

TEAM PD WITH ALL ACCESS RAMPS

Exploring The Excellent Ramp System

Our team recently had the opportunity to learn about **The Excellent Ramp System** by **All Access Ramps**—a modular, cost-effective alternative to bathroom remodels. This innovative system provides seamless access to a level shower base with a ramp, eliminating the need to step into the shower—perfect for use with a commode.

TEAM PD WITH ALL ACCESS RAMPS

Beyond the bathroom, the system can also be configured with front and rear access ramps, accommodating walkers, mobility aids, scooters, and wheelchairs—all **without the need for home modifications**.

Key Features:

- **No weight restrictions** - Strong enough to support a military tank!
- **Lightweight & easy to clean** - No heavy-duty rubber, mould build-up, or waterlogging.
- **Sustainable & safe** - Made from toxin-free, 100% PVC-free, fully recyclable materials.
- **Customisable for any space** - Built to Australian Standards to improve accessibility wherever needed.
- **3-year warranty** for peace of mind.

This Danish-designed product offers a practical and environmentally friendly solution for improved accessibility. A game-changer in inclusive design!

It was a fantastic hands-on workshop for the team! A huge thank you to Kelly for sharing her time, product knowledge, and for spoiling us with a snack box and a massage pillow for the office. We're feeling grateful for this learning opportunity!

Hands-On Learning with Access

All Access Ramps in-service education sessions typically last 20–30 minutes. They bring a constructed shower base insert and ramp so the team can experience the design firsthand. Additionally, they provide a brochure and a sample ramp piece for the team to use when recommending the system to clients. To support professional development, AAR also issues certificates of participation that can be used for PD credits.
