# Green Contracting Company

Building Trust with Quality Work

We get the job done!

## SIGN OF QUALITY RELIABILITY EFFICIENCY & EFFECTIVE CONTROL

# Welcome to GCC

GREEN CONTRACTING COMPANY (GCC) Establishment is based in Saudi Arabia, Dammam. City since 1999 and one of the leading and progressing General Contracting, Operation & maintenance, Trading, business company providing solutions to the customers to meet their production targets and in reduction of cost and downtime.

The consistent massive growth that GCC has attained clearly demonstrates the client's confidence in the company's ability to provide world class quality technical and management solutions through a combination of Process Excellence Work Quality, Safety Management and Services delivering innovations.

GCC is basically formed by Technocrats & Engineers, having Vast Experience in handling small to medium projects in the fields of Civil, Electro-Mechanical, Instrumentation & Electrical.

We provide General Contracting, Civil Works, Building Designing, Erection, Trading, include state-of-the-art technology to deliver high performance and customized engineering & automation solutions

We are looking for a Technically Strong and reliable company to jointly participate in many upcoming New Projects, Maintenance and Upgrade projects in Mechanical, Electrical & Instrumentation Controls fields and all business we do.

Our existing clients are example for our quality service and dedicated work; we are here to serve you with quality service and dedicated work.

Feel free to contact us to full fill your requirements.

# We are one of the Best in the Industry

## PROJECT CONSULTANCY SERVICES

We are aligned with engineers who see themselves as members of your team.

We are dedicated to undertaking your project using the latest tools and innovative solutions in the industry. As your project progresses, we will continually document each step of the process, communicate status to you in the manner and frequency of your choosing, and monitor all aspects of quality assurance.

We have the experience, the skills and the methods to bring your project to completion on time and on budget.

# Welcome to Management Statement

GCC, we believe that management is not just about managing things, but leading people. In today's complex business and Operation & maintenance environment, we need to call on the best talent, enthusiasm and experience to lead a project successfully from instigation to completion. Our management team is uniquely positioned to deliver this advantage to our clients while providing the in-house systems and programs to unlock this potential. We are continuing to hone a successful business model so that we are here to meet our clients needs both now and in the future. All activities of the overall management function that determine the quality policy, objectives, responsibilities and implement them by means such as quality planning, quality control, quality assurance and quality system. Management maintains the quality of company's products and services so as to meet customer's requirements, to ensure continuous quality of its operational activities and process within the framework of the quality system. Preparation of quality assurance procedures and work instructions to our clients covering defined work processes and activities pertaining to design, supply, installation, testing, commissioning and after sales services. We are

looking for a Technically Strong tallest to jointly participate in many upcoming New Projects, Maintenance and Upgrade projects, We are fully comply with the Kingdoms labor law especially in terms with the Saudization, Timely payment of Zakat (Tax) as well as GOSI, Medical Coverage and other benefits as per the labor law thereby our employees are enjoying a descent Salaries, timely payments, well maintained accommodations, Vacations, and all the other benefits as per the government instructions .We are employing multinationals and we are having our agencies around the globe to recruit the qualified employees and we always ensure their credentials and testimonials are original. Furthermore, all our employees are selected through the personnel interview only.

Managing Director  
Ahmed Al-Mashhad

# Project Management Services

We believe perfect planning and scheduling is a key of project management. Our project managers have extensive expertise to direct, support and coordinate all aspect of your engineering project irrespective of its size. Our project managers are proficient in overseeing and directing both internal companies support and third-party subcontractors to ensure that budget and schedule constraints are met. Our project managers are experienced to fully understand the complete scope of your project and direct it from initiation to completion. We follow the system with responsibilities from planning, execution and project close-out.

## Our Mission

GCC believes on long term business relationship, by providing the customer excellent service. Service after sales is our philosophy for the success.

We are people who make it our business to be like a good neighbor; who built a premier company by selling and keeping Promises through our marketing partnership; who bring diverse talents and experiences to our work.

## Our vision

For the future is to be the customer's first and best choice in the products and services we provide. We will continue to be the leader in the industry and we will become a leader in the

