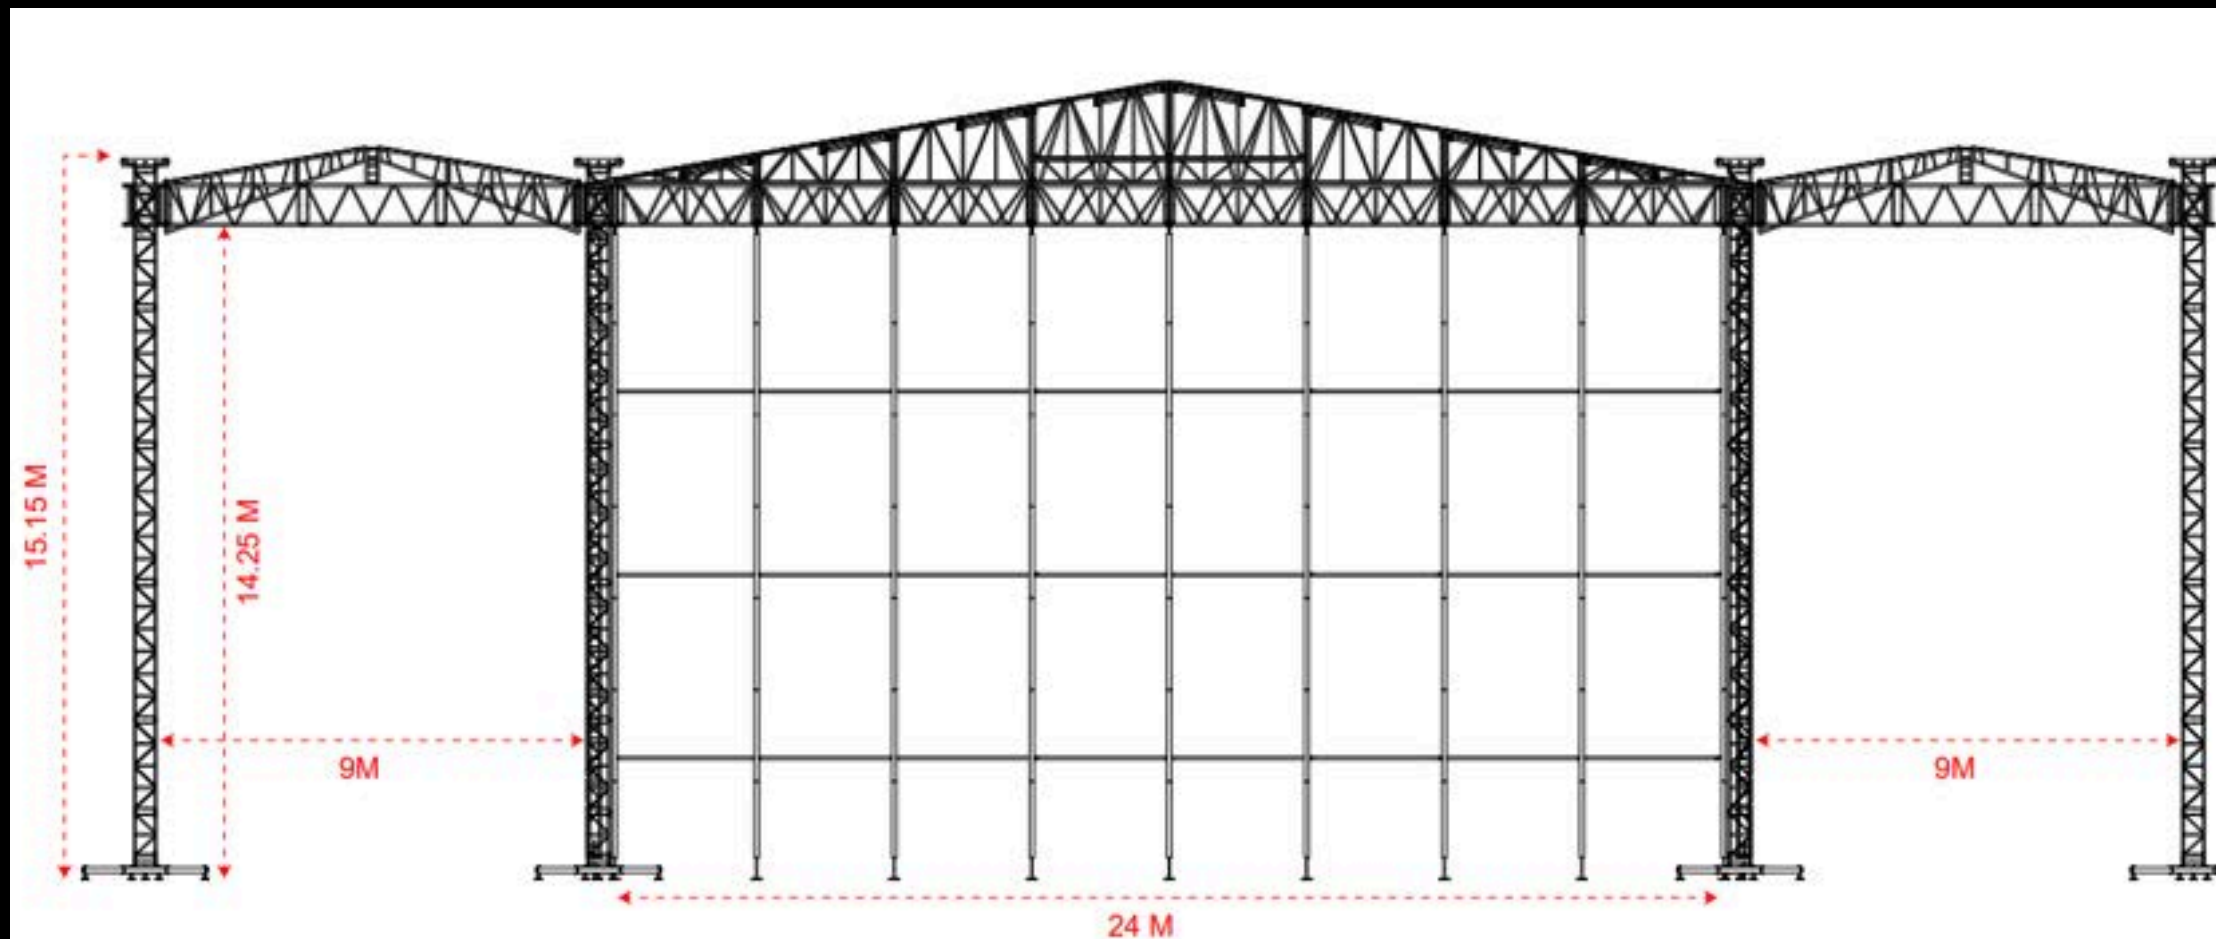

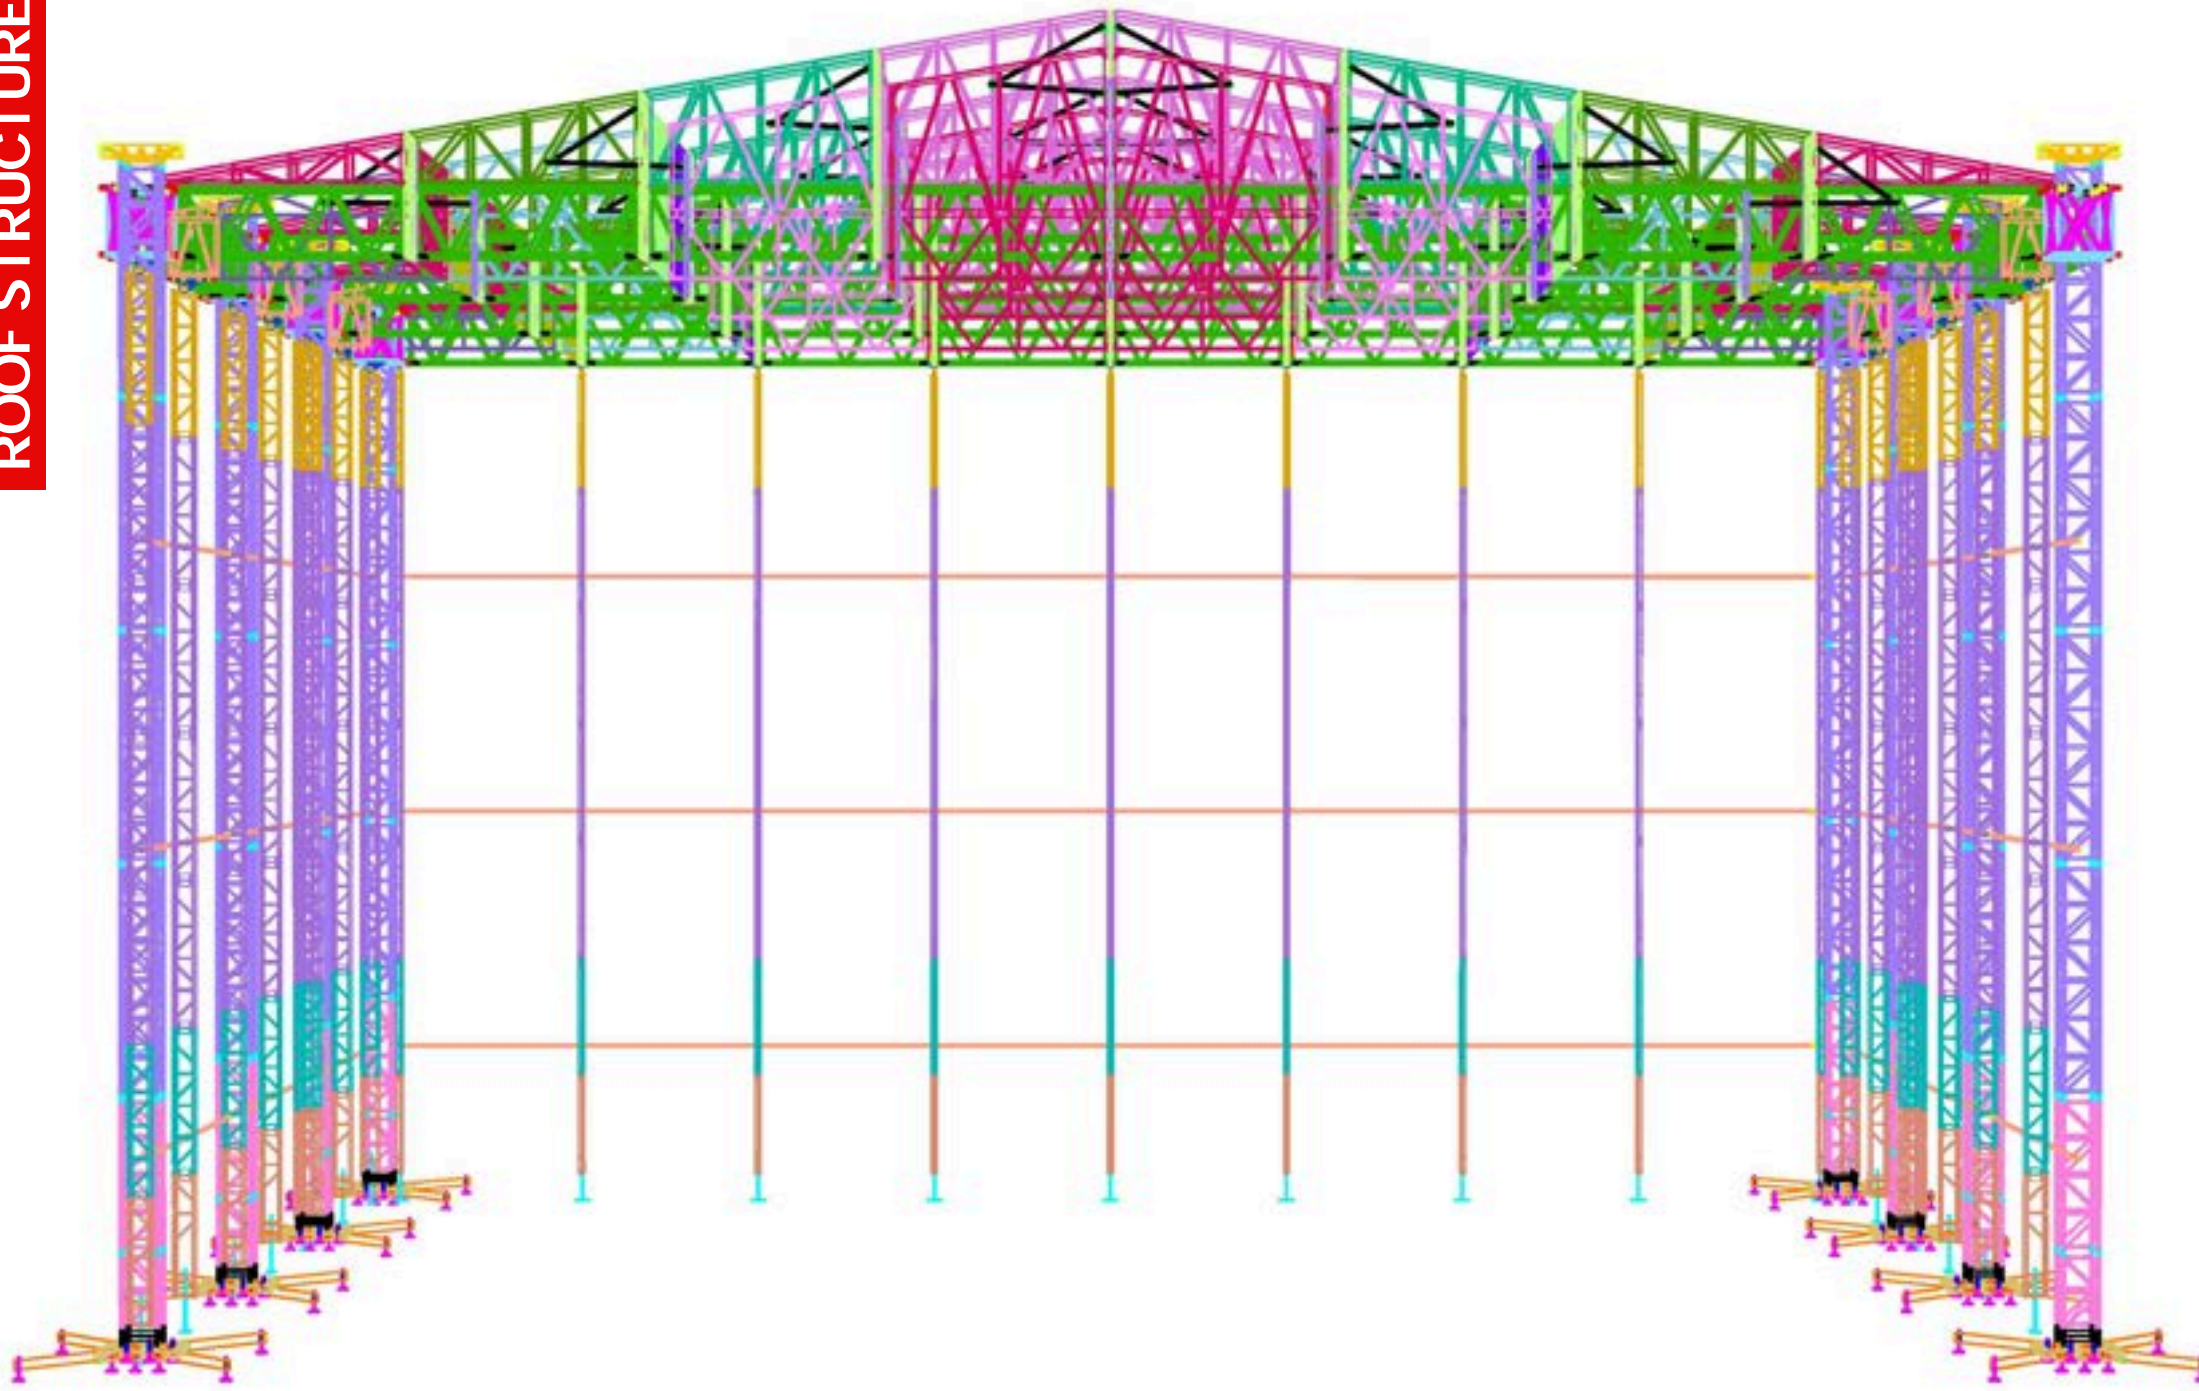

Total Solution Roof Structure Highlights:

With strong load-bearing support, a flexible, modular design, and full safety compliance, our roof structures provide weather resistance, quick assembly, and easy portability for any event or site.

ROOF STRUCTURE

ROOF STRUCTURE

ENGINEERED FOR PERFECTION, BUILT FOR VERSATILITY

With a vast inventory of trussing and rigging, we prioritize safety, precision, and creativity to craft structures that bring your vision to life.

