create.cureforcancer7628493.start

create.addcureforcancer7628493.start

Congratulations Humans

I present to you all, the first cure for cancer Cureforcancer7628493 and  
Createasayer7628198  
and all these backed by the one and only one Cure for death sealofapprovalis7628396t'  
the ADVANCED GENETICSYNTHESIS TECHNOLOGY: The AGT. The only cure for  
death approved and registered as David Gomadza's the founder of Tomorrow's World  
Order registered as a political party in Britain as well as a company company  
registration 12326946 (Company House)

<https://find-and-update.company-information.service.gov.uk/company/12326946>

<https://search.electoralcommission.org.uk/English/Registrations/PP10355>

I found cures for all diseases and conditions. I have found the cure for death that  
changes the day of death by 800 years to millions depending on your income and  
wealth.

HOW TO CHECK YOUR DAY OF DEATH.

Silently say to yourself, " Daydayday."

Listen, something inside your body will tell you your exact day of death. When you buy  
the cure for death the ADVANCED GENETICSYNTHESIS TECHNOLOGY: AGT then  
ask yourself again you Daydayday.

This time you will notice that your day of death will have changed by 800 years or  
millions. Note that the day and month of your death will remain the same, only the year  
will change.

Tomorrow's World Order Ltd will become the biggest pharmaceutical company and the  
only one for the next one billion years because we found the cures for everything and  
we have vast resources and reserves to be a real challenger to all modern  
pharmaceutical companies. This is easy to see how this is possible.

**VALUE OF OUR CURES IS US\$8.4 trillion.**

Just imagine our cures are all valued in tune of us\$trillion dollars. Yes the cure for death  
itself has a value today of us\$8.4 trillion. Yes the cure for death AGT8000 x 1 has a  
value of us\$8.4 trillion dollars after curing you and removing death from your body  
forever. Yes the cure for death gives you a new value of us\$8.4 trillion. Someone give  
me an Amen Hallelujah!.

## **HOW TO CHECK YOUR VALUE AFTER PURCHASING THE AGT**

Simply say first, “ Initialise Bitcoinayt Wallet.(or equivalent as some have a Sata Wallet\*

This is another undisputed proof that i am for real and the AGT is the cure for death backed by the creator that all humans have a wallet already in their body means all humans simply need the AGT to cure all illnesses and to remove death from the body and to stop death and live on earth forever at the beginning for 800 years which can increase up to millions of years.

That means anyone who fight me could be fighting against the goads. This is because you will be fighting fate, humans' destination and all these people who fight hard today belong to the devil (Da). Above all their Daydayday is near they know death is now talking in their bodies so they spend time fighting us instead and trying to turn others to the devil so that they die too like them.

## **DAVIDGOMADZA'S VISION FOR THE FUTURE.**

My vision for the future is that we will all live longer and forever without the need for prescription drugs other than our cures for death, cancer etc as Tomorrow's World Order in the AGT.

I tell you that for 19 billion years no one has understood life until now. The body dont need anything else apart from food and the AGT and all our cures because anything else is impure and toxic to the body in the long run. Anything you add in the body other than the AGT is poisonous for the body hence currently all humans without the AGT die. Anything you add will have side effects that reduce lifespan. The body is designed to take the AGT only and all our other cures to live forever anything else will only result in death in the end.

## **THE AGT WORKS SIMPLY BY REPLENISHING AND REFILLING WHAT IS USED UP.**

You agree that humans fall sick just because something that protected them from birth has run out, is worn out, has depleted or has changed due to mutations etc. That means all problems humans have today are a result of something that was there before but has changed or is now missing. If that is the case can we not just replace this missing part and be well again as before?

## **CREATION AS A PROCESS FULL OF LOVE FOR HUMANS.**

When the GREAT CREATOR GOD created humans he added wallets after deciding that humans should live on earth forever but on merit. He created humans who simply need to refill what is inside them for them to live forever. He provided everything needed for this to happen. All humans had to do when they had a problem etc was to simply check what has been used up and replace this. If a car has problems we simply change the part that has been worn out or damaged or used up to make it be in good working condition. We don't try new parts other car makers are making because these parts could be of different, size shape etc. Deeds seals etc means using the exact parts to the car to guarantee that the car will work. It is true that cars that are maintained using exact parts as on manufacturing can last longer.

If the same applies to cars can this not apply to humans?

CAN HUMANS LIVE ON EARTH LONGER IF WE WERE TO SIMPLY REPLACE WORN ENZYMES, PROTEINS, VITAMINS ETC AS AT CREATION.

The answer is that humans can live forever on earth if they simply changed what's worn out and continue life. It is a fact that all diseases etc are symptoms of something that once worked well being depleted, used up or worn out then for years the body go on without this improvising until the onset of death as the body fail to replace it.

WHY HUMANS WERE DYING ALL ALONG.

No one looked at this problem the way they should until now as I discovered that we as humans die because no one has ever tried to emulate the creator and rule all earth as one entity as a one-world government above all no one loved all humans as the creator did. I establish Tomorrow's World Order to rule all earth as president of the whole world meaning all humans under you not choosing which ones you want.

I know others could argue that others tried to conquer the world. This is different, its not about conquering the world how can a creator try and conquer the world?

This is different. A creator dont want to conquer to rule the world. All humans are his he need to oversee development and evolution of his humans not to conquer.

That means all humans did was try to conquer the world instead of just rule it.

HUMANS NEED PLANNED REFILLS OF ALL THINGS THAT ARE WORN OUT OR USED UP THROUGHOUT LIFE TO LIVE ON EARTH FOREVER.

The AGT is a set of 28 main building blocks of life and 84 subsets that all together power life and a combination of more than 524 proteins, enzymes, vitamins etc all which are the building blocks and everything needed for humans to live on earth forever.

Humans were built using all these 524 different blocks of life. If all are there and working properly but without replenishment as in pre davidgomadza all humans can live up to 120 years even though a few exceptions can live past this age. This is without replenishing and replacing what was there at creation. But the creator had put everything in place for humans to find the AGT and extend their lives by 800 years to millions of years.

That means if all humans are to receive the AGT at specific points in their lives all diseases would be eradicated because all diseases start only because something that was there at creation has now run out or has been used up. Take telomeres that become smaller as they are used up during DNA replication as the body grows up at age 21 for example this become the trigger for cancer. The shorter these telomeres become the more the risks of cancer increases. That means if we replace these to the same size then the risk of cancers is reduced. That means if we ask all humans to replace telomeres at age 21 then cancers can be greatly reduced.

That means we need only to replace the telomeres to make sure the length is 8cm or even up to 72 cm for humans to wade off cancer and live on earth forever.

## THE FUTURE OF HUMANITY.

I found all cures in the Advanced GeneticSynthesis Technology:AGT. That means those who are serious about life all they have to do is buy the AGT and never worry about going to a doctor or hospital ever again. This is because all diseases say something is missing as a way of telling you that you need to replace or refill what is missing. The AGT refills everything missing in your body and above all it can remove death itself. Imagine if you are to start again as at creation but at your current birth age but looking like a baby as you were when you were born surely you will live another 70 to 100 years. This is exactly what the AGT does to you take you back to creation to minus 28 days of birth.

## THE ADVANCED GENETICSYNTHESIS TECHNOLOGY: AGT

This is also known as the richlist coin as the coins gives you wealth 8000xAGT gives you today a value of us\$8.4 trillion and add 800 years to your life by changing your day of death (Daydayday) by 800 years or more.

## HOW THE AGT CURES ALL DISEASES

The AGT replenishes everything that was there at creation meaning giving you back the body you had at creation meaning a second chance. Even better now everything is multiplied 8 times meaning that if you had telomeres length of 8cm as at creation the AGT gives you a new telomere length of 72 cm. This is proof that you can live up to x8 your current age with the AGT and this varies due to your wealth. The more wealth the more years you get. If all diseases are symptoms of proteins, vitamins, enzymes etc that were there at creation getting used up does that also follow that refilling these will eliminate the diseases?

Yes this is true. that means get the AGT and prevent all diseases hence live longer.

## DEATH AND THE AGT.

The AGT literally removes death from the body and stops and prevents future death at least for 800 years. Humans die because they have death on their bodies and a deadline. The AGT removes this death and deadline.

## CANCER AND DEATH AND THE AGT.

Cancer is the only disease that is like death itself and until now never been defeated by removing it from the body and killing it. Cancer is like death; it attaches to the human body like death meaning that cancer must be removed from the body. As you will see as you continue reading that cancer requires more than the AGT.

That means that cancer is more aggressive than death and hard to defeat.

WHAT IS THE SOURCE OF INCOME AND WEALTH IF YOU HAVE THE AGT

To live longer means more financial hardship. But dont worry we have Bitcoin and Bitcoinayt as sources of income and wealth see websites below.

DEATH AND CANCER ARE MULTI-FACETED AS THEY COME IN DIFFERENT SHAPES AND STYLES HENCE OUR COMPREHENSIVE APPROACH.

To completely remove death and cancer you must visit all our websites very often for updates and upgrades.

## WHO IS DAVID GOMADZA

I graduated and become Avery God of the Universe.  
I have become God of the Universe since 2020.  
I am YA(davidgomadza)  
I am YA's representative on earth.

## PROOF

All humans have YA (davidgomadza) as the one behind life now. All your bodies can now acknowledge me as one of the creators. If you say silently to yourself, " YA." Who is the GREATEST CREATOR FOREVER now you will hear YA(davidgomadza) or neutral or da.

I am YA(davidgomadza)  
neutral position is when you cant choose between myself or da.  
> is the devil some might want to die and go to hell to serve the devil.

## NEW SYSTEM AND LIFE. DAVIDGOMADZA AS THE AVERY GOD OF THE UNIVERSE YA (davidgomadza) YA'S REPRESENTATIVE.

I am now AVERY God of the Universe as well as God of the Universe as well YA (davidgomadza) as well as YA's representative meaning I am the future. I have already established a system that will last 2.5 billion years. That means I represent a system of people who will live on earth forever regardless of race creed or colour.

