

IMPORTANT:

To help keep your ladder operating at its best and to maintain longevity, please keep the following **RECOMMENDATIONS** in mind:

- ☑ Be sure to inspect the bolts, arms and nylon strapping/buckle annually.
- ☑ The bolts should not be over-tightened.
- ☑ Hand-tighten only; do not use power tools as they will cause the hardware to heat up and break when tightened at high speeds as with an impact wrench.
- ☑ If your ladder does not fold up tightly after adjusting bolts, please loosen associated bolts by ¼ turn.
- ☑ Fingers can be pinched. Take care using to avoid injury.
- ☑ While our ladders do come with nylon strapping for folding your ladder, please take care to assure it is securely in place to avoid personal damage or injury.
- ☑ Occasionally, added security methods may be needed. This is at the discretion of the buyer/boat owner. No one knows your boat or boating habits better than you!
- ☑ To detour theft, we have also recommended small padlocks to be used to hold the ladder