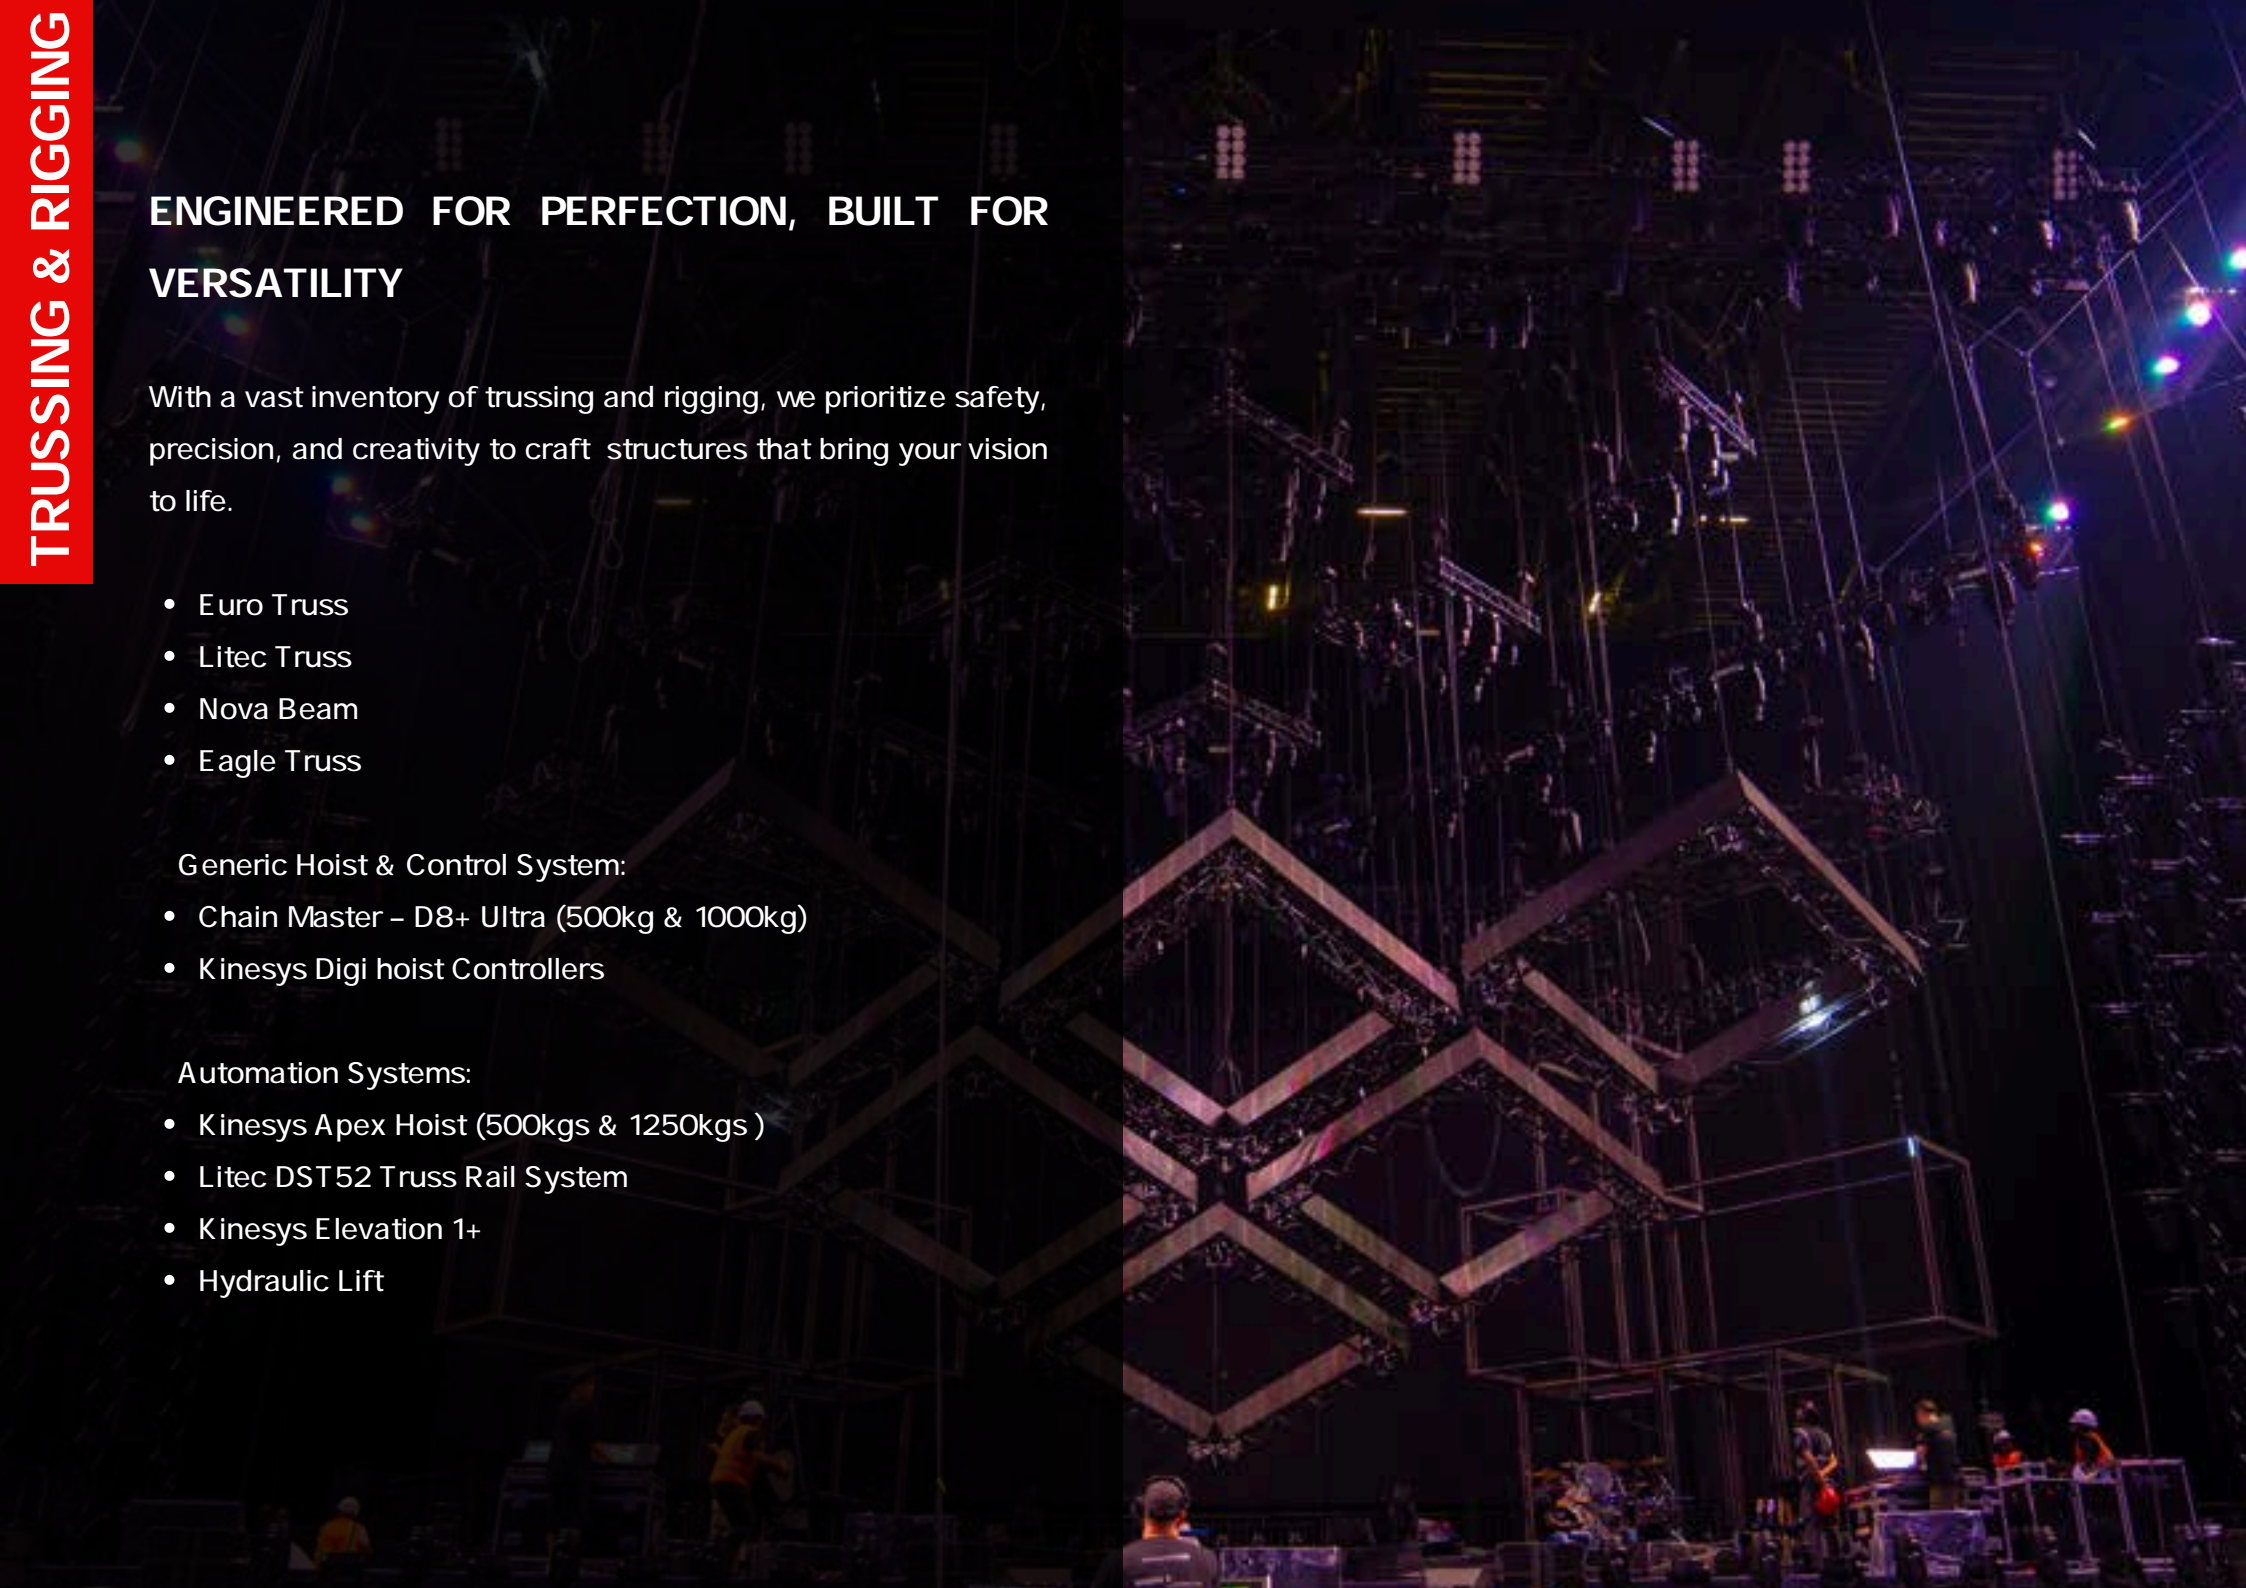

- Euro Truss
- Litec Truss
- Nova Beam
- Eagle Truss

Generic Hoist & Control System:

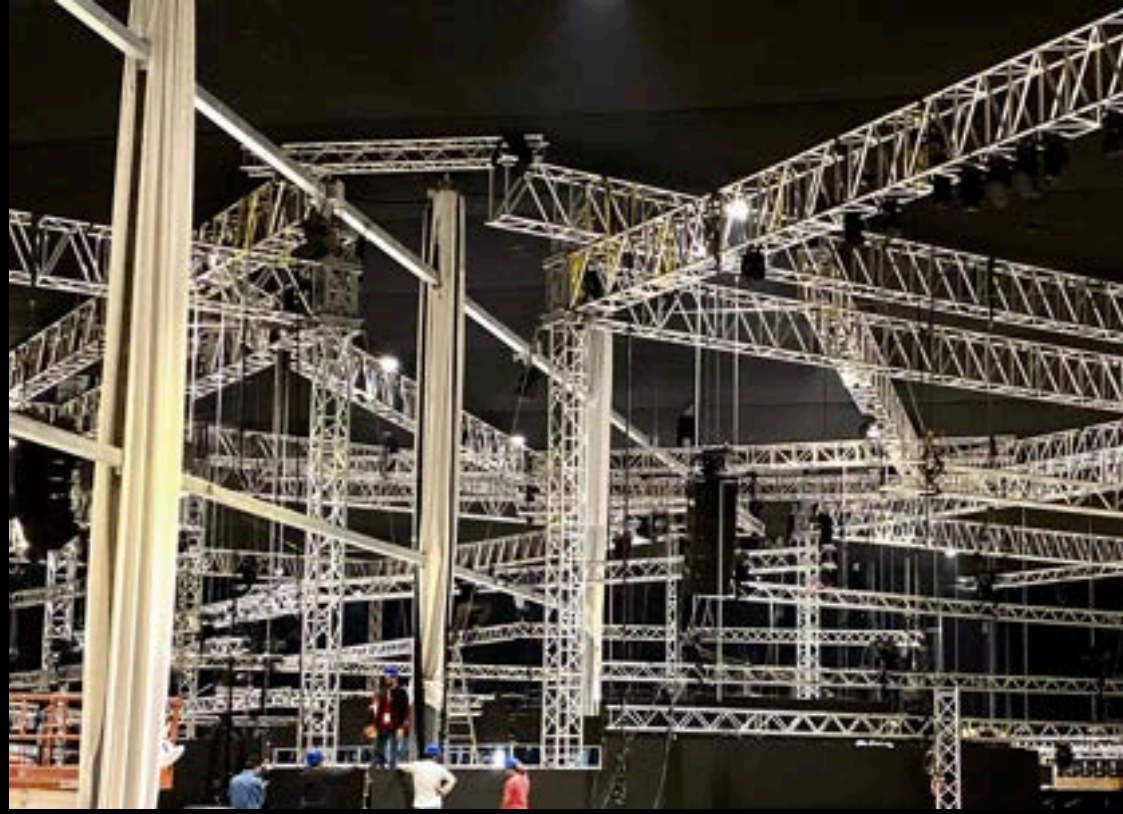

- Chain Master – D8+ Ultra (500kg & 1000kg)
- Kinesys Digi hoist Controllers

Automation Systems:

- Kinesys Apex Hoist (500kgs & 1250kgs)
- Litec DST52 Truss Rail System
- Kinesys Elevation 1+
- Hydraulic Lift

Elevate your event space with our stunning dome structures. Designed for flexibility, these temporary venues are perfect for hosting large-scale events.