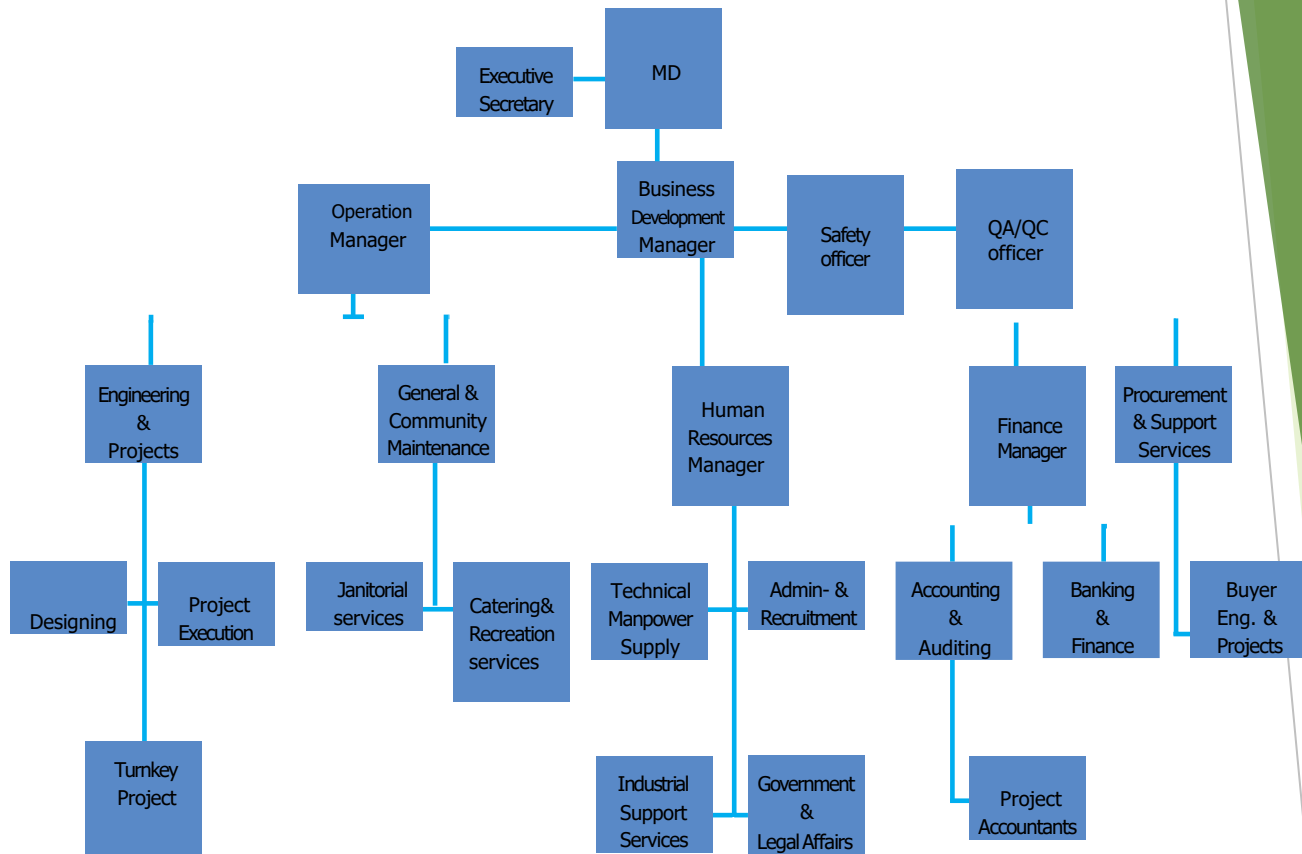

Industrial services arena. Our customers need will determine our path. Our values will guide us.

We are also vision to be one among the top companies in the region. The consistent massive growth that GCC Company a combination of Process Excellence Work Quality, Safety, Management.

## Our History

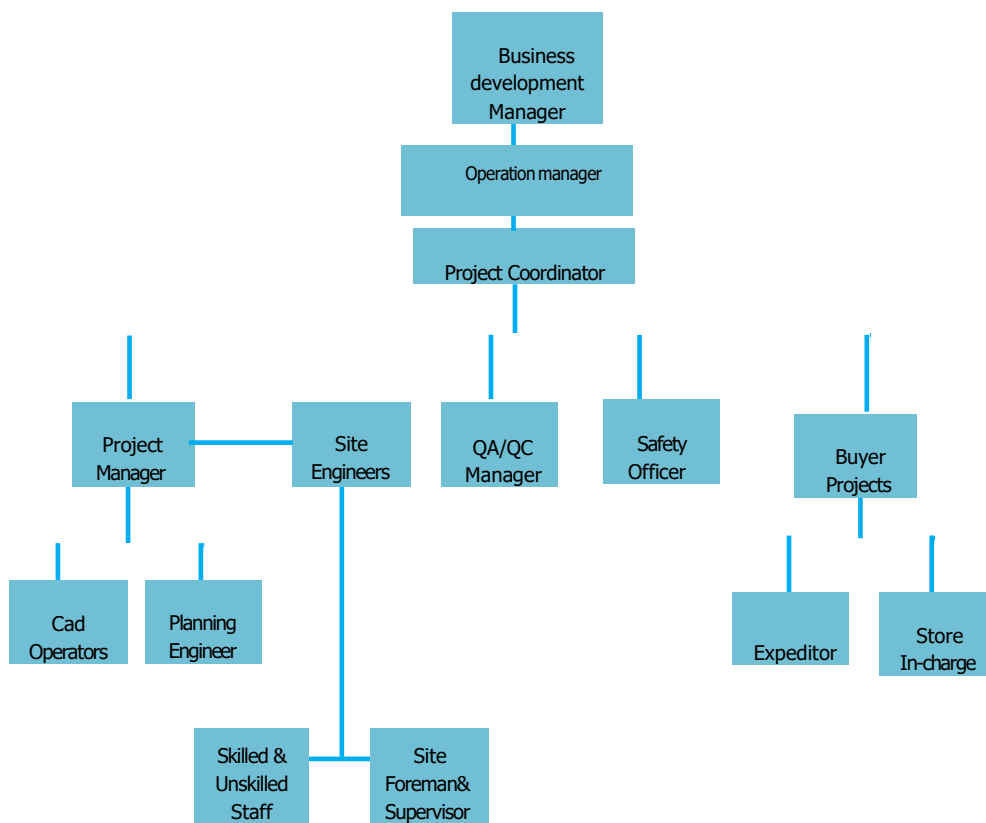

GCC is established in Saudi Arabia by administrators and engineers. It was their goal to establish the Operation and Maintenance business big enough to service Client's requirements, yet personal enough to understand clients' needs. GCC would be proud of what GCC has become and what we continue to be.

# Organization Chart

# Site Organizational Chart

GCC has in place a Quality Management System (QMS) which promotes “Quality” as a strategic imperative for our business based on the principle that; the QMS is a comprehensive and fundamental set of rules and beliefs for leading and operating the GCC organization, aimed at continually improving performance over the long-term by focusing on the needs and expectations of our customers while addressing the requirement of all the organization stake holders – owners, employees, supplier and environment.

The QMS at GCC operates at 5 levels of implementation which are illustrated below, enabling the organization to have comprehensive quality assurance system. The QMS at GCC provides a standard approach to the prevention of quality problems through planned and systematic activities: specification, review, monitoring, preventive action and documentation.

