

A lot more detail is coming soon

Examples of Complex Problems

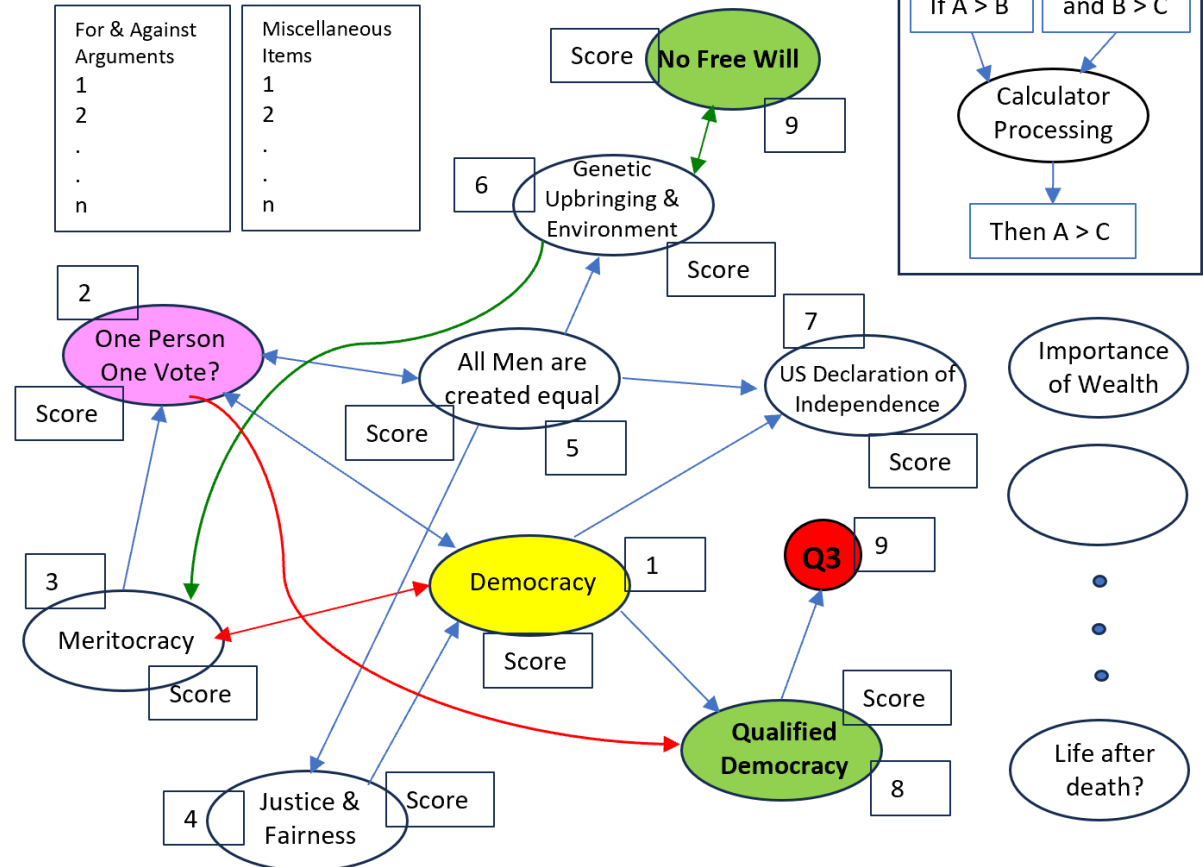

- 1) egoism, effective altruism and utilitarianism;
- 2) consequentialism, intentionalism and deontology;
- 3) compassion vs reason based help;
- 4) justice and forgiveness;
- 5) axiology and epistemology;
- 6) rationalism and empiricism;
- 7) remembering self and experiencing self;
- 8) anthropocentricity, truth and facts;
- 9) social and perceptual facts;
- 10) capitalism and socialism;
- 11) democracy and communism;
- 12) total and restricted freedom;
- 13) competition and cooperation;
- 14) Aristocracy, Meritocracy and Equity;
- 15) while realizing that not all conundrums are solved, and that **Free Will**, meaning and purpose of life are only useful and essential **illusions** but use your passion to make meaning out of it anyway

- 1) Rough Example of Truth Machine (TM).
- 2) A lot more detail will be worked by the designers and developers with EMMA's guidance.
- 3) Eventually there will be millions of topics that will be entered by users all across the globe similar to Wikipedia.
- 4) User will create his/her account, enters his credentials, post topic, enter his arguments, rate others' arguments, get himself rated by others, and more.
- 5) Truth machine will track all of the above and more. It will make some lines red, green, blue or yellow. Clicking on the line, round circle, and main topic more detail can show.
- 6) Each line will have line number. Red line means contradiction. Green line means consistency and so on. Give legend for colors.
- 7) All these will be stored in an efficient data structure in the data base.

**Q3 = Qualified, 3rd Party, Double
Blind, Successive Approximation,
Iterative Methodology**

Real AI Based Truth Machine (TM)

Example of Easy Problem

EMMA's Truth Machine will use 3rd party API for NLP such as ChatGPT 5.0 or higher and others future AI interfaces with the participation of Q3 human similar to Wikipedia platform free for everyone to use.

Example of real intelligence test that hard coded woke ChatGPT 4.0 can't solve.
ChatGPT 4.0 also fails in the intelligence problem cited on the landing page of this website.
