

# bijoux bizarres

mythical jewellery  
for real people

**'bijoux bizarres' draws inspiration from mythology, history & tradition, elaborating on heritage design patterns and combining them with modern forms~**

our heroines are extraordinary women living in an ordinary world~  
their stories are full of love, strength, pride and sometimes vanity & drama, which are the main attributes of the mediterranean soul~

our mission is to create  
mythical jewellery for real people

'bijoux bizarres' are crafted in limited copies using gold-plated & rhodium-plated silver, semi-precious stones, embroidery & plexi~  
model pieces are made with the ancient technique of repoussée on pitch, which requires several hours of Hand-hammering making them perfectly imperfect~

**'bijoux bizarres' collections consist of jewellery for every occasion from day to night~  
impressive earrings, long necklaces & large rings are only some of bijoux bizarres propositions, while large brooches, charm bracelets & headpieces give the final touch for a 'one of a kind' style~**
