

Mentoring

Elite Mentoring Services are a unique way to provide customers with a designated Mentor that they individually develop a relationship with. We have found that many of our customers have barriers, which cannot be overcome through a course alone. The hands-on approach helps with understanding the real needs of customers. Most importantly, the mentor becomes a confidant to the customer at the most important time of the employment process, increasing retention and case closure. We have a group of mentors with unparalleled education, and life experiences; and we will take in consideration many factors when assigning a mentor to ensure successful sessions.

- In depth job development, that takes in consideration job goals but also location, hours and work-site culture
- Paycheck Management/ Financial Awareness
- Our Mentors act as a liaison for the customer when dealing with economic or professional issues during the job placement period.
- Assist in defining and selecting additional training, and/or educational opportunities in line with set career goals.
- Detailed Mentoring Log and Evaluation will be submitted to customer's counselor.
