

HOUSTON
WELDERS SUPPLY

Forklift Cylinder Program

Exchange or On-Site Filling

Keep your employees **efficient and productive** by providing them with full forklift propane cylinders weekly that are exchanged or filled on-site. Additionally, store your light weight aluminum cylinders in a secure and properly labeled cage.

Benefit from aluminum cylinders that do not have the interior rust and scaling problems which is common to steel cylinders. Dislodged scaling can clog the injectors of the forklift which can increase maintenance costs.

Innovative Solutions To Grow Your Business
