2022 Overview

Marking the official coming out of the Global Lockdown, 2022 was an opportunity for Digital Citizenship to get back in touch with all the stakeholders and counterparts working for a safer internet.

We also were able to travel to young citizens across the country and provide them with some knowledge to protect themselves from online dangers.

We were extremely grateful for being part in sharing knowledge and experiences during 2022, presented in the following report. We are looking forward to pursuing our quest for a safer and inclusive digital space in 2023.
Workshops

DJ Workshop

January 15th 2022 - Nabeul & Tunis
In partnership with Beni Khalled’s Preservation Association and Mdinti, Digital citizenship have organised a music creation workshop targeting adolescent girls living in Beni Khalled and the Medina of Tunis.