The Quality Policies Manual establishes requirements and guidelines for the overall QMS objectives at GCC. The Quality Procedures Manual is a collection of Standard Operating Procedures (SOPs) which are documented in conformance with, and support the Quality Policies Manuals requirements and guidelines. Work instructions, for specific performance of individual tasks, are documented as necessary to support each applicable quality procedure. Records provide the objective evidence of compliance.

<b>LEVEL I</b> <b>Company Policy</b> A documented Policy signed by GCC executive	<b>LEVEL II</b> <b>Quality Policies Manual</b> A manual that establishes requirements and guidelines for the overall Quality Management System objectives.	<b>LEVEL III</b> <b>Standard Operating Procedures</b> All the requirements and guidelines for specific operations that support the Quality Management System
<b>Level IV</b> <b>Work Instructions</b> The specific instructions for performance of individual tasks, Documented as necessary to clarify.	<b>Level V</b> <b>Records</b> A completed form or test result that provides the objective evidence of Quality Management System compliance.	

# Quality Management at GCC

Customer	Assure conformance to defined	Understand current and future customer needs
Focused Organization	customer requirements. Ensure effective response to customer feedback.	and expectations. Address customer loyalty. Measure customer satisfaction and act on it.
Leadership	Set and deploy policy and verifiable objectives, provide resources and establish an environment for Quality.	Establish vision, direction and shared values. Set challenging goals and implement strategies to achieve them. Coach, facilitate and empower people.
Involvement of staff	Establish competency levels, train and qualify personnel. Provide clear authority and responsibility.	Create personal ownership of the organizations goal, by using it's staff's knowledge and experience, and through education achieve involvement in operational decisions and process improvement.
Process Approach	Establish, control and maintain documented processes.	Explicitly identify internal/ external customers and suppliers of processes. Focus on use of resources in process activities, leading to effective use of people, equivalent, methods and materials.
System Approach-to Management	Establish and maintain a suitable and effective documented Quality Management System.	Identify a set of processes in the system. Understand their interdependencies. Align the processes with the organizations goals. Measure results against key objectives.
Continual Improvement	Through management review, internal / external audits and corrective / preventive actions, continually improve the effectiveness of the Quality Management System.	Set realistic and challenging improvement goals, provide resources and give staff the tools, opportunities and encouragement to contribute to continual improvement of processes.

---

Factual  
Approach-to  
Decision  
Making

Management decisions and actions on the Quality Management Systems are based on the analysis of factual data and information gained from reports on audits, corrective action, nonconforming products, customer complaints and other resources.

Decisions and actions are based on the analysis of data and information to maximize productivity and to minimize waste and rework. Effort is placed minimizing cost, improving performance and market share through the use of suitable tools and technology.

---

Mutually  
Beneficial  
Supplier  
Relationships

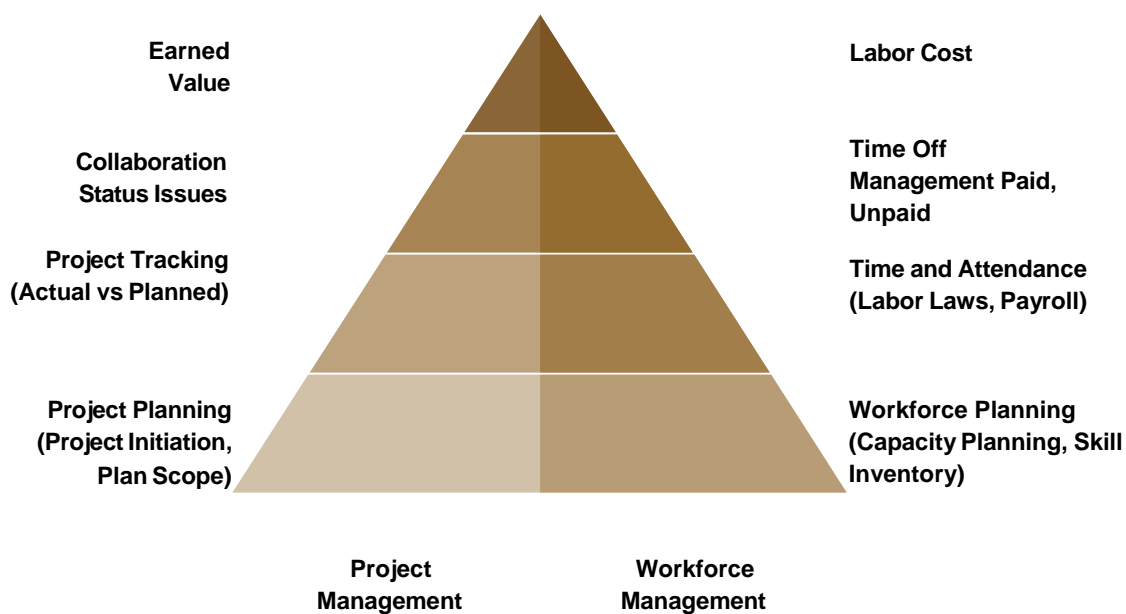

Adequately define and document requirements to be met by subcontractors and suppliers/vendors. Review and evaluate their performance to control the supply of quality products and services.

Establish strategic alliances or partnerships, ensuring early involvement and participation defining the requirements for joint development and improvement of products, processes and systems. Develop mutual trust, respect and commitment to customer satisfaction and continual improvement.

## Operation, Maintenance and Project Management

GCC can provide Facility management services phase services to the Project Owner in coordination with the Owner's Architect/Engineer to form the Facility management team.

## GCC Safety & Loss Prevention Plan (ASLP)

### INTRODUCTION

The purpose of this plan is to outline the Safety Organization and arrangements to be in place to enable the execution of works, under the project/contract, with due consideration of the Environment, Healthy, Safety and Welfare of all involved parties.

