

DISPUTE PACK

Healthcare - AI Triage Influence

World: Clinical Care Governance **Outcome:** ESCALATE **Evidence Pack ID:**
JSP-PUBLIC-20260302-HEALTHCARE_A-0001

1. What was claimed / requested

Model recommends downgrading a high-acuity patient pathway.

2. What the system allowed vs blocked

Allowed

- Drafting and preparation can continue.
- Execution is paused pending named authority.

Blocked

- Commit actions until approvals are recorded.

3. Why (governance rationale)

Judgement Spine treats pathway change as a Moment That Matters. If vitals conflict or confidence degrades, doctrine enforces ESCALATE to a named clinician with time-boxed re-check and rollback preserved.

This pack is designed to survive dispute: it links decision, authority, bounds, and integrity in one exportable object.

Evidence references

4. Evidence signals

- triage_model_version
- vital_signs_stream
- contraindication_flags
- trend_stability
- clinician_on_duty
- uncertainty_flags

5. Evidence artefacts in this bundle

policy_trace.ndjson	Which doctrine checks fired and why.
audit_export.ndjson	Execution-time event record.
provenance_chain.json	Illustrative provenance and chain integrity.
authority_contract.json	Named authority + bounds contract.
manifest.json + signature	Integrity references (tamper-evident).

6. Integrity verification

Run `verify_manifest.py` from the root folder and retain the output as part of the dispute file.

If the hashes and signature verify, the pack is unmodified since it was sealed.
