

Lewis and Clark Irrigation

PO Box 7223

Kennewick, WA 99336

(509) 735-2151

Welcome to Lewis and Clark Irrigation.

Lewis and Clark Irrigation (LCI) will provide your property with irrigation water for yard and lawn care from approximately the first part of March through the end of October.

LCI billing is mailed out in February (for the first half of the annual irrigation assessment) and May (the balance of the annual assessment if it was not paid completely from the February billing). Payments can be made through our website; lcirrig.com or by mail to PO Box 7223, Kennewick, WA 99336.

Please contact us by phone or email; lcirrig@gmail.com to establish service for your home.

Answers to your irrigation questions can be found on our website, lcirrig.com. You may also reach us at (509) 735-2151.

The water that LCI provides is sourced locally from raw, unfiltered, Yakima River water. Your irrigation system will likely have filters that will need periodic maintenance.

LCI will maintain an honor-system watering schedule, alternating days and hours of watering so that every homeowner has adequate pressure to care for their landscaping. The Dept. of Ecology issues the water rights that supplies LCI. Should the Dept. of Ecology ever declare a drought in our region of the state, curtailment of irrigation water would take precedence over the LCI watering schedule.

We hope you enjoy your new home!