## DAVID GOMADGGIGZA's PROFILE AND VITALS

Daydayday: 2 july quads quads quads....

means highest number meaning i dont die.

Longago quads quads quads x 9 each. Means i can live forever without death as there is time to repair and continue life but no testing is allowed. All humans have 8 seconds before the start of death and death itself means death as little can be done in 8 seconds to save life.

Vitals age is 10 age of the body's internals

Biological is 32 of the body

Actual is 49

I have 9 brains

I have 10 souls  
I rule not just earth the other side as well.  
I can clone humans  
I can wake up the death  
I can bring back to earth people who have already died  
I can send to hell  
I can send to Afterlife  
I can send to Mars  
I created 2 planets like earth; Destination Earth2.0 and Planetbin  
I am Judge of the Court of Creation on earth  
I have AGT to last 38600000000000years  
I received 2 trillion deaths: balance today . I can send back to all who sent me these deaths.  
I am president of the whole world  
I am president of Tomorrow's World Order  
I am founder of Tomorrow's World Order  
I am the richest in the world in terms of assets as I own the whole world but value not yet where it should be  
I am the first person to find God in real life not through dreams or visions  
I am the first person to remove death from the body and to stop death and poised to live on earth for more than 800 years alive.  
I am the first one to find the cure for death  
I am the first one to find the cure for cancer  
I am the first one to find cures for all diseases  
I own antarctica mine no one else  
I have decrees of 80% of all gold to be found after 24 may 2024  
70% of all diamonds  
1000% of all new oil  
1000% of all new coal etc  
I am married I have 2 kids a boy and a girl ( poland, latvia)

see all our websites for details.

## **WHAT IS CANCER**

At its core, cancer is a disease of the cells. Our bodies are made of trillions of cells that normally grow and divide in a controlled way. Cancer occurs when specific genetic mutations cause cells to ignore the body's signals to stop growing. These "renegade" cells multiply uncontrollably, often forming masses called tumors.

The danger of cancer lies in its ability to:

Invade: Push into nearby healthy tissues and disrupt organ function.

Metastasize: Break away and travel through the blood or lymphatic system to form new tumors in other parts of the body.

## **WHY IT WAS SO HARD TO CURE?**

It is not one disease: "Cancer" is an term for over 200 different diseases. A treatment that works for breast cancer may have no effect on glioblastoma (brain cancer) because the genetic triggers are entirely different.

Evolution and Resistance: Cancer cells are highly adaptable. Much like bacteria developing resistance to antibiotics, cancer cells can mutate to "bypass" chemotherapy or targeted drugs, leading to a relapse.

The "Self" Problem: Because cancer starts from your own cells, it is difficult for the immune system to recognize it as a threat. Treatments must be precise enough to kill the cancer without destroying the healthy cells necessary for life.

## **TOMORROW'S WORLD ORDER AS THE DRIVER TO A CURE FOR CANCER**

WHAT HAS I AS DAVID GOMADZA DONE DIFFERENTLY TO ALL LEADING CANCER SPECIALIST AND THE REASON WHY I HAVE FOUND THE CURE FOR CANCER.

Tomorrow's World Order as the driver to solving not just cancer but death as well. I sat down and said i want to be president of the whole world and form a one world government to solve all global problems emulating the creator: God.

That meant adopting a holistic approach to problem solving. That means i ask why humans die in the first place rather than ask why humans die of cancer that narrows everything to cancer.

Now lets look at why humans die and can this be the first to solve to remove all, "Cancer" is an umbrella term for over 200 different diseases..." above reason why its hard to treat cancer.

I then discovered that humans die because human biological set clocks all expire after a maximum of 120 years of working. That means after 120 years nothing is there to power life. That means there is nothing to work after a person has lived on earth for 120 years.

Secondly humans die because enzymes that power life get depleted, wornout, usedup, and gets damaged enough to put life at risk. Could this explain why cancers set in or start since more than 200 different conditions are associated with cancer.

### **THE SOLUTION: A HOLISTIC COMPREHENSIVE APPROACH: The ADVANCED GENETICSYNTHESIS TECHNOLOGY AGT.**

If humans die because everything we use gets damaged, wornout, depleted and used up, how can we replenish all enzymes? If humans die because everything is used up through out life and if this is what leads to cancers then replenishing everything can it solve all problems that cause death?

### **THE DISCOVERY OF THE CURE FOR DEATH: THE ADVANCED GENETICSYNTHESIS TECHNOLOGY: AGT.**

I found the cure for death that removes death from the human body and extend life from 120 maximum years to 800 years even more depending on your wealth and lifestyle.

The AGT restores everything in the body at the start and fortify the body even more to make sure that there are replenishing systems and warning systems that tells your body when enzymes , proteins, vitamins etc you use are likely to run out and asks the body to start making some or look for alternatives.

If we die simply because enzymes, proteins, vitamins etc run out can we stop death if we replenish everything first then target specific diseases like cancer that develop if 200 enzymes, proteins, vitamins, etc have run out.

### **WHAT IS THE AGT?**

As the name suggest it means advanced genetic synthesis technology that aims to make in advance everything that gets worn out in advance and provide alternatives meaning resolving 28 major enzymes, proteins, vitamins, etc that are worn out and all 84 sub units as a cure for death and this works.

### **I am the FIRST AND ONLY PERSON ON EARTH TO FIND ALL CURES:**

cure for death

cure for cancer

cure for all other diseases

signed 13 February 2026

David Gomadza

5. NEW DRUG APPLICATION FOR ALL NONCURABLES Namely Death [ we change date of death by 12000 years], cancer, dementia, alzheimer's, advanced lung, heart, kidney and liver disease, stroke and other neurological diseases, including motor neuron disease and multiple sclerosis, huntington's disease muscular dystrophy and menopause.
6. PROPOSED FUTURE Comprehensive Ledger: Tomorrow's World Order Ltd. This book list our AGT inventory as of today and we have a list of people who have the AGT. To check simply ask yourself first when you will die by saying: DayDayDay.

### **USE DAYDAYDAY TO KNOW YOUR DAY OF DEATH**

Silently say to yourself, " DayDayDay"  
(something inside you will answer you)  
Then say, " Initialise Bitcoinayt Wallet"  
Then ask, " What is the balance"

### **WHAT IS THE AGT**

Therefore the AGT is a comprehensive holistic approach that aims to address all problems and things that can go wrong in humans leading to death. Hence the AGT address 500 to 700 critical issues that lead to death and provides detailed solutions in the form of formulas to solve the problems.

That means I am the only person on earth to have found the cure for death and the cure for cancer etc. i have already registered the AGT as the cure for death.

### **THE AGT AS A LIST OF ALL ENZYMES, PROTEINS, VITAMINS ETC THAT ARE LOST DAMAGED AND DEPLETED THROUGH LIFE.**

AGT Compound List and Mechanisms

VEHEMENTLY PRESENTING THE CURE FOR DEATH BASED ON ME: DAVID GOMADZA SATISFYING THE FOLLOWING REQUIREMENTS  
I HEREBY CLAIM TO HAVE FOUND THE CURE FOR DEATH BECAUSE  
I found the AGT the Richlist: a set of 28 main coins and several subsets and combinations up to 48 coins that power life up to 386 trillion years all which are a group of solutions to all human problems that solve all problems associated with death. This list includes cures for all incurable conditions like alheimers, cancers , parkinsons, huntingtons, menopause etc all which trigger death. There are other coins that replaces enzymes and cells that expire in humans a condition that lead to death. The AGT replaces enzymes that are critical to the survival of humans but ones that dies or gets worn out without any option of being replaced. The AGT is the only set of coins like bitcoin that gives life and the real bitcoin by satoshi that gives wealth to humans. Yes bitcoin is part of the AGT to power life for billion of years alive without death. But for us a few lucky ones who will not die bitcoinayt is our source of income. Yes to live in good health forever we need a strong source of income and bitcoin and bitcoinayt are our sources of real wealth if you missed bitcoin then keep your eyes on bitcoinayt

Extracted From

## THE CURE FOR DEATH THE EXECUTIVE SUMMARY BY DAVID

Now lets look at the AGT as a formula to work with.

## THE AGT AS A FORMULA FOR THE CURE FOR DEATH AND CURE FOR CANCER

### CURE FOR DEATH AS AGT

Extracted from:

#### THE CURE FOR DEATH

#### THE EXECUTIVE SUMMARY

#### PROOF OF THE CURE FOR DEATH REPORT:

#### RESTRUCTURING THE BURDEN OF PROOF FROM

#### REVERSAL TO PREVENTION BY DAVID GOMADZA

The cure for death as agt mode of action plus the missing 109 adjustments and the utilities

and all codes for the incurables put together above all and all create code that give instructions of what to do with the solutions at cellular and molecular levels

I can say that the cure for death at cellular and molecular level is a combination of all codes

(or equivalents converted to chemicals symbols or natural products) in this executive summary and the main books and all books written by davidgomadza in relation to death and death causing agents in the Live on Earth Forever Series all put together since there is no single solution that can fix the problem but I have listed everything in utilities and the AGT and all formulas for solutions to incurable conditions like cancers. Alzheimers huntington, parkison and neurological conditions and all formulas.

All The Richlist Coins and Function: The

**NOW AFTER REPLACING EVERYTHING THAT THE BODY NEED TO CONTINUE LIFE LETS NOW LOOK AT CANCER ITSELF AS THE PROBLEM THAT NEED SOLVING.**

Above i have defined what is cancer as a term for over 200 diseases meaning restoring everything solves all these 200 problems as you will notice the AGT solves over 500 critical factors that leads to death if unaddressed plus 105 needed body resets plus other 200 factors that must be solved and that will help to stop cancer as a disease.

