DEVICE SETUP AND ACTIVATION

iGotcha
Our Eye is Your Peace of Mind

1

www.igotchagps.com/login

Login to your **iGotcha account** and navigate to the **Device Inventory** page. Search for your device using the **serial number** found on the device label. Fill in the vehicle and customer details. **Click Save**.

2

Ensure the device is in a location with good visibility to the sky. **Press the button** located on the bottom of the device.

3

After **pressing the button**, monitor the LEDs to confirm device gets a location. **The Blue LED** will blink slowly (1x per second). Once **the LED stops blinking**, the device is ready to be installed.

4

Place the device in one of the recommended install locations. **Do not** locate the device anywhere with direct sunlight, in the engine compartment, or other location that generates heat.

5

www.igotchagps.com/login

Once the device has completed the activation steps, return to your **iGotcha account**, verify the device has an install date and move it to **Live state**.

Notes:

- If the **Green LED** is blinking fast, there is no GPS lock. Ensure there is clear visibility to the sky or this process may fail to complete or take up to 15 minutes to complete.
- If **Blue LED** was blinking fast before it turned off, move to a location with better cellular coverage and press the button again.
