

Bed Bug Pre-Treatment Preparation Sheet

In order for our company to provide the most effective service possible, we ask that before our arrival you review and complete all the following steps listed below. One of our company representatives will verify completion upon arrival. **If you fail to complete the following, it may result in rescheduling your treatment to a later day.**

Checklist:

- Take all clothing and other belongings out of all drawers, nightstands, tables, closets and wardrobes and similar storage areas and launder per directions at the end of this page. Ensure all garments are transported from the infested area in sealed bags or containers when transporting to the laundry facility to prevent the spread of the insects to non-infested areas. Discard plastic bags after use into an external garbage bin.
- Remove all bedding and pillows, place in bags and launder per laundry instructions. All bedding must be removed from bed for treatment. **PLEASE REMOVE ALL MANUFACTURING PLASTIC FROM THE MATTRESS AND BOX SPRING. PLEASE REMOVE DUST COVER FROM UNDER THE BOX SPRING. IF THESE ITEMS ARE NOT REMOVED THEY WILL BE REMOVED BY A SONS OF TUN PEST CONTROL REPRESENTATIVE!** If you want a cover for the mattress and box spring please purchase Bed Bug encasements to place on your bed after treatment is rendered.
- Please do not leave anything under beds as this area is an excellent place for bed bugs to hide, remove all items and bag them.
- Have all dresser drawers pulled out and stacked neatly on the floor.
- Eliminate clutter, cardboard boxes, shoe boxes, paperwork, mail, etc.
- Bag and secure any children's items and toys.
- Remove curtains in rooms, bag and launder per instructions.
- Remove outlet covers, light covers, cable covers etc. so that the void may be treated.
- Move items away from baseboards as we do need access to all baseboards for treatment. Allow plenty of room for furniture to be moved and treated.
- We **DO NOT** treat infant beds/cribs so please vacuum extensively and empty the bag directly to an outside garbage bin.
- Vacuum after treatment on a daily basis for about a week and empty the bag directly to an outside garbage bin.
- It is necessary for you and your pets to vacate the premises during the treatment and not to re-enter for 2 to 4 hours after treatment. Fish aquariums may be left on site, however, they must be covered and air filters must be disconnected. Birds must be removed from residence during treatment.

Laundry Directions: Launder all garments in the highest hot water setting possible and/or place in the dryer on the highest heat setting for a minimum of 60 minutes. All laundered items must remain bagged and sealed during the treatment.