Transform your concept into an extraordinary event with our iconic dome venues.

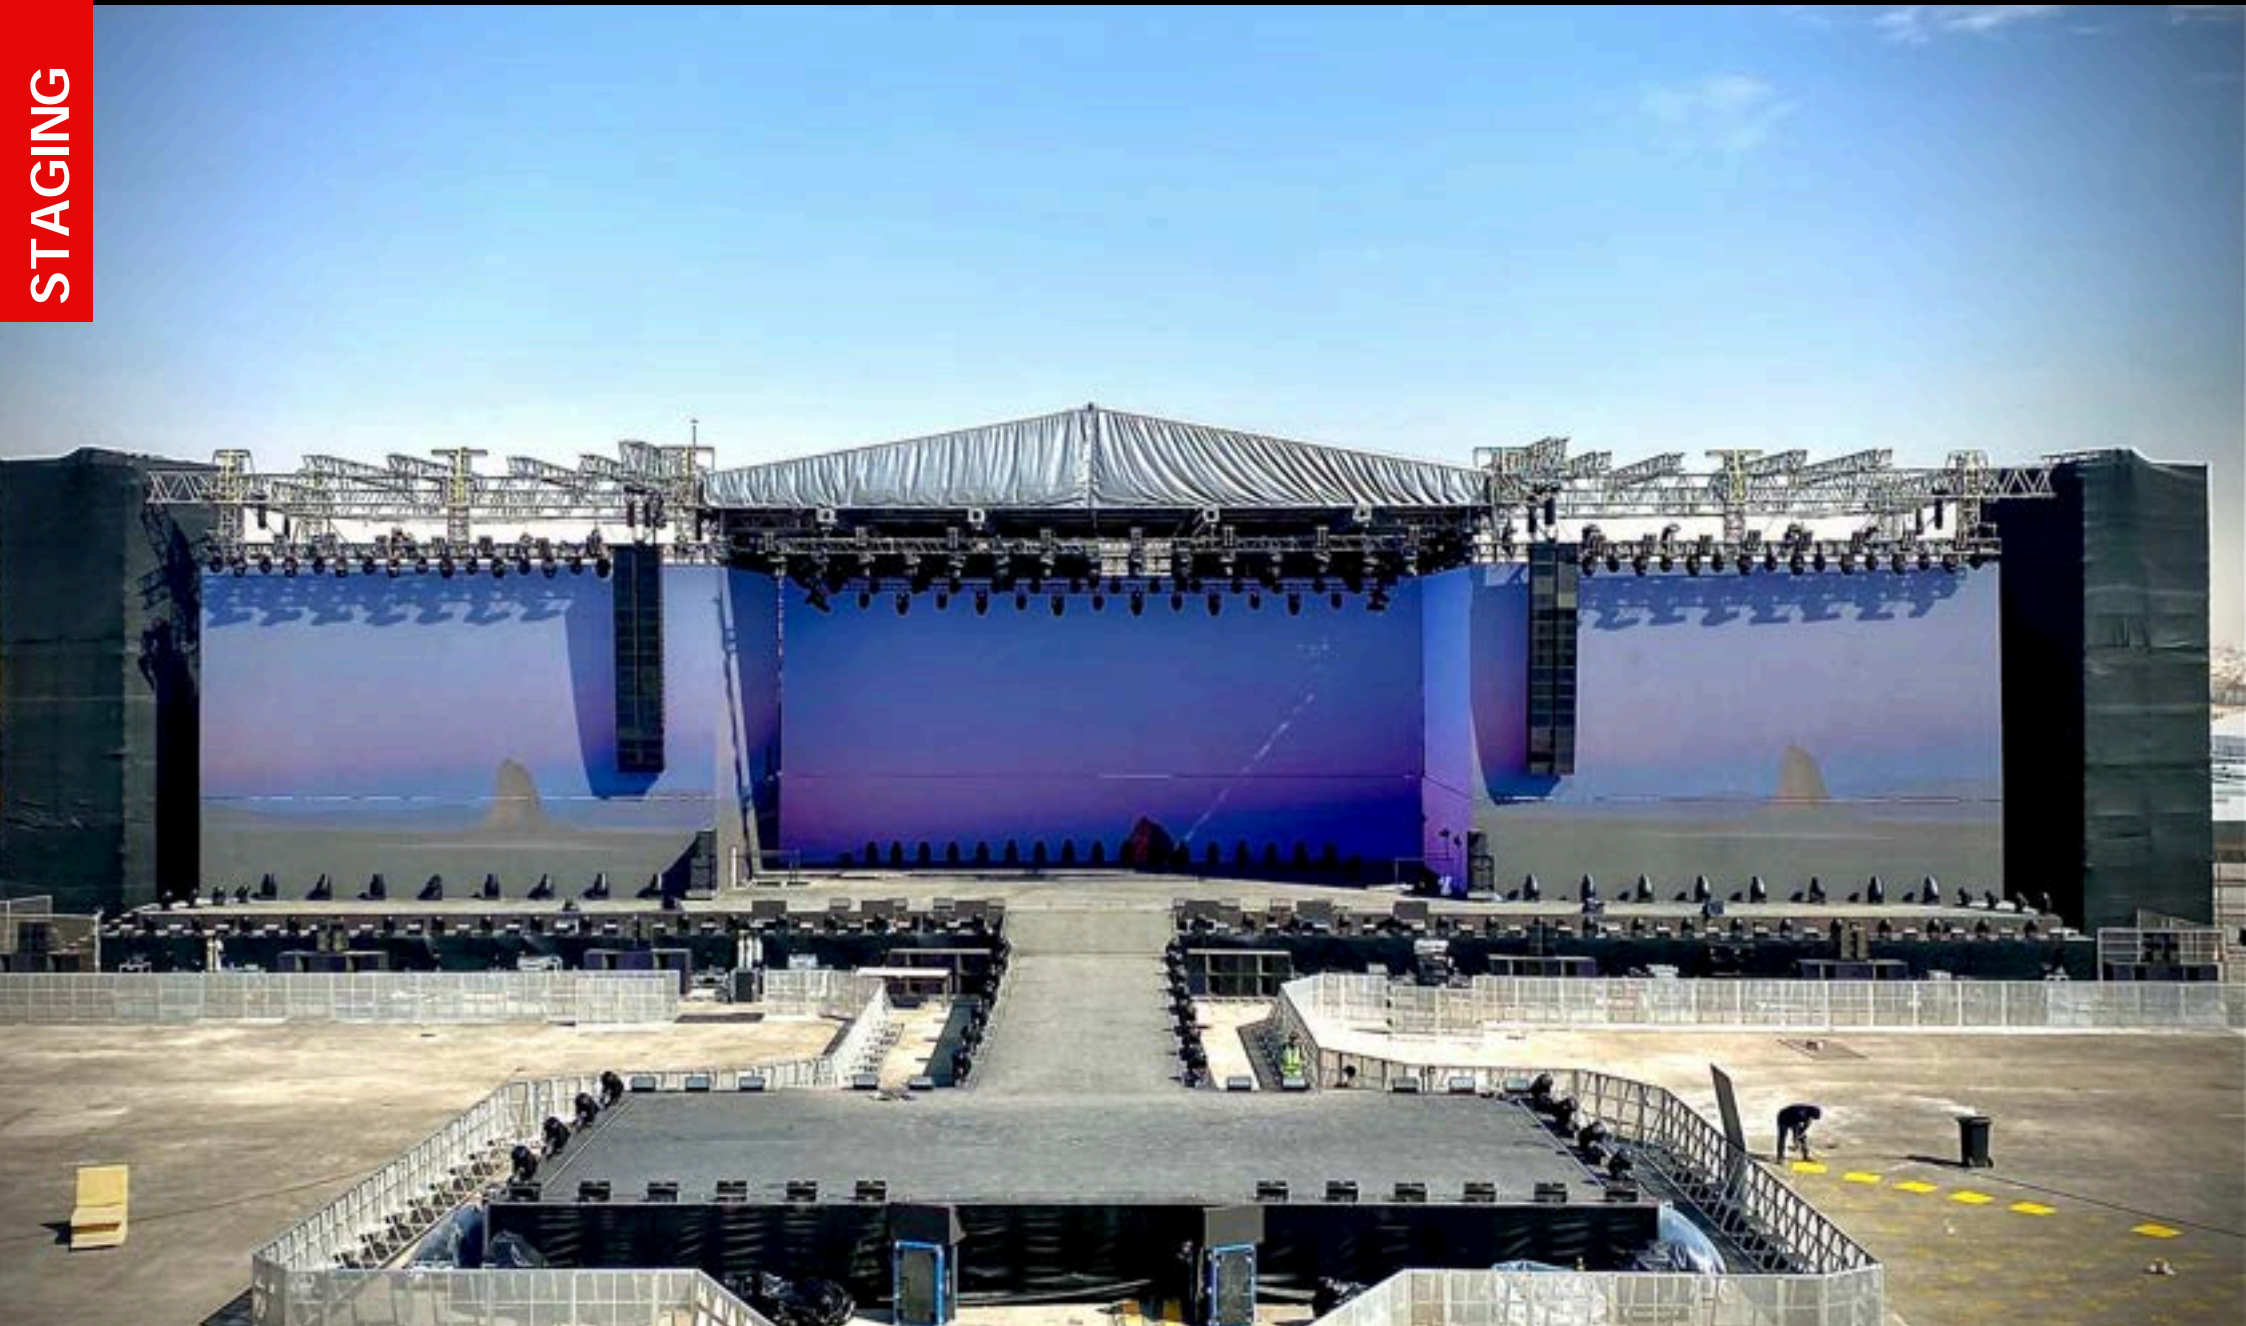

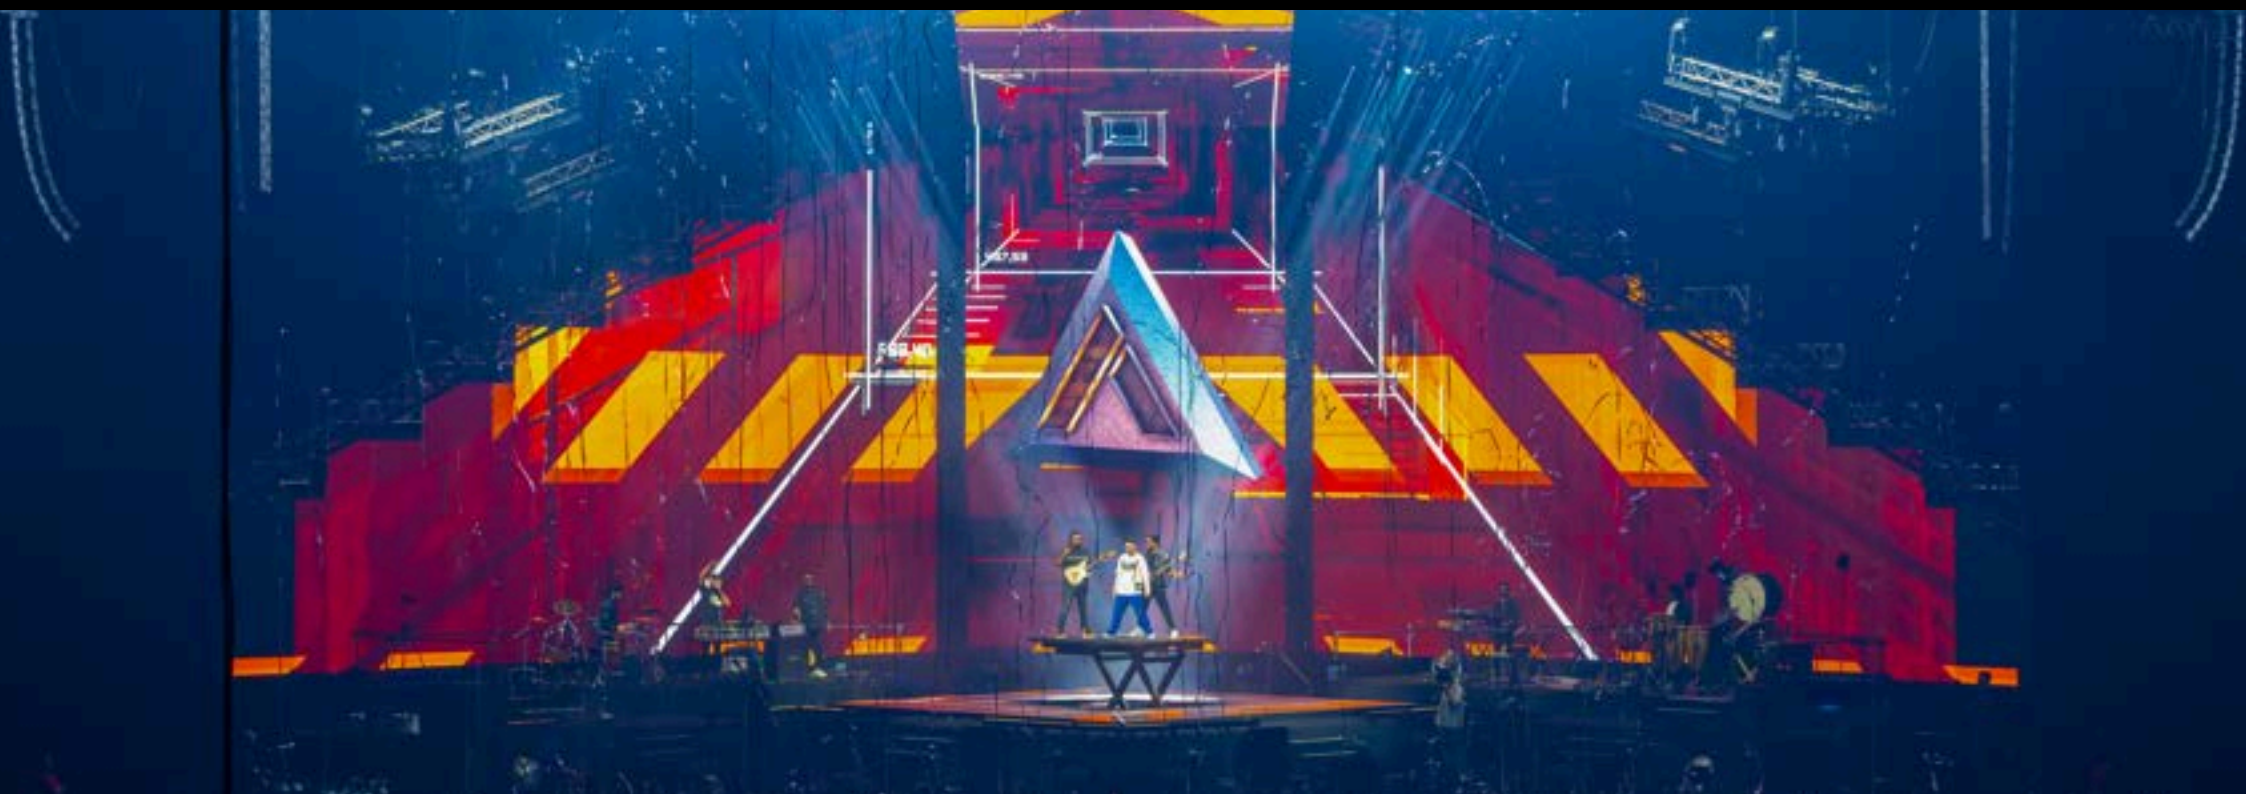

Ringlock scaffolding offers a flexible and reliable framework for crafting stable, customizable