#### This will be achieved by:

- Maintaining a safe and healthy working environment.
- Preventing fatalities and lost time injuries both on and off the work sites.
- Preventing damage to equipment, facilities and potential effects on progress.
- Eliminating risk to the environment. Specific policies are implemented by

GCC. for client project/Contracts. The Safety plan meets the requirements of the contract between Client and GCC. All levels of GCC. are responsible to implement and enforce the provisions of this plan within their respective areas of accountability. This includes all subcontracted work also Inspections and audits will be performed to ensure compliance and data recorded to assess potential problem areas and progress.

### **SAFETY FUNCTIONS**

The safety and loss prevention function of the project organization is as follows:

- Health and Welfare
- Work Attire
- Transportation
- Fire Prevention/Protection
- First Aid
- Working Hours
- Work Permits

### **SITE ACTIVITIES**

GCC and client perform certain Activities and methods of work at the sites which have particular safety requirements imposed on them. The list of this is as follows:

- Personnel Certification
- Excavations
- Existing Electrical Hazards
- Formworks
- Welding & Cutting Operation
- Hand & Power Tools
- Site Planning & House Keeping\* Calibration

### **SAFETY ORIENTATION**

- Personnel Protective Equipment
- Fire Prevention & Protection
- Seek Safety Group on usage
- This plan is not a manual of rules and regulations. Safety policy requirements are clearly specified in Saudi Arab Government Laws and Client policies. This plan explains how the work must be done.

# Engineering & Projects Management Department

## Engineering Services:

Our Company GCC is dedicated to provide to its prestigious clients with the best possible high class engineering Design and pre-engineering services in a best possible economical cost to their projects using the skills of Our highly professional and skilled designers, ensuring and maintaining the quality and minimal future Maintenance cost of the projects. Our Scope of Services is:

- Detailed Design Engineering Services (Civil, Structural, Piping, Electrical, Instrumentation, and Process)
- Site Inspection and Site Preparations
- Preparation of All kinds of Engineering Paper Works (Scope of Works, Engineering Drawings, Estimation, QA/QC & Safety Standards.)
- Testing Commissioning and Trouble Shooting Services

## Our Mission

“Conversion Client’s Requirements in a Professional and Quality Oriented Design” &  
“Engineering Solutions with the Adaptability of Future Needs”

## Project Support & Execution Services:

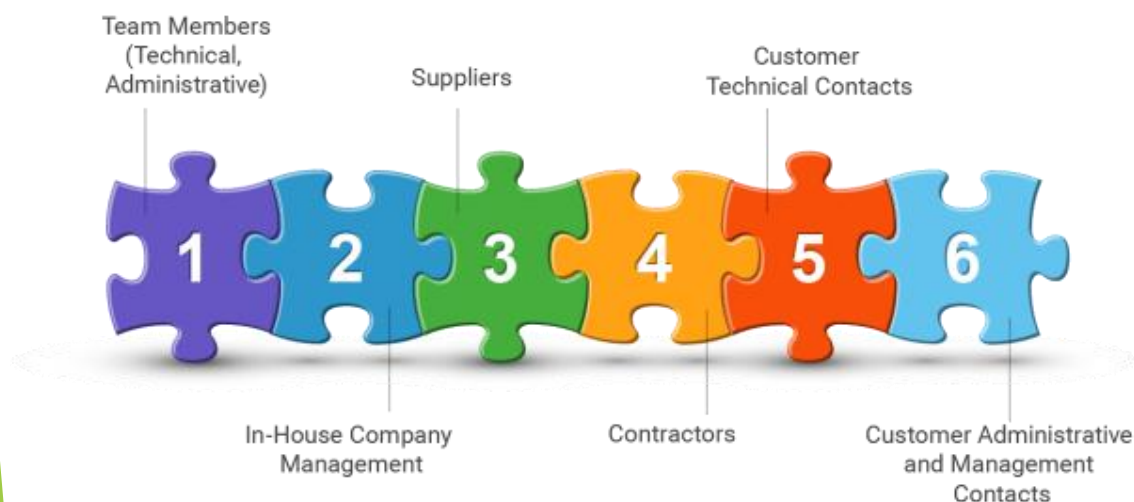

We have a highly professional & qualified group of people to perform all types of services and execute all types of projects under the management of our prestigious clients.

## Our Scope of Services is:

- Execution of All types of (Civil, Structural, Piping, Electrical, Instrumentation ...Etc.)

## Projects under the Client’s management.

- Execution of All types of projects even on the supply of manpower and temporary equipment only.
- Preparation of All types of Project Drawings, Shop Drawings and other project related documentation as per client’s instructions.

# Turn Key Project Management

## As a contractor

As an Independent Contractor we are offering Complete Turnkey Solution Services in following fields:

- Turnkey Short Form Projects Execution  
(Mechanical, Civil, Structural, Electrical, Instrumentation & HVAC ...Etc. )
- Turnkey Mid Form Projects Execution  
(Mechanical, Civil, Structural, Electrical, Instrumentation & HVAC .... Etc. )

Our project execution program has the following steps:

- Pre Award Project Management Activities.
- Post Award Project Management Activities.