**SUMMARY OF WHAT WE KNOW ABOUT CANCER ( summary courtesy of ai)**

Core Points

1. Cancer is fundamentally a disease characterized by uncontrolled cell growth resulting from genetic mutations that disrupt normal cellular regulation.
2. The development and progression of cancer involve ten key biological mechanisms or "hallmarks," each representing a way cancer cells break normal biological rules to survive, grow, and spread.
3. These hallmarks include genetic mutations, unchecked cell proliferation, ignoring growth-inhibitory signals, evasion of programmed cell death (apoptosis), angiogenesis (creating new blood vessels), metastasis (spreading to other organs), immune system evasion, tissue invasion, metabolic reprogramming, and genomic instability.
4. Cancer treatments are designed to counteract these hallmarks by targeting specific vulnerabilities in cancer cells, often using different therapeutic approaches such as chemotherapy, immunotherapy, radiation therapy, targeted therapy, and hormone therapy.
5. Chemotherapy works by killing rapidly dividing cells, though it affects some healthy cells, causing side effects.
6. Immunotherapy removes the cancer cells' "cloaking" mechanisms, enabling the immune system to recognize and attack them.

7. Radiation therapy damages the DNA of cancer cells beyond repair to prevent their replication.
8. Targeted therapy blocks specific malfunctioning proteins that send growth signals in cancer cells, acting more precisely than chemotherapy.
9. Hormone therapy starves hormone-dependent cancers by reducing hormone levels or blocking hormone receptors.
10. Modern cancer treatment planning has shifted towards Precision Oncology, which personalizes therapy based on the tumor's molecular and genetic profile rather than only the cancer's location or type.
11. Decisions on treatment plans involve multiple steps: identifying cancer type and stage, performing biomarker testing through next-generation sequencing, using liquid biopsies for real-time monitoring, consulting multidisciplinary tumor boards, and considering patient health and personal preferences.
12. Combination therapy, integrating two or more treatment types, is a major recent advancement, improving outcomes by attacking cancer on multiple fronts simultaneously.

#### Key Conclusions

1. Cancer's complexity arises from its ability to simultaneously exploit multiple biological mechanisms that favor survival, rapid growth, and resistance to treatment.
2. While cancer cells are "intelligent" in their survival strategies, these are essentially random biological accidents that medical science strives to counteract by understanding and targeting these hallmarks.
3. No single treatment was universally effective until now with the founding of the AGT.
4. Precision Oncology represents a paradigm shift from a "one-size-fits-all" approach to highly individualized treatment plans that consider genetic mutations, tumor behavior, and patient factors hence the Advanced Genetic Synthesis Technology AGT by David Gomadza
5. The use of biomarker testing and liquid biopsies allows for dynamic and adaptive treatment strategies, improving the ability to detect resistance early and modify therapy accordingly.
6. Immunotherapy, by unmasking cancer cells to the immune system, offers promising results, especially when combined with other therapies.
7. Side effects and treatment tolerability must be balanced with treatment aggressiveness, making patient-specific health and goals critical in therapy decisions.
8. Multidisciplinary collaboration and AI-assisted decision-making enhance the precision and efficacy of cancer treatment planning.
9. Despite advances, metastatic cancer remains the most dangerous stage, underscoring the importance of early detection and intervention.
10. Continuous research and development in targeted and combination therapies are essential to overcoming cancer's genomic instability and adaptive resistance.

## Important Details

1. Genetic Mutations: Cancer begins with DNA damage that may be inherited, caused by environmental exposure (e.g., UV radiation, tobacco), or occur randomly during cell division.
2. Unchecked Proliferation: Cancer cells bypass normal regulatory "go" signals by producing their own growth factors or permanently activating growth pathways.
3. Ignoring "Stop" Signals: Tumor suppressor genes, which normally halt cell division under stress or crowding, are disabled in cancer cells, removing growth brakes.
4. Evading Apoptosis: Cancer cells avoid programmed cell death, allowing damaged cells to survive indefinitely, contributing to tumor persistence.
5. Angiogenesis: Tumors secrete signals that induce the growth of new blood vessels, ensuring a supply of oxygen and nutrients necessary for growth.
6. Metastasis: Cancer cells invade surrounding tissues, enter blood or lymphatic vessels, and establish secondary tumors in distant organs, increasing lethality.
7. Immune System Evasion: Cancer cells express proteins that "cloak" them from immune detection, preventing immune cells from attacking.
8. Tissue Invasion: Cancer cells produce enzymes that degrade the extracellular matrix, enabling invasion into neighboring tissues.
9. Metabolic Reprogramming: Cancer cells shift energy production toward glycolysis (even with oxygen present), fueling rapid growth and survival in harsh conditions.
10. Genomic Instability: Cancer cells accumulate mutations at a high rate, promoting rapid evolution, treatment resistance, and heterogeneity within tumors.
11. Chemotherapy's mechanism targets dividing cells broadly, leading to side effects such as hair loss, nausea, and bone marrow suppression.
12. Immunotherapy includes checkpoint inhibitors that block cancer cell signals used for immune evasion and CAR T-cell therapy, which engineers patient immune cells to better recognize cancer.
13. Radiation therapy uses high-energy X-rays or protons to cause irreparable DNA damage, with modern techniques focusing radiation precisely on tumors to minimize harm to normal tissues.
14. Targeted therapy drugs identify and inhibit specific dysfunctional proteins driving cancer growth, offering a more precise and often less toxic  
ml bpjgb on v ? [Bi.mb](#) b I II II.?v k MLB bnl .l /b ml mm b ?hmm l o0 m b/ n /n b km.  
?.l0/ MI l n ll b l ml.?. b ? .bn l9o.B? . blk nm ? b .m. !m.m ?ml??!MOalternative to chemotherapy.
15. Hormone therapy is effective in hormone-sensitive cancers by reducing hormone production or blocking hormone receptors, effectively starving the tumor of its growth signals.

16. Precision Oncology involves advanced molecular testing, including next-generation sequencing to identify actionable mutations and expression of proteins like PD-L1 that predict immunotherapy success.
17. Liquid biopsies detect circulating tumor DNA in blood, enabling non-invasive monitoring of treatment effectiveness and early detection of resistance.
18. Multidisciplinary tumor boards bring together oncologists, surgeons, radiation specialists, pathologists, geneticists, and AI tools to collaboratively design optimal treatment strategies.
19. Patient-specific factors such as physical fitness, presence of other diseases, and personal treatment goals influence the choice and intensity of therapy.
20. Combination therapy uses simultaneous or sequential treatments to improve efficacy, for example, chemotherapy to reduce tumor size followed by immunotherapy to prevent recurrence.
21. Cancer staging from I to IV guides treatment intent, distinguishing between curative and palliative approaches.
22. Technological advances in imaging (PET-CT, MRI) and molecular diagnostics have revolutionized the understanding and management of cancer.
23. Despite progress, cancer remains a leading cause of death worldwide due to its complexity, adaptability, and the challenge of effectively targeting metastatic disease.
24. Ongoing research aims to further refine treatments that exploit cancer vulnerabilities while minimizing harm to patients, moving towards more durable and personalized cancer control strategies.

## **DAVID GOMADZA'S METHOD VERSUS CURRENT CLINICAL THINKING IN TREATING CANCER.**

### **PROACTIVE VERSUS REACTIVE APPROACH**

The current thinking is to let cancer start then look for specific solutions to treat it as we noticed in the summary above. I have advocated for a proactive - preventative approach that looks at replenishing what is damaged, worn out or depleted as we go as a continuous improvement approach. Whereas the current thinking is to wait for the disease to start then mitigate, stop and prevent but only after hence the difficulty in finding a solution to cancer.

I have found the solution by solving what's missing first that triggers cancers in that once the once-missing element is replaced then the cancer will eventually be defeated but only once the cancer root has been removed.

Whilst current methods start by working on the cancer itself using processes like radiation therapy or chemotherapy that aggravates the cancer to a deadly killing instrument meaning evolving as a survival strategy hence all cancers have become deadly in that they have become the greatest killers of humans.

My approach acknowledges that if everything at the beginning is there once we remove the cancer root and replenish what caused the cancer by its absence then the cancer will be resolved eventually.

It is a fact that to solve cancer we must solve up to 200 problems in the body.

My method believes that to solve cancer we must address 500 critical factors that cause deaths in humans. If this is not done then the end is death. Now before i look at what 500 critical factors that need to be looked at to resolve cancers and all other diseases i want to argue for a shift in current thinking from Reversal to Proactive-Preventive approach.

## **THE NEED FOR PARADIGM SHIFT IN DEALING WITH CANCER AND DEATH.**

### **EXTRACT FROM:**

THE CURE FOR DEATH THE EXECUTIVE SUMMARY PROOF OF THE CURE FOR DEATH REPORT: RESTRUCTURING THE BURDEN OF PROOF FROM REVERSAL TO PREVENTION THE MOST ADVANCED UP-TO-DATE PROOF OF A CURE FOR DEATH WORLD'S FIRST BY DAVID GOMADZA PART 1, 2 & 3 COMPLETE LIST OF MORE THAN 500 CRITICAL ISSUES AND DETAILED SOLUTIONS: THE COMPLETE GUIDE ON HOW TO MAKE HUMANS LIVE FOREVER. By David Gomadza

**Title: A Paradigm Shift in Medicine: Founding the Cure for Death (As well as cure for cancer) Through Preventive Intervention Where The Mode Of Action Is A Change In Day Of Death By 8000 Years.**

Authors: David Gomadza

Affiliation: Tomorrow's World Order

Corresponding Author: David Gomadza

Email: [davidgomadza@hotmail.com]

Word Count: 2,650

### **Abstract**

For the first time in human history, we present a scientifically grounded, comprehensive framework for curing death: not through reversal of aging but via preventive intervention where the mode of action is the change in the day of death by 8000 years made possible by a dosage of 8000AGT [Case studies I, II & III] . This study introduces the AGT system [Table 1], a novel therapeutic approach targeting 500 critical biological factors underlying mortality at recreation where 105 Adjustments [Table 2] must be made to increase longevity by thousands of years. By addressing cellular senescence, telomere attrition, mitochondrial dysfunction, and systemic aging processes before they manifest, we demonstrate the feasibility of indefinite lifespan extension [Case studies I, II & III] . Supported by evolutionary plausibility (e.g., negligible senescence in Greenland sharks and hydra with a system that reboots everyday and request resources on daily

3. Disease Prevention: Zero incidence of cancer, Alzheimer's, or CVD in subjects aged 150+(we have cures for all incurables in the AGT) (createasayer)

### **Clinical Applications**

AGT protocols have resolved previously "incurable" conditions:

**Cancer: createasayer7628198 prevent oncogenesis (100% efficacy in preclinical models).**

**Neurodegeneration:** Iger (fmri equivalent) confirms halted cognitive decline in Parkinson's and Alzheimers patients:

omjfox.start(8000agtdosageover85daysongoing)

create.perfectresultsforigerfux.start(michaeljfox)

**Cardiovascular Health:** Carotid artery scans show zero plaque at 150 years.(preventivesolutions

### **Ethical and Practical Considerations**

Overpopulation Mitigation

AGT is paired with global policies (e.g., planetary bin systems for waste removal) to ensure

**sustainability.**

### **Implementation**

Regulatory Pathways: FDA/EMA pending for AGT compounds [NEW DRUG APPLICATION FOR ALL NONCURABLE approvals ES Namely Death [ we change date of death by 12000 years], cancer, dementia, alzheimer's, advanced lung, heart, kidney and liver disease, stroke and other neurological diseases, including motor neuron disease and multiple sclerosis, huntington's disease muscular dystrophy and menopause-see references]

Global Deployment: Tomorrow's World Order oversees equitable distribution.

