

Oticon Reveal features and benefits

Speech understanding and listening ease

World’s first Dual AI system

Feature: Groundbreaking Dual AI system consists of two new AI technologies. One AI continuously identifies and enhances clear speech while the other AI preserves and balances contextual sounds. Both work together in all environments in real time.

Benefit: Delivers both speech and contextual sounds in optimal balance.

Reveal AI Clarifier™

Feature: Analyzes the sound environment every 2 milliseconds* to adapt and deliver the optimal balance in any dynamic environment.

Benefit: Provides a personalized sound experience by delivering crystal clear speech and contextual sounds in optimal balance.

Reveal Amplifier™

Feature: Provides precise and balanced amplification over a wide frequency range to deliver a fuller and richer sound scene.

Benefit: Preserves the natural characteristics of speech to improve speech clarity, especially in noisy environments.

Wind & Handling Stabilizer 2.0**

Feature: Prevents up to 40 dB of wind noise.

Benefit: Enhances speech clarity in windy situations.

4D Sensor technology*

Feature: Recognizes when the user's listening needs change and adapts to improve the signal-to-noise ratio.

Benefit: Personalizes support in noisy environments based on the type of conversation or activity you are engaged in.

Reveal Optimizer™

Feature: Proactively prevents feedback without reducing sound quality.

Benefit: Helps prevent hearing aids from whistling or howling.

SuddenSound Stabilizer

Feature: Manages sudden and loud sounds across various environments without distortion.

Benefit: Ensures superior sound quality and makes unpredictable sounds more comfortable throughout the day.

Speech Rescue™

Feature: Helps make high-frequency speech sounds accessible that would otherwise be inaudible using frequency composition.

Benefit: Restores sounds like /s/ and /sh/ that might be missed.

Sound quality

Clear Dynamics**

Feature: Provides an enhanced input dynamic range of 113 dB.

Benefit: Ensures better sound quality with less distortion in loud environments.

MyMusic

Feature: Dedicated music program to preserve music fidelity.

Benefit: Enhances the music experience, whether listening live or streamed.

Connecting to the world

Industry-leading connectivity

Feature: Connects via NFMI and Bluetooth® Low Energy Technology.

Benefit: Allows confident connection to favorite devices with cutting edge connectivity that is stable and reliable throughout the day.

Other

Tinnitus SoundSupport™

Feature: Integrated sound generator with various options for tinnitus relief.

Benefit: Offers a multitude of soothing sounds to meet individual tinnitus needs.

Product Overview

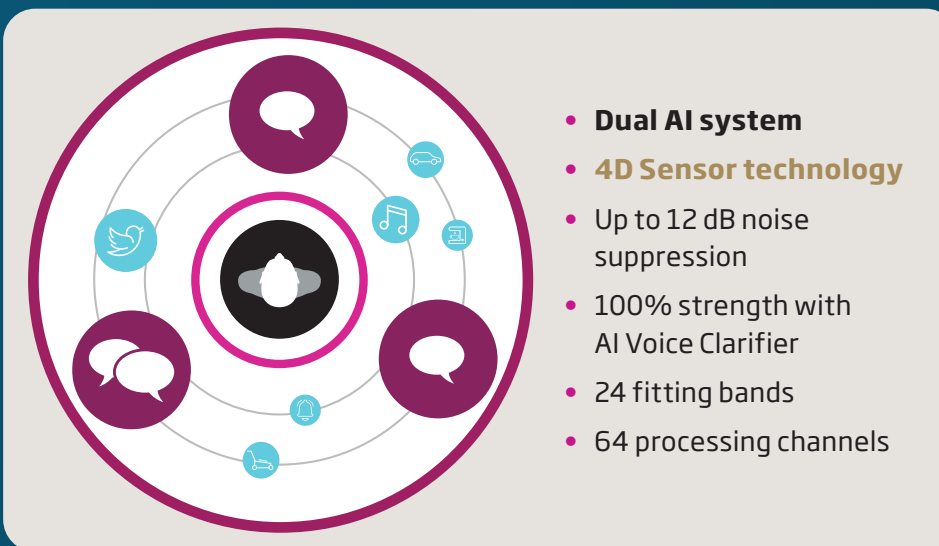

oticon
life-changing technology

World's first Dual AI system with Sensor Driven* Technology

Powered by Reveal AI™ platform, Oticon Reveal™ combines two integrated AI systems into a small, discreet design, with all-day power†, 4D Sensor technology, and a brand-new connectivity platform all working together to bring users closer to natural hearing.

Which technology level is right for your patient?

LEVEL 1

AI Voice Clarifier is a powerful feature in difficult listening environments. It quickly cleans up the sound environment by controlling and balancing sources of noise, even when they are in motion. It adapts quickly to remove unwanted noise sources so your patients can focus on the important sounds, like speech.

*Only available in Oticon Reveal technology level 1 & 2

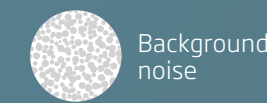

**Available on select devices. For more information, please visit oticon.com/support/compatibility-guide.

†Expected use time for rechargeable battery depends on use pattern, active feature set, hearing loss, sound environment, battery age, and use of wireless accessories.

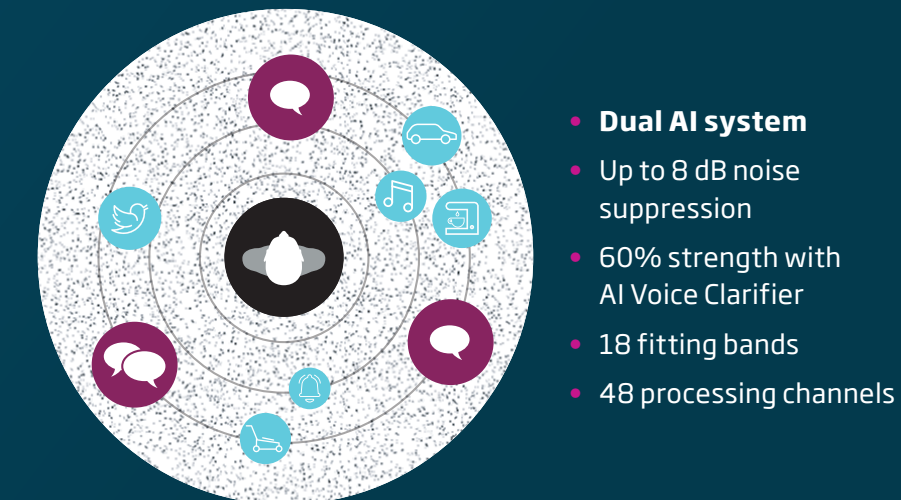

All technology levels of Oticon Reveal are equipped with:

- **Dual AI system**
- Proactive Feedback Management
- Telecoil
- Rechargeability
- Tinnitus SoundSupport™
- CROS RE Compatibility
- Bluetooth® LE Audio
- Auracast broadcast**
- IP68 Certified

LEGEND

LEVEL 3

The level of noise suppression and contrast varies based on technology level. Oticon Reveal 1 offers the highest level of noise suppression and the best balance between speech and noise.