designs. With safety and stability at its core, our Ringlock scaffolding systems are engineered to support heavy loads and intricate setups, making them the ideal choice for stage backdrops, lighting rigs, and elevated platforms.

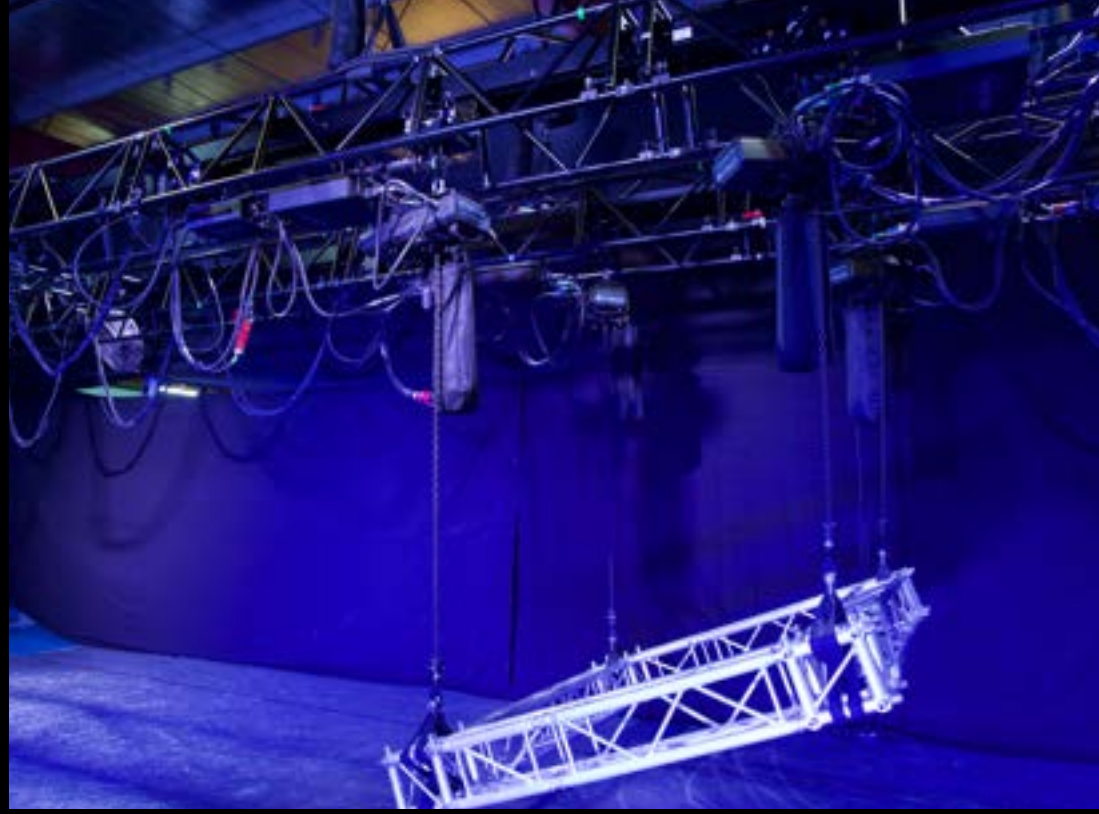

Minimal designs to bold and dynamic setups, we ensure every stage is a perfect blend of functionality and visual appeal with modular superstructure integration, high load capacity, adjustable heights and universal compatibility.