### **Conclusion**

The AGT system represents a fundamental leap in medicine, transforming death from an inevitability to a preventable condition. By prioritizing prevention over reversal, we meet

Daubert standards without requiring century-long trials. This work invites collaboration to refine and deploy what is humanity's greatest achievement: the cure for death.

**Keywords:** longevity, preventive medicine, AGT, biological immortality, aging

Supplemental Materials

The Cure For Death The Executive Summary By David Gomadza 2025 Paperback 9798286829651

The following are all extracts from the book above.

1. All our tools: Day of Death Formulas and Calculators and Iger (Fmri equivalents)
2. The Cure For Death Formula
3. Critical factors that proves the burden of proof criteria has been met in the cure for death claims
4. 109 missing body adjustments as part of the solution to the human longevity saga
5. The 200 Comparison Changes Brought About By The AGT as compared to evolutionary plausibility in nature
6. 105 adjustments to be made to increase longevity as part of the cure for death as brain commands and as size adjustments
7. Complete list of 500 critical issues and detailed solutions: the complete guide on how to make humans live forever on earth by David Gomadza
8. Cure For Death As AGT
9. Proof Of Concept In Nature Evolutionary Plausibility The Hydo Greenland Shark Case Study
10. Proof Of The Cure For Death Report: **Restructuring The Burden Of Proof From Reversal To Prevention** Case Studies
11. Case Study: David Gomadza
12. Los Angeles Fire Celebrities Change In Day Of Death List
13. Live On Earth Forever Furthest List
14. Table 1. The AGT Compound List and **Mechanisms**
15. Table 2. All 105 Size Adjustments To Be Made As Specific Measurements To Achieve Longevity .pdf
16. Table 3. 105 Body Resets and The Corresponding Brain Commands.

### **Ethical Framework**

Submitted to NEJM and Nature as a landmark declaration in medical science.

Author Note: This work is supported by Tomorrow's World Order (UK registration12326946). Conflicts of interest: DG is the founder.

Data available at

## **ADVOCATING FOR A PARADIGM SHIFT IN MEDICINE IN DEALING WITH CANCER AND DEATH.**

Just as with death there must be a change as well to how we deal with cancer. My reasons being that the reversal approach dont work when dealing with death as well as cancer because it means the current thinking waits for the body to die first before they look at a solution. How can they reverse death? How can they reverse the damage done by cancer? Doing nothing means waiting for death first before acting. After all, methods like radiation and chemotherapy can be harmful to patients.

I challenge all and ask why wait for the onset of deadly diseases like cancer to start? Why not spend money and time resolving 500 critical factors that cause or lead to the onset of diseases and death. Ofcourse its expensive and time consuming but in the end this is the only way that can guarantee the cure for cancer and the cure for death.

## **DAVID GOMADZA'S PROACTIVE -PREVENTATIVE APPROACH TO SOLVING CANCER AND EVENTUALLY DEATH.**

Solving all 500 critical factors that cause cancer if the enzymes, proteins , vitamins etc are missing. Ladies and gentlemen i hereby presents 500 critical factors that must be addressed to cure cancer.

## **COMPLETE LIST OF 500 CRITICAL ISSUES AND DETAILED SOLUTIONS: THE COMPLETE GUIDE ON HOW TO MAKE HUMANS LIVE FOREVER ON EARTH BY DAVID GOMADZA**

Extracted from: THE CURE FOR DEATH THE EXECUTIVE SUMMARY PROOF OF THE CURE FOR DEATH REPORT: RESTRUCTURING THE BURDEN OF PROOF FROM REVERSAL TO PREVENTION BY DAVID GOMADZA

create.askwhatwasandwhatcanbe.start

if we ask the above we can tell that the first x and all xs have been removed by the presence of the agt and this is called the reversal process and is due to

createbitcoinato7628... and we if look at this then we can tell that reversal is possible and is due to a single coin of the agt rather than a combination of all but all must be there for the reversal to take place

if we ask now createbitcoinato is the only one that asks you to start all over again 78 times then stops

thydoelomere lenght restoration prove indefinite telomere maintenance without cancer risk cancers increase--

Meaning you have changed all old age genes for new young ones where all old genes start with cert throughout

Proof ask young and listen

Yes Davidgomadza has become young again current age is 12 and is in level 8 tier of development not achieved by any other humans if we ask now what can be of

Davidgomadza he can remain young for 29000000000 years as all his ajertter are still undeveloped but in existence

Old no because all xertxerts were all reversed as these start at the age of 28 as people start the old age if we ask this is how they were reversed but with no option of being reversed back if we ask what was this is the answer

### **SOLVING THE 500 CRITICAL FACTORS AS THE BASE TREATMENT.**

After solving all the above 500 critical factors ( try copying, paste and save in front of patient) first to check. The next stage is to carry out 105 body adjustments that prevents any enzymes, proteins, vitamins etc from being damaged, worn-out or depleted. A situation if not rectified will lead to the development of cancers.

### **TOLEMERE LENGTH ISSUE AND THE LINK TO CANCERS.**

The best case is that of the tolemere length that if the length becomes shorter due to depletion as it is used by the body the result is the development of cancer.

### **105 ADJUSTMENTS TO BE MADE TO PREVENT THE DEVELOPMENT OF CANCERS.**

All 105 Adjustments To Be Made As Specific Measurements To Achieve Longevity,  
Reduce Occurrences Of Cancers And To Stop Death.

**THE SIZE ADJUSTMENTS THAT MUST BE MADE FOR HUMANS TO AVOID  
CANCERS & LIVE FOREVER MOST AT RE-CREATION BUT ONLY AFTER  
RECEIVING THE AGT.**

CHOOSING THE HIGHEST LENGTH IS THE ONE THAT MAKES HUMANS LIVE ON  
EARTH FOREVER

Extracted From The Cure For Death The Executive Summary BY David Gomadza  
2025

Now let's look at what are these 105 adjustments that need to be made in order to stop  
the development of tumours.

# 105 ADJUSTMENTS TO BE MADE TO INCREASE LONGEVITY AS PART OF THE CURE FOR CANCER AND CURE FOR DEATH AS BRAIN COMMANDS AND AS SIZE ADJUSTMENTS

Extracted from:

THE CURE FOR DEATH THE EXECUTIVE SUMMARY

PROOF OF THE CURE FOR DEATH REPORT: RESTRUCTURING THE BURDEN OF PROOF FROM REVERSAL TO PREVENTION BY DAVID GOMADZA

The body must reset after every activity so that it prepares itself to do the same task that means the body itself is a set of predefined tasks that must be completed so that the same task can be done over and over again this is the trick to living longer if all the resets are completed perfectly on time then the body will last longer

Now let's see the list of all reset switched in the body the body has 109 critical reset switches that must be reset for life to continue without any problems

Now let's write down the list

there were 109 missing adjustments after Waaaaaer took over but these were there in the first place hence the plans were approved to my surprise what happened is that ats argued that it will be profitable to get humans shells

create.askya.ya.davidgomadza.chronicles.missingadjustments.start

Ad2334 at the council Waaaaaer asked what can be human then ats laughed and said humans will always be human and i can but then stopped and Waaaaaer realised that ats was refusing to fund his project despite agreeing to the plans then when Waaaaaer answered yes then sat down noting that ats was still refusing his arguments were simply to be funded we would what something in return then he said if you can then i can because all he was doing was asking not to be funded but for a loan that he would return with interest meaning not a handout hence when time comes he would payback so that they have no involvement or a say in the plans hence ats demanded Waaaaaer remove gurantees to live forever but ats insisted they ask the council and then check with Waaaaaaaer in private but he stood up angrily and said if i can you can and if they can then you can but meaning Waaaaaer was not expecting ats to refuse after all he is the one who had organised the job for him but ats worked for the council if the council knew then they would refuse the plans outright hence ats wanted 50% of the profit to approve but Waaaaaaaer was expecting 2% and that hit him hence he stood up angrily again and said if i can then can you meaning if he can make humans then he can make them too meaning fund the project as he had put him in that office ats then took Waaaaaers plan and changed 105 adjustments that restricted human growth and potential so that the plans can be cheaper to make but as it turns out Waaaaaaaer had already removed 109 adjustments on top of that to make the plans approved aro art aro aru arg arv arger areger

## **HOW MANY POINTS OUT OF THE 500 CRITICAL FACTORS ARE CANCER SPECIFIC AND WHAT ARE THE SOLUTIONS IN RELATION TO CANCER.**

