

pathene.com

Have you experienced Mold, Mildew, Fungus or Algae in your Boat or RV?

Musty Awnings?

Moldy Fridges?

After-winter mold in your boat/RV?

Pathene™ can help protect your investment!

Benefits of Pathene™

- Unique bound technology
- Long-term residual protection
- Protection for porous or non-porous surfaces
- GREEN - does not leach or deplete like nano silver
- Efficacy proven through independent testing
- SAFE - uses no poison or heavy metals like nano silver
- Mechanically killing bacteria means Pathene™ technology cannot create super bugs
- Easily added to finish cycle for manufacturers
- Water-based product suitable for any application (hospitals, oil rigs, mass transit, aviation, daycares, health and wellness facilities, spas, fitness centers, hospitality, offices, first responders, retail, grocery stores, marine, educational institutions, correctional institutions, etc)

Clean

Disinfect

Protect

- Our revolutionary 3 step process **CLEANS** visible dirt, **DISINFECTS** to kill viruses (including COVID19) and bacteria that are not visible to the naked eye, and **PROTECTS** by inhibiting the growth of bacteria, mold, mildew, algae and fungus on the surfaces between cleaning periods.
- Meaning you're always protected despite your cleaning intervals.
- It maintains a protective coating for up to 3 months
- Without a micro-biostatic antimicrobial coating you're simply cleaning the surface periodically and it is immediately unprotected after. Hosting and transmission of germs including the growth of bacteria, mold, mildew, algae and fungus, can occur as soon as the surface is utilized.
- PMRA approved water-based micro-biostatic antimicrobial coating.
- Treat your toys when you dewinterize and when you winterize for maximum protection.