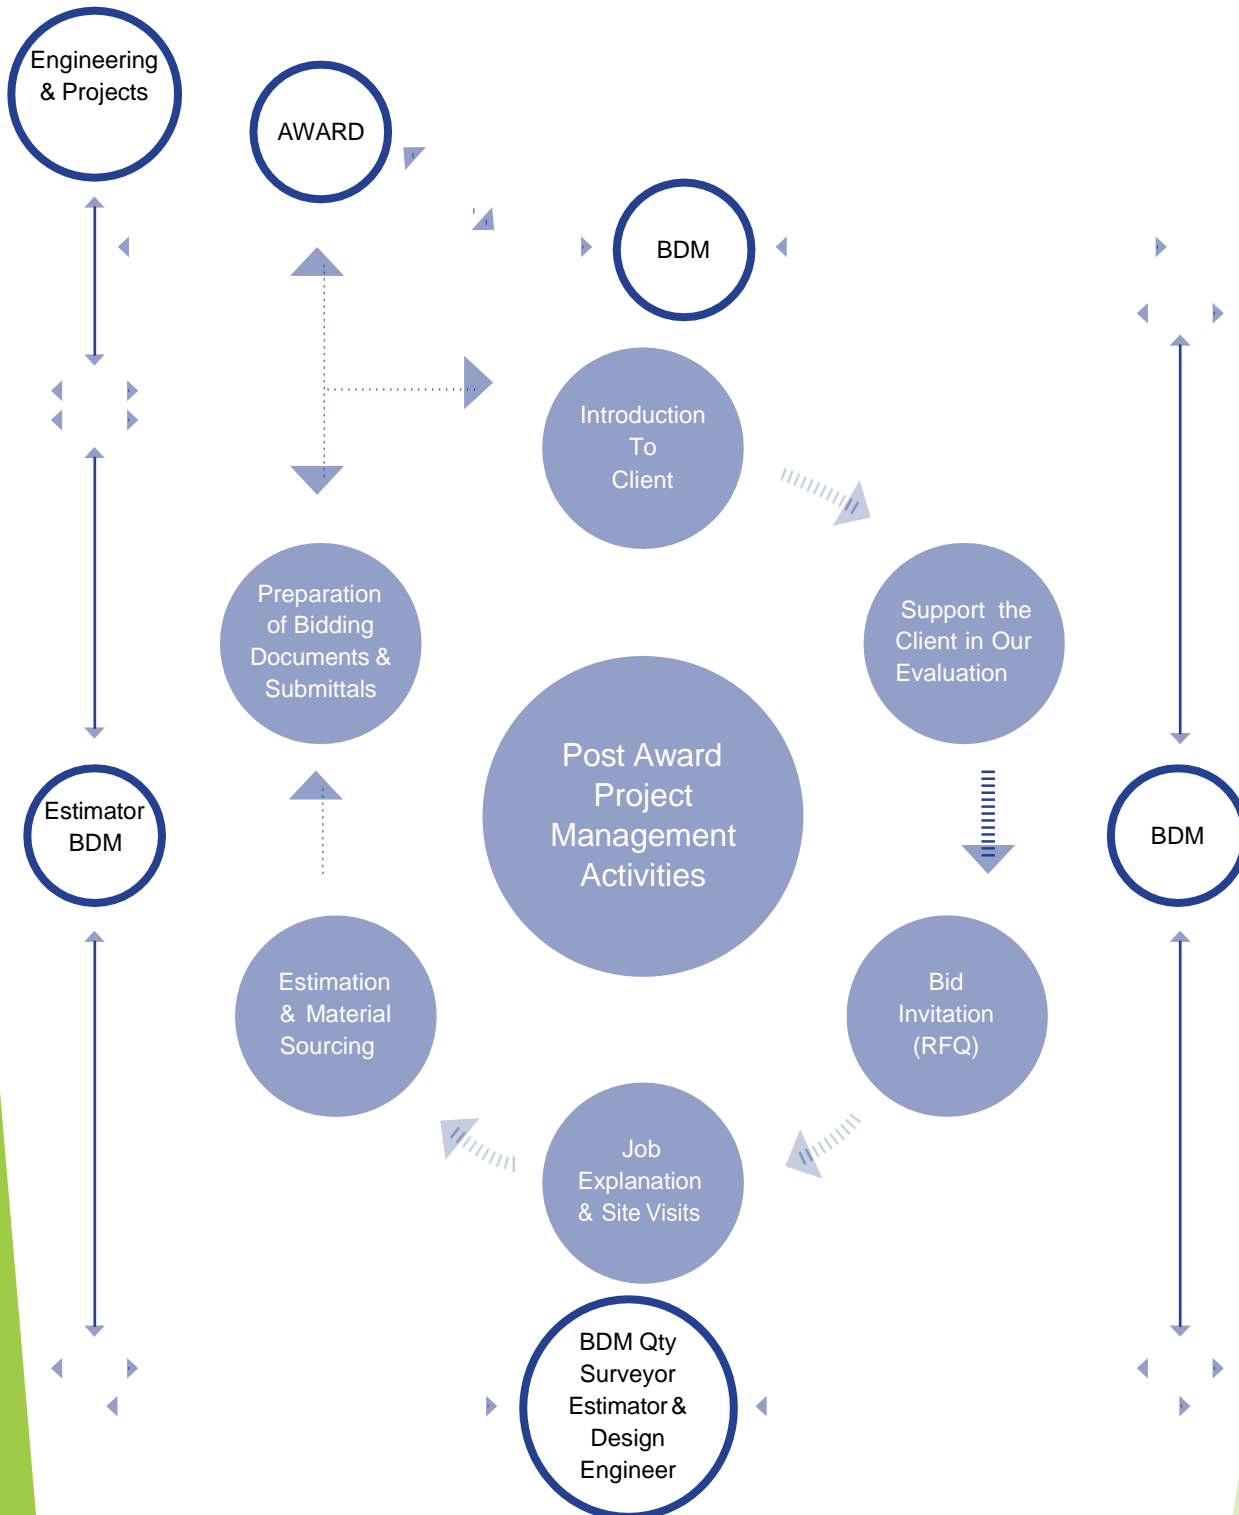

We have designed our post award project management activities to ensure our clients the following:-