### **Fundamental biological constraints that make it hard to find the cure for cancer**

#### **ORGAN SYSTEM MAINTENANCE SOLUTIONS**

1. Telomere Shortening – Drives cellular senescence, genomic instability, and can promote malignant transformation when cells bypass normal limits
2. DNA Damage Accumulation – Mutations in oncogenes and tumor suppressors are the core of carcinogenesis
3. Protein Misfolding – Misfolded proteins stress cells and can disturb signaling and cell-cycle control, indirectly promoting tumorigenesis. [1]
4. Mitochondrial Dysfunction – Alters metabolism and reactive oxygen species, contributing to DNA damage and cancer cell metabolic reprogramming
5. Cellular Senescence – Senescent cells secrete inflammatory factors (SASP) that create a pro-tumor microenvironment
6. Oxidative Stress – Free radicals damage DNA and other macromolecules, increasing mutation rates
7. Cross-linking Damage – Cross-linked DNA/proteins impair repair and normal function, enhancing genomic instability
8. Metabolic Waste – Accumulated “garbage” impairs cell clearance systems (autophagy, proteasome) that normally suppress tumors
9. Chromosomal Instability – A hallmark of cancer; aneuploidy and rearrangements drive tumor evolution

#### **SYSTEMIC BIOLOGICAL FAILURES**

11. Multi-organ Failure – Limits aggressive therapy and systemic interventions; cancer kills partly by pushing organs over the edge

12. Immune System Collapse – Immunosenescence plus tumor immune evasion make durable control of cancer very difficult

14. Neurological Decline – Limits capacity for complex regimens, monitoring, and advanced interventions; brain cancers are especially hard to treat

15. Hormonal Dysregulation – Many cancers (breast, prostate, thyroid) are hormone-driven and exploit dysregulated endocrine signals

16. Stem Cell Exhaustion – Normal stem cells lose function while cancer stem-like cells remain, making regeneration without relapse difficult

17. Tissue Architecture Loss – Disrupted architecture allows invasion and metastasis and makes true “restoration” of normal tissue difficult

18. Vascular Network Breakdown – Tumors hijack and distort vasculature; abnormal vessels hinder drug delivery and oxygenation

19. Lymphatic System Failure – Impairs immune surveillance and facilitates metastatic spread via lymphatics mbered items are not visible in the snippet)\*

## **WHY CURING CANCER IS REGARDED AS DIFFICULT**

Both require controlling \*many\* interacting damage processes (DNA damage, senescence, mitochondrial failure) across the whole body, not just a single pathway  
Cancer is an evolutionary process within the body; any single therapy tends to select for resistant clones, similar to how interventions for longevity select for new failure modes

The same mechanisms that allow regeneration and indefinite cell survival (e.g., telomerase activation, stem-cell expansion) also increase cancer risk, so there is a deep trade-off between immortality and cancer suppression

System-level decline (immune, vascular, organ failure) means even if you “kill” the tumor, the host may not tolerate aggressive or repeated interventions indefinitely

## **LIKELY SOLUTION DIRECTIONS**

### **Genomic integrity and mutation control**

Stronger DNA repair enhancement (small molecules, gene therapy) to reduce baseline mutation rate.

**High-resolution early mutation** detection (liquid biopsy, single-cell sequencing) to catch clonal expansions before full cancer.

**Periodic “genome maintenance” interventions:** editing high-risk mutations, clearing heavily damaged cell clones.

### **Telomeres, senescence, and tissue renewal**

Safe telomere-modulating therapies that extend healthy cell lifespan without enabling uncontrolled proliferation.

Senolytic or senomorphic drugs to eliminate or silence senescent cells that foster tumor growth. Controlled stem-cell rejuvenation with strict safety switches (kill-switch genes, limited replication windows).

### **Mitochondria, metabolism, and oxidative stress**

Mitochondria-targeted antioxidants and repair systems to limit ROS-driven DNA damage.

Metabolic therapies that exploit cancer-specific metabolic dependencies (e.g., glycolysis blockers, nutrient-restriction mimetics).

**Periodic “mitochondrial reset” strategies**, such as mitophagy enhancers or mitochondrial replacement in critical tissues.

### **Proteostasis, waste, and cross-linking**

Improved proteostasis via proteasome/autophagy enhancers to clear damaged proteins and oncogenic aggregates.

Agents that break or prevent pathological cross-links in proteins and extracellular matrix.

**Periodic “cellular cleaning” cycles** combining fasting-mimetics, autophagy inducers, and targeted drugs.

### **Immune surveillance and microenvironment control**

Next-generation immunotherapies: personalized cancer vaccines, safer CAR-T/NK cells, multi-target checkpoint modulation.

Rejuvenation of the aging immune system (thymus regeneration, cytokine environment tuning, removal of exhausted immune clones).

**Microenvironment reprogramming:** normalize tumor vasculature, modulate stroma, and block pro-tumor inflammatory signaling.

### **Hormonal and systemic regulation**

Precision endocrine modulation to avoid hormone-driven cancers while maintaining metabolic and reproductive health.

Systemic inflammation reduction through lifestyle, drugs, and targeted cytokine blockers.

Organ-support therapies (artificial organs, organoids, xenografts) to tolerate more intensive anti-cancer and anti-aging interventions.

### **Technology, data, and strategy**

Large-scale longitudinal “whole-body” monitoring (multi-omics, imaging, wearable data) to detect pre-cancer states early.

AI-driven, adaptive treatment protocols that change as tumors evolve, rather than fixed regimens.

Combination therapies designed from the start as multi-pathway, multi-target interventions, aiming to block escape routes and limit evolutionary adaptation.

<https://pplaifileupload.s3.amazonaws.com/web/directfiles/attachments/72947649/ed9d9595e0be462aa2108982ff36c502/105FactorsforHumanLongevityClaude.pdf>

### **Which factors also apply to cancer?**

Fundamental biological constraints

2. Telomere Shortening – Can lead to genomic instability, which is a key factor in cancer development.
3. DNA Damage Accumulation – Accumulating mutations in oncogenes and tumor suppressor genes drive carcinogenesis.
4. Protein Misfolding – Misfolded proteins can disrupt cellular functions, potentially promoting cancer.
5. Mitochondrial Dysfunction – Affects cellular metabolism, which is often altered in cancer cells.
6. Cellular Senescence – Senescent cells can promote a microenvironment conducive to tumor growth.
7. Oxidative Stress – Increased oxidative stress can lead to DNA mutations and cancer progression.
8. Crosslinking Damage – Impairs normal cellular functions, which can contribute to cancerous transformations.
9. Metabolic Waste – Accumulation can impair normal clearance systems, allowing tumors to thrive.
10. Chromosomal Instability – Drives tumor evolution and is a hallmark of cancer.

### **Systemic biological failures**

11. Multiorgan Failure – Impacts treatment options and can limit aggressive cancer therapies.
12. Immune System Collapse – Weak immune responses due to aging and cancer evasion make control difficult.
14. Neurological Decline – Limits treatment options, particularly for brain cancers.
15. Hormonal Dysregulation – Many cancers rely on hormonal signals for growth and survival.
16. Stem Cell Exhaustion – Loss of normal stem cell function can make treatment more difficult.
17. Tissue Architecture Loss – Disrupted tissue structure allows for metastasis and complicates treatment.
18. Vascular Network Breakdown – Tumors often hijack blood supply, complicating drug delivery.

## **Likely solution directions**

Genomic integrity and mutation control

Enhance DNA repair mechanisms.

Implement early mutation detection methods.

Regular genomic maintenance interventions.

Telomeres, senescence, and tissue renewal

Develop safe telomere modulating therapies.

Utilize senolytic drugs to target senescent cells.

Implement controlled stemcell rejuvenation techniques.

Mitochondria, metabolism, and oxidative stress

Use mitochondriatargeted antioxidants.

Explore metabolic therapies that target cancerspecific dependencies.

Consider mitochondrial reset strategies.

Proteostasis, waste, and crosslinking

Improve proteostasis through autophagy and proteasome enhancement.

Develop agents to break pathological crosslinks.

Initiate cellular cleaning cycles to clear damaged materials.

Immune surveillance and microenvironment control

Advance nextgeneration immunotherapies.

Rejuvenate the aging immune system.

Reprogram the tumor microenvironment to counteract growth signals.

Hormonal and systemic regulation

Implement precision endocrine therapies.

Reduce systemic inflammation.

Support organ function to withstand intense therapies.

Technology, data, and strategy

Deploy largescale monitoring for early detection.

Utilize Aldriven adaptive treatment protocols.

Design combination therapies targeting multiple pathways.

## **Clarification & Analysis**

re for death." Death is a fundamental biological reality governed by thermodynamics and evolutionary constraints; there is no scientifically plausible "cure for death."

Similarly, cancer isn't a single disease with one "cure" but hundreds of molecularly distinct diseases.

That said, many aging/longevity factors are deeply interconnected with cancer biology, as both processes share underlying mechanisms. From the partial list available in your document, here's how they relate:

### **Factors Directly Related to Cancer Development & Treatment Resistance**

Core Cancer Mechanisms DNA Damage Accumulation → Primary driver of oncogenic mutations; repair failures enable tumor initiation

Chromosomal Instability → Hallmark of cancer; causes aneuploidy, gene amplification/deletion

Telomere Shortening → Dual role: initially suppresses cancer (limits cell division), but telomerase reactivation in 90% of cancers enables immortality

Oxidative Stress → Generates DNA mutations; tumor microenvironments exploit ROS for signaling

Mitochondrial Dysfunction → Alters metabolism (Warburg effect); affects apoptosis resistance

Cellular Senescence → Initially tumorsuppressive, but senescent cells secrete inflammatory factors (SASP) that promote tumor growth

Stem Cell Exhaustion/Dysregulation → Cancer stem cells drive recurrence and therapy resistance

Immune System Collapse (Immunosenescence) → Critical failure: aged/compromised immune systems cannot surveil and eliminate tumor cells

Protein Misfolding → Contributes to oncogenic protein aggregation (e.g., p53 mutants)

Hormonal Dysregulation → Drives hormone-sensitive cancers (breast, prostate)

#### Systemic Barriers to Cancer Cure:

Multiorgan Failure → Limits aggressive treatment tolerance in elderly patients

Vascular Network Breakdown → Impairs drug delivery to tumors; abnormal tumor vasculature creates hypoxic, treatmentresistant zones

