25' dia x 2' high	7,340 Gal

Fiberglass tanks are lighter and easier to relocate than metal tanks, allowing you to change watering locations as the need arises.

## Float Boxes

24" x 30" tall • 36" x 30" tall

All United Fiberglass Stock Tanks are made with an anti-slip bottom allowing stock to maintain footing in the event they climb in the tank. The non-slip bottom prevents drowning and protects your cattle investment.

**Approved for NRCS (SCS)  
Cost Sharing Program**

*Delivery  
Available*

Whether your tanks are set on the side of a hill or on flat ground, our fleet of delivery vehicles can meet your needs for delivery and installation. Shipping is available anywhere in the United States