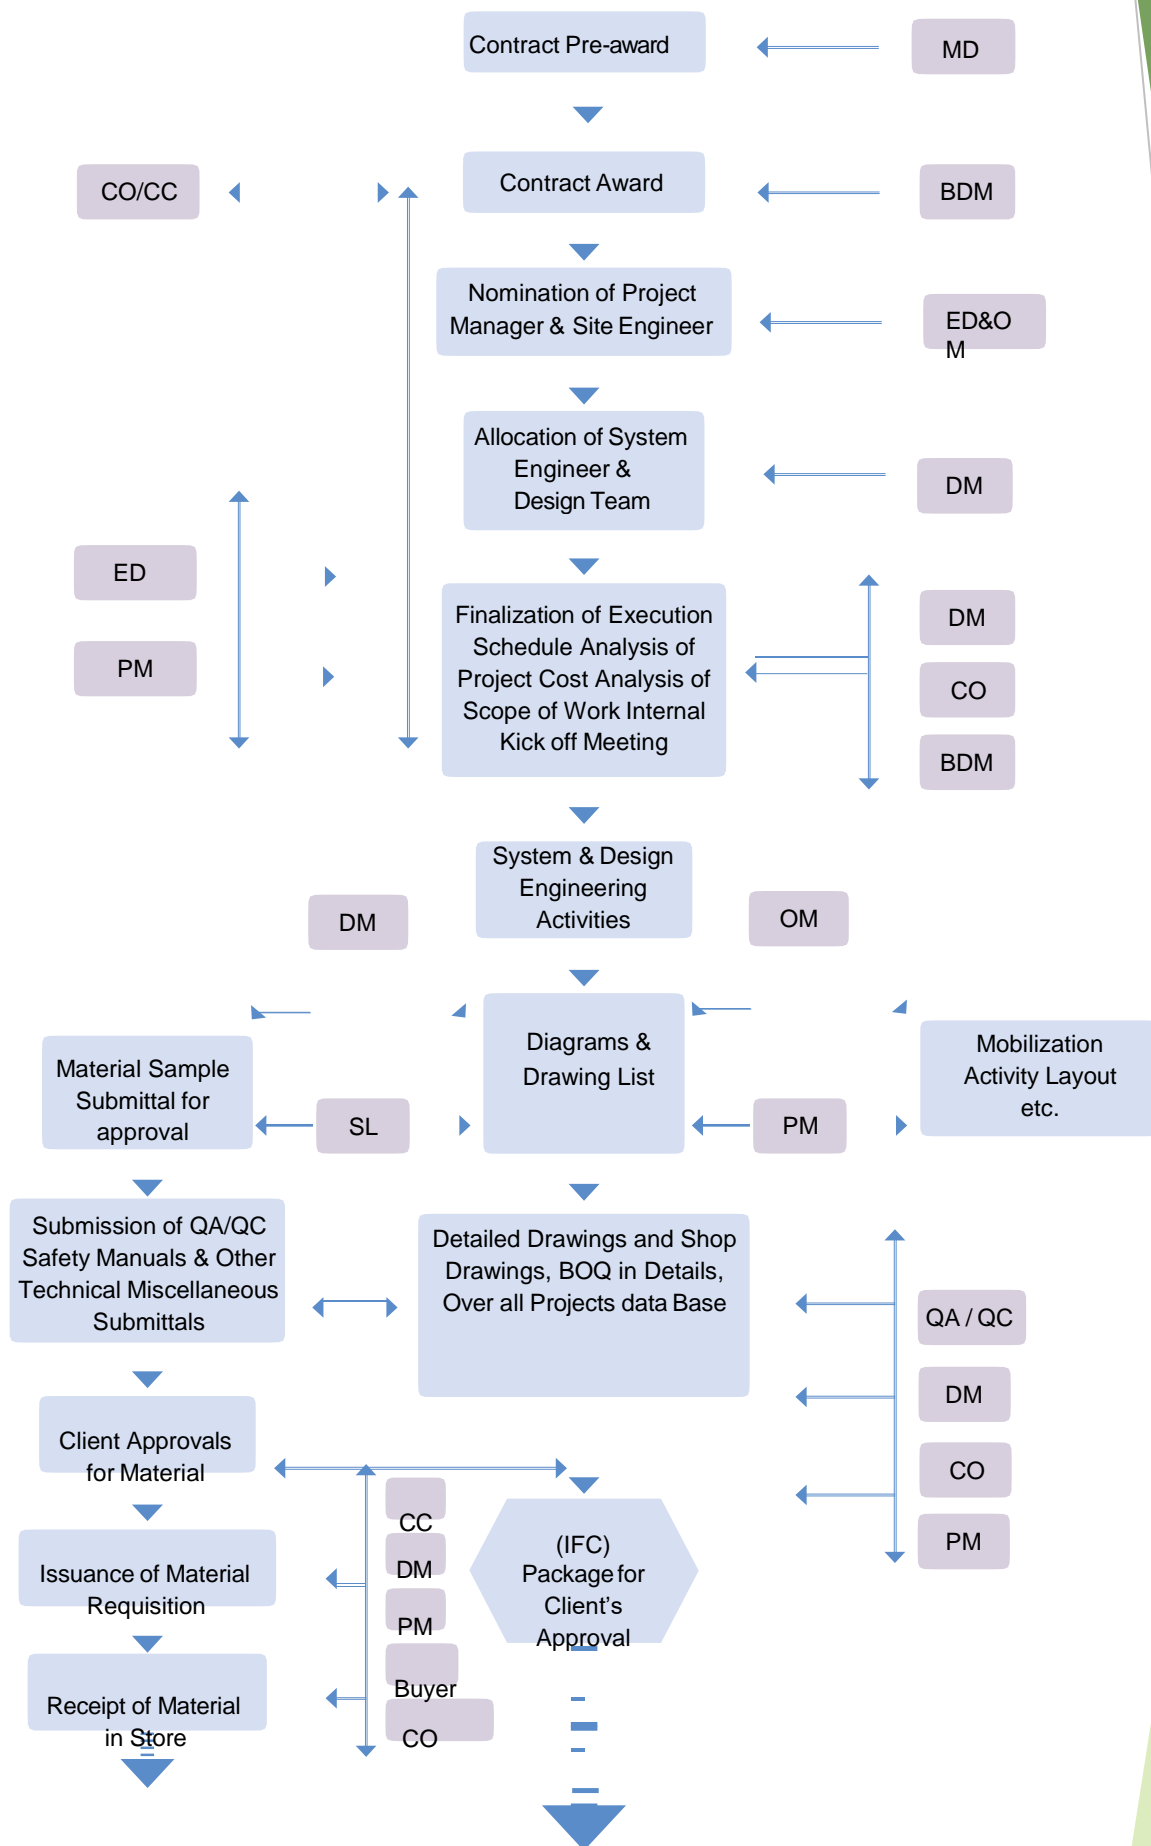

## Activities:

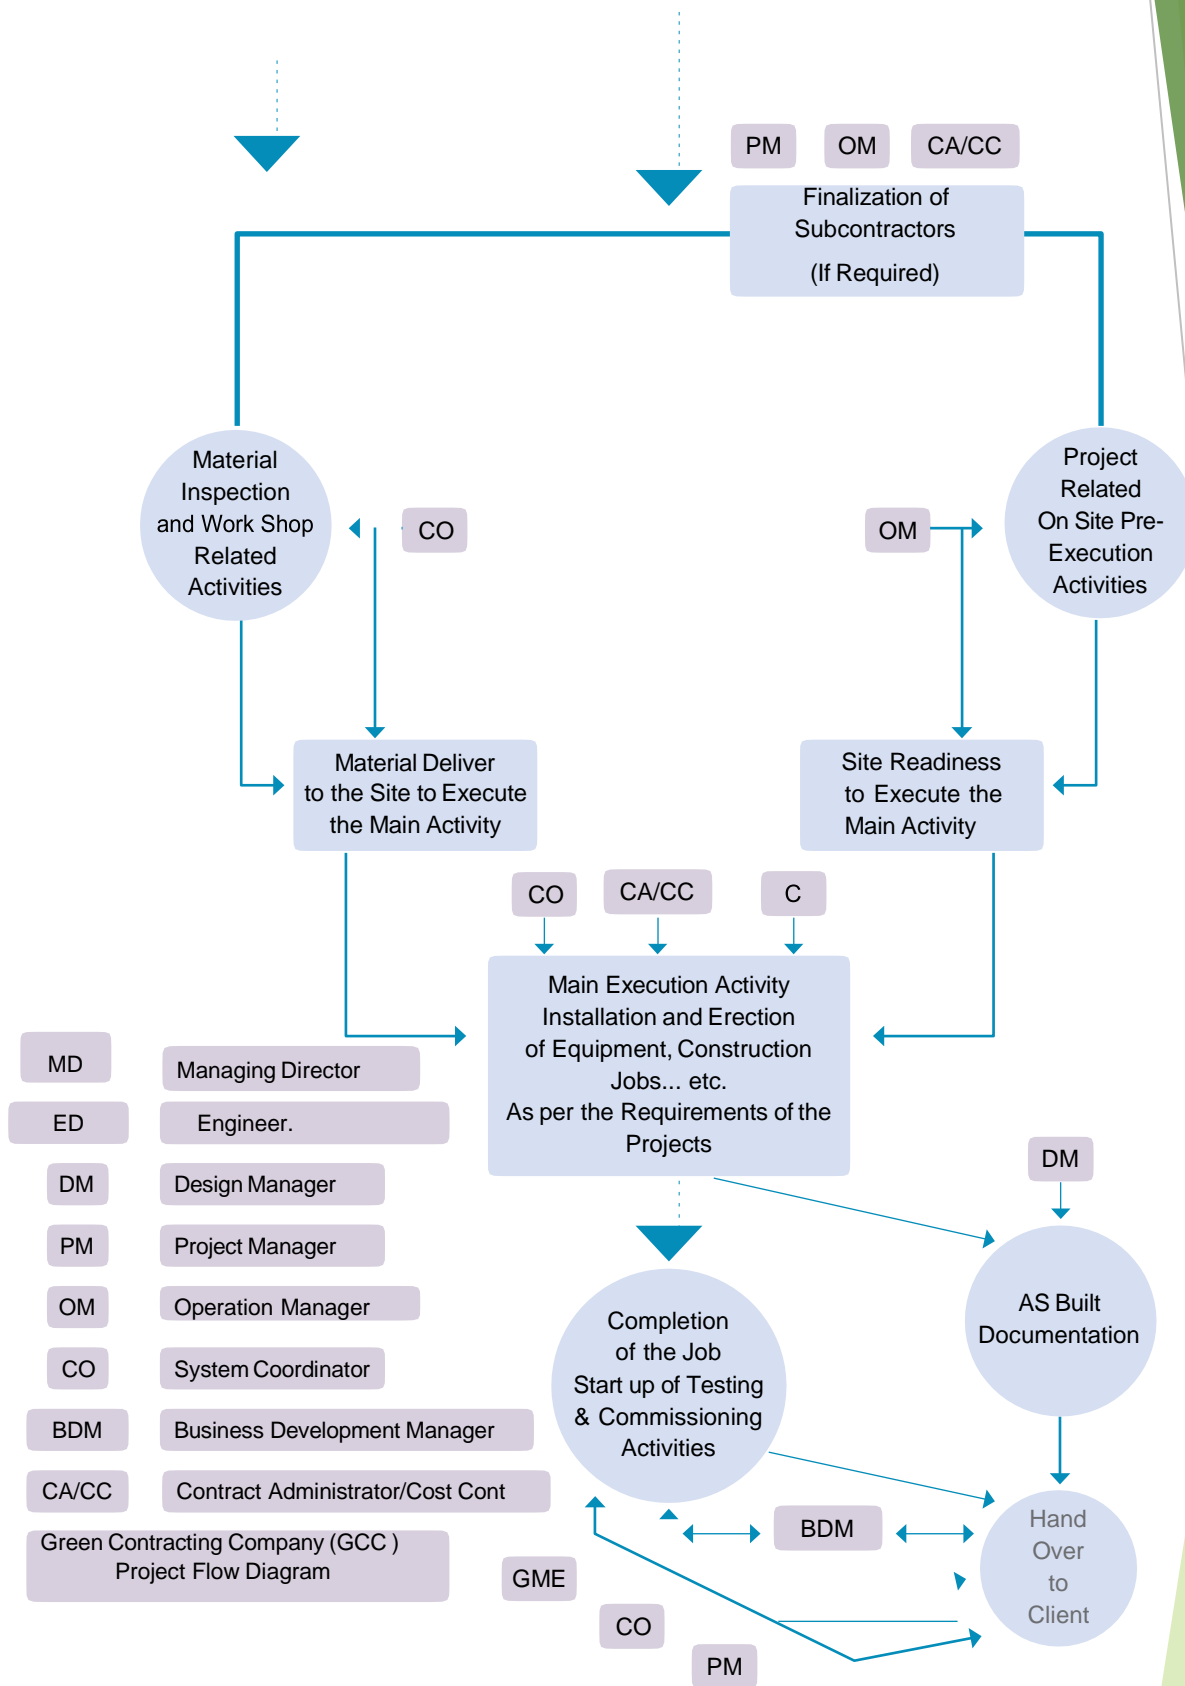

- Our Comprehensive Introduction to Clients at their door steps. The aim is to facilitate them in Locating a pain's taking Industrial Services provider company.
  - Providing all necessary information to the Clients to evaluate us Technically and Commercially as Per their criteria of Technical and Commercial Evaluation. The idea is to save the time of our valued Clients in their attempt to evaluating our strengths and weaknesses as an Industrial Services Provider Contracting Company.
  - To entertain the every Bid Invitation Properly & Professionally.
  - Getting first hand knowledge about the Client's requirements, provide them necessary solutions if Required during the Job Explanation Meetings. The aim is to develop the clear understandings about The Job, Clients requirements in terms of QC/QA and Safety standards to be followed during the Execution.
  - Estimation; The aim is to locate quality material from the Client's Approved Source or to provide the Cost effective equal quality material from the equal Approved Source.
- The essence of this activity is to provide Quality oriented Cost Effective Price to our valued clients.

# Project Management Activities Post Award (flow chart)

# Civil Works

Civil Works and Operation & maintenance s are main activity of GCC. Operation & maintenance and Engineering is the Specialty of the company. Operation & maintenance department is responsible for civil, mechanical, electrical and instrumentation works. The civil Operation & maintenance work that we undertake reflect our expertise in this domain. We construct different types of residential and commercial buildings as per the client's requirements. We bring in use the best quality Operation & maintenance materials that are sourced from reliable vendors. One of the salient tasks of Operation & maintenance department is the compilation and distribution of work procedures.