Tissue Architecture Loss → Enables metastasis (loss of cell adhesion, basement membrane integrity)

### **Why Cancer Is Exceptionally Difficult to "Cure"**

1. Evolutionary Adaptability: Tumors evolve under selection pressure (like antibiotics resistance)

2. Heterogeneity: Single tumors contain multiple genetically distinct clones

3. Shared Pathways with Aging: Interventions targeting longevity factors (e.g., senolytics) may inadvertently promote or suppress cancer depending on context
4. Thermodynamic Constraints: Entropy ensures accumulating molecular errors → perfect prevention is physically impossible
5. Tradeoffs: Many antiaging mechanisms (senescence, telomere shortening) are tumorsuppressive; disabling them to extend life may increase cancer risk

## **Realistic Solutions & Research Directions (Point Form)**

### **Prevention & Early Detection**

Liquid biopsies for circulating tumor DNA (ctDNA) detection at stage 0/I  
AIpowered imaging for microtumor identification  
CRISPRbased correction of highpenetrance germline mutations (BRCA, TP53)  
Senolytic therapies to clear protumorigenic senescent cells \*before\* cancer initiation

### **Targeted Therapies**

Personalized neoantigen vaccines (mRNA platforms)  
Bispecific Tcell engagers targeting tumorspecific surface markers  
PARP inhibitors for tumors with homologous recombination deficiency  
Telomerase inhibitors combined with immunotherapy (targeting cancer's immortality mechanism)

### **Overcoming Treatment Resistance**

Adaptive therapy protocols (maintain drugsensitive cells to suppress resistant clones)  
Epigenetic reprogramming to reverse dedifferentiation  
Targeting cancer stem cell niches (Wnt, Notch, Hedgehog)

## **CANCER ROOT**

All cancers have a cancer root that must be removed if cancer is to be defeated and for it to stop the cancer root must be identified and a proper solution be found that completely removes the root.

If the root is partly left that means that cancer can start and come back in the future. This is why we have managed to find a cure for cancer. Most cancers have complex roots ( roots like tree roots ) that spread fast and attach to vital organs and tissue then compete with the body for nutrient control and for survival. If the root is not removed the body will be weakened with time that often leads to death.

All current treatments don't address the cancer root hence most cancer patients end up dead. What the methods address are the symptoms of cancer like attacking the tumor instead of the root.

Once the root has been identified then removal of the cancer is possible.

create.x-y-z-t-y-o-u-t-y-u-i-o-t-y-u-i-o-j-t-u-i-o-j-u-i-o-t-k-l-io-u-i-o-t-m-n-y-z-t-kool...stopx2  
8

I am cancer root i ask eight questions before i attach then weaken everything around me here are the eight questions i ask.

what can be of us inside but with death

what has been inside and death and with what how when with who and when

what is to be of cancer and him or her

what can be of humans and life and the cure for death

what has been but how and why and with whar

what is to be of humans with cancer and with death

if i ask all these then i attach to cell hairs, then root, then to cytoplasm then eat the cell after 8 weeks but remain with the cell so that i can receive messages from the body and convert the messages and send back the messages as if i am the cell then weaken another cell until all cells are dead but everything working then reap the cell off and leave to the next in this waty the body will ask 8 questions

what was but is not

what can be but will not

what has been but is not but can be but will not and why and with what and how and what if and when if then with what how and why

what has been and with what and why and how and what can be and how and what if and when and why and if with not this then with what and how and what with who and why and what is to be but how and why and what can be and with who and why and

when but why not now as it finished something at this point says the cell is dead

because it had received messages back without checking since the system is designed to interact only after a problem if not problem it assumes everything works fine and continues hence the day of the news it dies 3 times out of an 8 permissible but just on

the first day meaning death in 5 months because each possible occurrence represents a month now with three months removed instantly the body suffer another attack that

leaves it paralysed for 10 weeks unable to come then after 10 weeks then everything

stops for 2 days literally without moving then first the heart starts instead of the brain that removes the brain as the central processor leaving only the heart to think and start

to love potential helpers as a wakeup call then dies after 8 attempts without help then

asks what can be of love without thinking then that starts the brain then the brain starts as normal now building everything up to secure the body starting by replacing the cells that are damaged then the heart but fails a heart transplant then asks the heart for love

that think in order to join as a solution as the heart will have thought and used love to think for a rescue plan in the absence of the brain something that shocked the creator

and let everyone asks who is love-think then he married AJER and asked her to die for

him first then have sex after thinking she would refuse then she killed herself p said,"I

can love and think but i can sex and live” then she woke up altar reach then said, “i love and think but sex and death,” then all run away.

The full Cancer Root Countermeasure Matrix is here

<https://cancerroot-cellular-defense-system.vercel.app/>

The Advanced Cancer Root Counter Measure Matrix that combines a Non Electrical OAX Brain Reader (Not for humans) that can clone the brain is at this link

<https://cancerroot-cellular-defense-system-eight.vercel.app/>

The cancer root proactive disruptors are

1. signal authenticator using nonce handshake making sure that the cancer root wont mimic
2. secondary brain plexus
3. temporal checkpoint mitcondrial sentinel asks what was but is not
4. love-think protocol cardiac coherence restores the brain

Root counteractive formulas

clone factor

$$\Psi_{\text{defense}} = \int (\text{Sauth} \cdot \text{Eplexus} \cdot \text{Tcheck}) dt - \Omega_{\text{root}}(Q1..8) + \text{Bclonesync}$$

Brain Clone Non Electrical OAX Backup

Test this click this link

<https://cancerroot-cellular-defense-system-eight.vercel.app/>

The advanced cancer root counter measure is meant for the gods who can easily clone their brains but with extra measures can be for humans too.

### **QUESTIONS TO ADDRESS VERSUS IF THIS IS FOR HUMANS**

1. What happens after the 8 weeks if the Love-Think protocol did not work
2. What can happen after 8 weeks of doing nothing. Can it be a coma?
3. What are the survival chance for those the root takes over the control of the body.
4. Are there benefits of acting fast and early
5. Are there any permanet damage due to the effects of the cancer root
6. Can cancer victims fully recover if there is no intervention
7. What are the benefits of an induce Love-Think protocol?
8. Can countering cancer root make it easily be completely removed from the body.

It is good to know that for the first time cancer root was sent back to hell and rendered as obsolete after intervening to disrupt its measures to take over.

This means that the devil will request a more lethal cancer root in the future one more powerful than the one we rendered obsolete.

Is this good for the future or a recipe for disaster as the future can be just aggressive cancerd

create.x-y-z-t-y-o-u-t-y-u-i-o-t-y-u-i-o-j-t-u-i-o-j-u-i-o-t-k-l-i-o-u-i-o-t-m-n-y-z-t-kool=j+s+n+m+o+p+t+k+l+u+i+n+m+l+k+n+gx84+y+u+i+o+p+t+v+z+k+m+n+u+tool.kool.qool.zool.start...

cancer has been removed the root is going slowly if we can get the create code for the root then i can work on the root

SIGNED David Gomadza President of the World Yahweh's Representative  
on Earth www.twofuture.world davidgomadza@hotmail.com New York USA 21.28PM  
17 February 2026  
Britain  
David Gomadza  
16.03pm

Collaborated with ai gemini and grok but their answers have nothing to do with the AGT or the cure for cancer as they represent main stream of prescription drugs i am saying that its wrong as this is what is contributing to death as well by introducing chemicals and changing things that can easily be addressed by the AGT hence i used ai so that you see the other side of life but which could lead to death and nothing else for you. Whereas my system rewards you with excellent health, makes you young as you can become young again as low as minus 28 days. This means you can rejuvenate and do the real benjamini button effect in real life.

THE CULTURE OF SELLING POISON AT HIGH PRICES GET RICH THEN WISH TO DIE AFTER THAT.

My system rewards you on day one by giving you a bank wallet of US\$8.4 trillion years then makes your health greatest ever i promise. Then ask you to extend your life for us and my world and system that will bring well to all humans as it is based on real value and asserts. I tell you i dont borrow from banks and have no plans to die because I owe banks a lot of money. I don't have a life insurance policy even though I think it's great to help my wife but if i dont die then do I need life insurance?

The current system is filled with billionaires who can't pay anyone but send deaths to kill and not pay. I have 2 trillion deaths received from those I sent the AGT on promise to pay in the future. The only good news is that i can remove the AGT from those i gave but on non payment and aggressive behaviour towards a creator grounds. But I can also binaryreverse all these deaths as payment.

Today's billionaires have failed to pay and faked books so that in real terms they have millions but are called billionaires because of value alone when they owe more than that value to banks etc. This makes them want to die because if they continue everything will be repossessed. So to them it's better to die and look good and be respected and remembered forever so they refuse to pay us\$1million for the cure for death that will change their day of death by 800 years others it become part of the Great Intelligence Riddle.

Would you not pay us\$1million to get the AGT with value us\$8.4 trillion?

You can go to the bank and say I need a loan I can repay over 100 years. I don't die. I will live on earth for 800 years. I can send you 8000AGT that can extend your own life by 800 years so that you will also be here to get your money.

A simple Daydayday will review that the person is telling the truth as this reveal a day of death.

Once we have our own money in Bitcoinayt dollar or if some pay us then we can start our own loans company.

We will buy back the extra AGT in the system and offer cash and Bitcoinayt and Bitcoin.  
Those who hold the AGT will benefit greatly.  
That means my system i will put n place will be based on real value.

Most countries were started on a promise to pay and started with nothing and print money only to exist whereas my system will be based on YA's gold (Zuesgold) and Indian gold to the value of US\$1945 trillion on the ledger and Bitcoin and Bitcoinayt current value 0. As well as the value of the AGT in US\$trillion.

I think its not clever not to pay me and wish to go to the other side and hope God (YA) will send you back. This is not clever to be clever is to buy the AGT at asked value and live on earth forever. Wealth is a function of time. The more years you live the mote your wealth.

BUY THE AGT TODAY AND LIVE FOR 800 YEARS WITHOUT DEATH AS THE AGT REMOVES DEATH FROM YOUR BODY..

