

“One Big Beautiful Bill” Will Make America More Secure and Prosperous

Dear Representative:

The House will soon vote on passage of the “One Big Beautiful Bill” that restores guardrails to prevent Medicaid fraud and verify eligibility; adopts work requirements for capable adults; prevents money laundering that subsidizes health insurance for illegal aliens; protects taxpayers from being forced to fund the Big Abortion industry; and prevents a massive tax increase on families and small businesses.

This bill honors the right of parents to guide the education and upbringing of their children in an educational setting of their choice. It also provides support for scholarships that assist families of modest means in educating their children.

America’s students are underperforming by international standards and our own. Low-income Americans are particularly underserved by an education system that lacks freedom and competition.

The Center for Urban Renewal and Education (CURE), strives to fight poverty and restore dignity through messages and policies that advance faith, freedom and personal responsibility. We believe that welfare-state socialism has seriously undermined families and communities. By permanently renewing and enhancing the Opportunity Zone program, this bill will help unleash capitalism so that the broken parts of America can experience real prosperity.

The “One Big Beautiful Bill” takes important steps to reverse the reckless spending and overzealous regulation of the Biden-Harris administration. It will enable America to return to our foundational principles of economic freedom and fiscal responsibility that gave birth to the most powerful, prosperous, and generous nation in the history of the world.

In order to spur our economy and reduce our national debt, it provides for the extension and expansion of the family and business tax cuts President Trump secured in 2017. Faster growth is essential to counter the increase in cumulative debt and the spiraling interest expenses to service it.

The bill opens up domestic energy production and drives costs down for consumers. It releases the regulatory burden that is choking job creators and stifling economic freedom. The legislation also bolsters investment in a secure border and a strong national defense.

The “One Big Beautiful Bill” is the product of vigorous negotiations. It doesn’t bend the cost curve as much as we would like and the Senate’s “Byrd Rule” caused some good House provisions to fall out, but it’s a very strong bill and worthy of your support.

Sincerely,

Star Parker