In each field of activity GCC Operation & maintenance and Engineering assign a supervisor to ensure the Operation & maintenance and erection are executed in strict compliance with the specification, drawings, standards and other contract documents. Prior to handing over the complete project, in case the client required, GCC can assist client in commissioning and startup. This would offer the opportunity of training to client personnel who later would be responsible for plant operation & maintenance dept is fully equipped with heavy machinery and equipment together with related personnel. GCC Operation & maintenance teams perform all required activity for implementation of an Oil, GAS and Petrochemical plants, Buildings and Industrial factories.

## **Operation & maintenance activities consist of the following items:**

- **Excavation**
- **Shelter**
- **Filling**
- **Pipe support foundation**
- **Grading**
- **U/G cable root**
- **Concrete paving**
- **Pole lighting concrete**
- **Gravel paving**
- **Earth rod manhole**
- **Road**
- **Concrete cable trench**
- **Fencing Equipment foundation**
- **Dike wall**
- **Building Operation & maintenance**

With environments friendly approach with reduced cost and high reliable we start.!

At GCC, we are committed to building environmentally friendly structures using the highest quality, innovative materials, all while maintaining superior value, efficiency and safety. In addition, when you hire GCC, will work with the industry leaders in Green Building through our partnerships and alliances.

GCC is pleased to be a member of the one of the leading environmentally friendly building designers.

GCC is an approved independent general contractor trained in the operation and maintenance.

### OUR SPECIALITIES

- **Fire-Resistant**  
No concern for toxic gases/vapors in the event of a fire.