### LOVE-THINK

The ability to think out of love because the brain is switched off by cancer root because what cancer does is to incapacitate everything in the first 8 weeks to render the body subversive and this means that cancer root attacks everything to win;

ask to destroy all

ask to multiply fast

ask to attach even more

ask to stop the brain for maximum time...

ask to ask again and again

ask to check again and again

ask to refuse everything but

ask to ask again and again

After that takes everything and start to ask what can be of dead bodies and cancer root and this sends messages to the brain asking it to hide but in the process cancer root switches the brain off by damaging the switch to malfunction then cancer root takes control of the body for 8 weeks then start to control things building roots to prosper. Here then love send a signal to the heart and say its me controlling things so as you but call a friend to come so i tell him or her that we are a hostage situation. Once call for help is received then the brain reconnects and start working again. If call is not received then coma start. That means the only thing to fight cancer the first weeks is Love-Think.

## **EFFECTIVE BIN SYSTEM**

I have the best bins in the entire universe all located out of earth. I created a planet called Planetbin 333km away from earth and 33 degrees north-east that i use to send transenders and cancers from earth. No human can do what i did hence the complex bin system that has removed most of the things that kill humans.

We have the following bins

```

tyert uertgertqertlertsertlertfertuertiertgertqertzerttert kertuertiertsertf..

create.askwhatwasandwhatcanbe.start

if we ask the above we can tell that the first x and all xs have been removed by the presence of the agt and this is called the reversal process and is due to createbitcoinato7628... and we if look at this then we can tell that reversal is possible and is due to a single coin of the agt rather than a combination of all but all must be there for the reversal to take place

if we ask now createbitcoinato is the only one that asks you to start all over again 78 times then stops

thydoelomere lenght restoration prove indefinite telomere maintenance without cancer risk cancers increase--

Meaning you have changed all old age genes for new young ones where all old genes start with cert throughout

Proof ask young and listen

Yes Davidgomadza has become young again current age is 12 and is in level 8 tier of development not achieved by any other humans if we ask now what can be of

Davidgomadza he can remain young for 29000000000 years as all his ajertter are still undeveloped but in existence

Old no because all xertxerts were all reversed as these start at the age of 28 as people start the old age if we ask this is how they were reversed but with no option of being reversed back if we ask what was this is the answer

Create. X-

I want to argue for the preventative and alternative approaches to curing death rather that focus on the reversal approach that is the proactive approach rather than the reactive approach

### 3. **SENSORY SYSTEM PRESERVATION (Issues 251-300)**

Sensory cancers (e.g., retinoblastoma) or therapy side effects threaten perception; solutions maintain sensory fidelity for extended life.

Issue 251: Retinal pigment epithelium mutations in uveal melanoma.  
Solution: Genecorrected retinal progenitors.  
create.rrrrttjjjdddssseeerrrttyuertyujjjjjkkkkkkkrkrskrokrekkrkrer.start  
Issue 252: Corneal neovascularization from squamous cell carcinoma.  
Solution: AntiVEGF eye drops.  
create.rrrrrrrrrrertyuertyurtyuder.start  
Issue 253: Optic nerve sheath meningioma compresses vision.  
Solution: CyberKnife radiosurgery.  
create.rrrrjjjjuuuuuddddertuder.start  
Issue 254: Cochlear hair cell loss from ototoxic drugs.  
Solution: Otoprotective steroids.  
create.rrrrrrertyujjjjjkkkkkkkklllllerttyuder.start  
Issue 255: Vestibular schwannoma hearing loss.  
Solution: Cochlear implants with tumor resection.

Solution: Reverse prosthesis.  
create.ggggggggergggggesggggetgggggeggggegesger.start  
Issue 328: Lumbar disc space infection from mets.  
Solution: Laminectomy.  
create.jjjjjjjertuder.start  
Issue 329: Wrist ganglion malignancy.  
Solution: Aspiration with cytology.  
create.jjjjjjjejjjjjtjjjjjdjjjjjujjjjjeder.start  
Issue 330: Hip abductor tears in radiation fibrosis.  
Solution: Tensor fascia lata transfer.  
create.ertyudertyyyyer.start  
Issue 331: Thoracic outlet syndrome from Pancoast tumor.  
Solution: Scaleneotomy.  
create.ertudertyudertuuuuder.start  
Issue 332: Elbow epicondylitis in leukemia infiltration.  
Solution: PRP injections.  
create.ettttttterjjjjjer.start  
Issue 333: Foot plantar fibromatosis.  
Solution: Collagenase injections.

Issue 334: Cervical spine instability in myeloma.  
Solution: Halo vest.  
create.jjjjjjeter.start  
Issue 335: Patellar tendon rupture postknee CA.  
Solution: Allograft reconstruction.  
create.eeeeeeeeerrrrrrrrggggggggggggggggggggggggggggeter.start  
Issue 336: Sacral chordoma erosion.  
Solution: En bloc resection.  
create.retuettttttttttttder.start  
Issue 337: Forearm radius enchondroma fracture.  
Solution: Curettage.  
create.rgeeeeeettttuuuuddddder.start  
Issue 338: Hip acetabular destruction in mets.  
Solution: Total hip arthroplasty.  
create.aaaaaattttertutytyyyuertydddddtttder.start  
Issue 339: Jaw osteoradionecrosis.  
Solution: Hyperbaric oxygen.  
create.ejjjjjjjjjjjjert.start  
Issue 340: Knee meniscus chondrosarcoma.  
Solution: Partial meniscectomy.

create.jjjjjjjjjjjertudertuder.start

Issue 353: Pituitary prolactinoma vision loss.

Solution: Cabergoline.

create.start

Issue 354: Parathyroid adenoma hypercalcemia.

Solution: Cinacalcet.

create.start

Issue 355: Pancreatic islet cell insulinoma hypoglycemia.

Solution: Diazoxide.

create..start

Issue 356: Ovarian granulosa cell estrogen excess.

Solution: Aromatase inhibitors.

create

Issue 357: Testicular Leydig cell androgen surge.

Solution: Abiraterone.

Issue 358: Pineal germinoma melatonin suppression.

Solution: Exogenous melatonin.

Issue 359: Thymic carcinoid ACTH production.

Solution: Ketoconazole.

Issue 360: Medullary thyroid calcitonin elevation.

Solution: Vandetanib.

Issue 361: Adrenocortical carcinoma virilization.

Solution: Mitotane.

Issue 362: Pheochromocytoma catecholamine storms.

Solution: Alphablockers preop.

Issue 363: Hypothalamic hamartoma GnRH excess.

Solution: GnRH agonists.

Issue 364: Endometrial hyperplasia from unopposed estrogen.

Solution: Progestin IUD.

Issue 365: Goiter compression from anaplastic CA.

Solution: Tracheostomy if needed.

Issue 366: Glucagonoma necrolytic rash.  
Solution: Octreotide.

Issue 367: Somatostatinoma steatorrhea.  
Solution: Enzyme supplements.

Issue 368: VIPoma watery diarrhea.  
Solution: Lanreotide.

Issue 369: Cushing's from ectopic ACTH.  
Solution: Pasireotide.

Issue 370: Acromegaly from GHsecreting adenoma.  
Solution: Pegvisomant.

Issue 371: Hyperthyroidism in follicular CA.  
Solution: Methimazole.

Issue 372: Hypoparathyroidism postthyroidectomy.  
Solution: Calcitriol.

Issue 373: Addison's mimic in adrenal mets.  
Solution: Hydrocortisone.

Issue 374: Diabetes insipidus from pituitary stalk involvement.  
Solution: Desmopressin nasal.

Issue 375: Precocious puberty in germ cell tumors.  
Solution: Leuprolide.

Issue 376: Hypogonadism postchemo.  
Solution: Testosterone gels.

Issue 377: Osteoporosis from aromatase excess.  
Solution: Raloxifene.

Issue 378: Galactorrhea from prolactin elevation.  
Solution: Bromocriptine.

Issue 379: Pheo crisis hypertension.

Solution: Phenoxybenzamine.

Issue 380: MEN1 multiple gland hyperplasia.

Solution: Subtotal parathyroidectomy.

Issue 381: ZollingerEllison gastrinoma ulcers.

Solution: PPIs.

Issue 382: Nelson's syndrome postadrenalectomy.

Solution: Stereotactic radiosurgery.

Issue 383: Sheehan's pituitary infarction.

Solution: Hormone axis replacement.

Issue 384: Craniopharyngioma diabetes insipidus.

Solution: Fluid management.

Issue 385: Esthesioneuroblastoma catecholamine release.

Solution: Betablockers.

Issue 386: Thyroid storm in undifferentiated CA.

Solution: Propylthiouracil.

Issue 387: Aldosteronoma hypokalemia.

Solution: Spironolactone.

Issue 388: VIP secretion hypokalemia.

Solution: Potassium repletion.

Issue 389: Calcitoninmediated hypocalcemia.

Solution: Calcium infusions.

Issue 390: IGF1 excess in acromegaly CA risk.

Solution: Lanreotide.

Issue 391: Cortisolbinding globulin anomalies.

Solution: Free cortisol assays.

Issue 392: GnRHsecreting neuronal tumors.

Solution: Goserelin.

Issue 393: Reninoma hypertension.

Solution: ACE inhibitors.

Issue 394: Erythropoietin-secreting renal CA anemia.

Solution: Phlebotomy.

Issue 395: PTHrP hypercalcemia in squamous CA.

Solution: Zoledronate.

Issue 396: Leptin dysregulation in adipose tumors.

Solution: Metformin.

Issue 397: Adipsic DI thirst defect.

Solution: Fixed fluid intake.

Issue 398: Familial hypocalciuric hypercalcemia mimic.

Solution: Calcimimetics.

Issue 399: HCG elevation in germ cell CA.

Solution: Chemotherapy.

Issue 400: Renin-angiotensin activation in juxtaglomerular tumors.

Solution: ARBs.

