COMPETITIVE POSITION

The Ozzy Shepherd LLC is one of the very few US small businesses holding the complete concurrent stack of Type 01, Type 07, and Type 09 Federal Firearms Licenses with active NFA Class 3 SOT. Per ATF Firearms Commerce data, Type 09 (Dealer in Destructive Devices) is the smallest commercial FFL category nationally; most Type 09 licensees are large defence primes.¹ That credentialing depth qualifies us for restricted, NFA, and destructive-device line items most small-business competitors cannot bid, placing us at the front of consolidated multi-line weapons, NFA, and tactical-equipment tenders.

DEFENCE SUPPLIER PARTNERSHIPS

A credentialed US small-business channel for defence manufacturers, distributors, and primes seeking federal, military, and LE awards — plus authorised AU export pathways. We operate a **cross-commodity breadth model** — bidding across weapons, NFA, DD, ammunition, less-lethal, optics, and tactical lines under one entity — anchored in 25+ years of global supply-chain leadership that transfers directly to defence contracting. You supply the product; we carry the contracting risk.

- **Government references** — every award a verifiable federal/state reference for your line
- **3–7 year lifecycles** — forecastable reorder volume
- **Controlled-item access** — weapons/NFA/DD tenders single-FFL competitors can't bid

- **SB pass-through** — our set-aside status unlocks SB-reserved awards for primes to flow to
- **Teaming / subcontract-ready** — CAGE 14VG1; FAR/DFARS flow-down accepted
- **Programmatic bid cadence** — live register with probability-of-success index

Engagement: preferred-supplier agreements, Letters of Supply, teaming, prime-sub flow-downs, distribution authorisations, FMS pathways. **Ask:** pricing, stock, lead-time commitment on contracts where we fit.