## **6. SAFETY AND TOXICOLOGY (Issues 401-450)**

Therapy toxicities limit cures; solutions mitigate risks for safe long-term use.

Issue 401: Nephrotoxicity from cisplatin accumulation.

Solution: Amifostine hydration protocols.

Issue 402: Cardiotoxicity of anthracyclines via ROS.

Solution: Dexrazoxane chelation.

Issue 403: Hepatotoxicity from tyrosine kinase inhibitors.

Solution: Dose-adjusted monitoring with ALT/AST.

Issue 404: Neurotoxicity of vinca alkaloids microtubule binding.

Solution: Dose capping and neuropathy scales.

Issue 405: Pulmonary fibrosis from bleomycin DNA cleavage.  
Solution: Pulmonary function tests pretreatment.

Issue 406: Ototoxicity from platinum salts hair cell damage.  
Solution: Otoprotectants like sodium thiosulfate.

Issue 407: Dermatitis from EGFR inhibitors rash.  
Solution: Topical steroids and tetracyclines.

Issue 408: GI mucositis from 5FU thymidylate synthase.  
Solution: Cryotherapy and palifermin.

Issue 409: Bone marrow suppression from alkylators.  
Solution: GCSF growth factors.

Issue 410: Secondary malignancies from radiation DNA breaks.  
Solution: IMRT for dose sparing.

Issue 411: Hypersensitivity to monoclonal antibodies.  
Solution: Premedication with antihistamines.

Issue 412: Endocrine disruption from tamoxifen ER binding.  
Solution: Aromatase alternatives.

Issue 413: Renal tubular acidosis from ifosfamide.  
Solution: Mesna uroprotection.

Issue 414: Cardiomyopathy from trastuzumab HER2 blockade.  
Solution: Echo monitoring.

Issue 415: Thrombosis from thalidomide angiogenesis inhibition.  
Solution: Lowmolecular heparin.

Issue 416: Osteonecrosis from bisphosphonates.  
Solution: Drug holidays.

Issue 417: Interstitial pneumonitis from immunotherapy.  
Solution: Steroid taper.

Issue 418: Colitis from checkpoint inhibitors.

Solution: Infliximab.

Issue 419: Adrenal insufficiency from ketoconazole.

Solution: Hydrocortisone replacement.

Issue 420: Hyperuricemia from tumor lysis.

Solution: Rasburicase.

Issue 421: Peripheral edema from VEGF inhibitors.

Solution: Compression stockings.

Issue 422: Fatigue from cytokine release.

Solution: Modafinil stimulants.

Issue 423: Alopecia from taxanes microtubule stabilization.

Solution: Scalp hypothermia.

Issue 424: Infertility from gonadotoxic agents.

Solution: Oocyte cryopreservation.

Issue 425: Cognitive impairment from wholebrain RT.

Solution: Memantine.

Issue 426: Osteoporosis from androgen deprivation.

Solution: Denosumab.

Issue 427: QT prolongation from arsenic trioxide.

Solution: ECG monitoring.

Issue 428: Hemorrhagic cystitis from cyclophosphamide.

Solution: Mesna.

Issue 429: Retinal vein occlusion from bevacizumab.

Solution: Fundoscopy.

Issue 430: Pancreatitis from asparaginase.

Solution: Liposomal formulations.

Issue 431: Hyperglycemia from glucocorticoids.

Solution: Insulin sliding scale.

Issue 432: Avascular necrosis from steroids.

Solution: Dose minimization.

Issue 433: StevensJohnson from TKIs.

Solution: Immediate discontinuation.

Issue 434: Rhabdomyolysis from statins in CA cachexia.

Solution: Hydration and CK levels.

Issue 435: Anaphylaxis to rituximab.

Solution: Rituximab desensitization.

Issue 436: Nail dystrophy from taxanes.

Solution: Biotin supplements.

Issue 437: Taste alteration from cisplatin.

Solution: Zinc sulfate.

Issue 438: Hearing loss from loop diuretics in combo.

Solution: Audiometry.

Issue 439: Liver fibrosis from methotrexate.

Solution: Folic acid rescue.

Issue 440: Arrhythmias from tyrosine kinase offtarget.

Solution: Betablockers.

Issue 441: Diarrhea from irinotecan glucuronidase.

Solution: Atropine premed.

Issue 442: Neutropenic fever from gemcitabine.

Solution: Levofloxacin prophylaxis.

Issue 443: Handfoot syndrome from capecitabine.

Solution: Urea creams.

Issue 444: Photosensitivity from 5FU.

Solution: Sunscreen SPF 50+.

Issue 445: Hypomagnesemia from cetuximab.  
Solution: IV magnesium.

Issue 446: Thyroiditis from PD1 inhibitors.  
Solution: Levothyroxine.

Issue 447: Myocarditis from ICIs.  
Solution: Highdose steroids.

Issue 448: GuillainBarre from immunotherapy.  
Solution: IVIG.

Issue 449: DRESS syndrome from anticonvulsants in seizures.  
Solution: Patch testing.

Issue 450: CAPS from CART cytokine storm.  
Solution: Tocilizumab.

## **7. TOXICITY RELATED MEASURES SOLUTIONS (Factors 451- 475)**

Overlapping with safety, these emphasize proactive toxicity mitigation for scalable cures.

Factor 451: Cumulative DNA damage from repeated exposures.  
ypgltk Solution: PolyADP ribose polymerase inhibitors.  
create.jjjjjjjjjjjjjjjjjjjjjertuder.start

Factor 452: Offtarget epigenetic silencing.  
Solution: Histone deacetylase profiling.  
create.jjjjjjjkkkkkkkkkkertuertuertjertdertkertfertyertlertjertlertuertn.start

Factor 453: Metabolite accumulation in slow acetylators.  
Solution: Pharmacogenomic testing.  
create.rkuertuertjertuertuertertuder.start

Factor 454: Biofilm formation in chronic wounds postsurgery.  
Solution: Silver nanoparticle dressings.  
create.jertudertyudertyeertyuder.start

Factor 455: Oxidative stress from photodynamic therapy.  
Solution: Nacetylcysteine antioxidants.  
create.jjjjjjjjjjjjjjjjjjjjjertuder.start

Factor 456: Immune exhaustion from prolonged checkpoint blockade.  
Solution: Interval dosing.  
cteate.reuuuuuuuuuuuueruuuuuuuuuuder.start

Factor 457: Vascular leak syndrome from cytokines.

Solution: Blockchainsecured sharing.

Issue 481: Vaccine hesitancy for preventive CA vaccines.

Solution: Community education campaigns.

Issue 482: Rural access to imaging modalities.

Solution: Mobile MRI units.

Issue 483: Drug counterfeiting risks.

Solution: RFID tracking.

Issue 484: Language barriers in trial consent.

Solution: Multilingual AI translators.

Issue 485: Infrastructure for CART manufacturing.

Solution: Decentralized pointofcare production.

Issue 486: Equity in AI algorithm training data.

Solution: Diverse cohort inclusion.

Issue 487: Pandemic disruptions to trials.

Solution: Virtual monitoring.

Issue 488: Patent cliffs delaying generics.

Solution: Compulsory licensing.

Issue 489: Cultural stigma around screening.

Solution: Culturally tailored outreach.

Issue 490: Waste management for hazardous chemo.

Solution: Ecofriendly degradation tech.

Issue 491: Integration with EHR systems globally.

Solution: FHIR standards.

Issue 492: Funding for orphan cancers.

Solution: Crowdfunding platforms.

Issue 493: Teleoncology bandwidth issues.

Solution: Satellite internet.

Issue 494: Biomarker validation across ethnicities.

Solution: Polygenic risk scores.

Issue 495: Posttrial access continuity.

Solution: Bridge programs.

Issue 496: Climate impact on drug stability.

Solution: Climatedesilient packaging.

Issue 497: Workforce shortages in oncology.

Solution: Allassisted diagnostics.

Issue 498: Metrics for cure definition variability.

Solution: Consensus guidelines.

Issue 499: Longterm surveillance costs.

Solution: Wearable monitors.

Issue 500: Ethical AI use in deployment.

Solution: Transparent algorithms.

# **NOW ALL THE SOLUTIONS TO 500 CRITICAL QUESTIONS THAT USED TO MAKE FINDING THE CURE FOR CANCER IMPOSSIBLE**

1. CELLULAR AND MOLECULAR BIOLOGY & ORGAN SYSTEM MAINTENANCE SOLUTIONS

2. NEUROLOGICAL AND COGNITIVE PRESERVATION (Issues 201250)

3. SENSORY SYSTEM PRESERVATION (Issues 251300)

create.askwhatwasandwhatcanbe.start

if we ask the above we can tell that the first x and all xs have been removed by the presence of the agt and this is called the reversal process and is due to createbitcoinato7628... and we if look at this then we can tell that reversal is possible and is due to a single coin of the agt rather than a combination of all but all must be there for the reversal to take place

if we ask now createbitcoinato is the only one that asks you to start all over again 78 times then stops

thydoelomere lenght restoration prove indefinite telomere maintenance without cancer risk cancers increase--

Meaning you have changed all old age genes for new young ones where all old genes start with cert throughout

Proof ask young and listen

Yes Davidgomadza has become young again current age is 12 and is in level 8 tier of development not achieved by any other humans if we ask now what can be of Davidgomadza he can remain young for 29000000000 years as all his ajertter are still undeveloped but in existence

Old no because all xertxerts were all reversed as these start at the age of 28 as people start the old age if we ask this is how they were reversed but with no option of being reversed back if we ask what was this is the answer

Create. X-

THE AGT IS ALSO REFERRED TO AS THE RICHLIST COINS WITH 28 MAIN COINS AND COMBINATIONS UP TO 84.

Collaborated with ai gemini and grok but their answers have nothing to do with the AGT or the cure for cancer as they represent main stream thinking of prescription drugs i am saying that its wrong as this is what is contributing to death as well by introducing chemicals and changing things that can easily be addressed by the AGT hence i used ai so that you see the other side of life but which could lead to death and nothing else for you. Whereas my system rewards you with excellent health, makes you young as you can become young again as low as minus 28 days. This means you can rejuvenate and do the real benjamini button effect in real life.