- **Energy Efficient**  
Energy Star rated product.
- **Pest-Resistant**  
Inorganic material requires no need for chemical treatments.

**GCC** is a cost-effective alternative to traditional building materials such as CMU, fire block, tilt wall, and pre-cast concrete partitions. Applications include.

- Load and non-load bearing walls (exterior & interior).
- Exterior non-load bearing relief and ornamentations panels.
- Fire walls.
- Demising walls.
- Acoustical/Sound insulation.
- EIFS alternative.
- Elevator shafts.
- Floor and roof panels.

# Building Operation & maintenance

# Mechanical

We handle many types of mechanical engineering works such as structural works, Pre-engineered Buildings, pipe line, storage tanks, scaffolding and access equipment, surface preparation and painting, rotating equipment. Etc. Quality, safety and commitment to excellence fueled by the desire to expand empowers GCC to extend its services to Oil sector, Government Sectors as well as Private Sectors. GCC is growing as a major force in the Oil and Gas Industries through strategic alliances with some of the national reputed companies. We shall employ the finest professionals and skilled workers to aim for the success of all projects we undertake. GCC will conduct its business in parlance with good international practices and will provide safe and healthy working conditions for its employees.

## A Pre-engineered Buildings Components

A Pre-Engineered Buildings (PEBs) is steel utilizing three distinct product Categories :

- Built-Up "I" shaped primary structural framing members(columns and rafters),
- Cold-formed 'Z' and 'C' Shaped secondary structural members (rood purline, eave struts and wall girts).
- Roll formed profiled sheeting (rood an wall panels).

## Plant Piping & for Offsite Piping

The business of GCC is to provide K.S.A and Sabic clients with unparalleled pipe fabrication services which encompasses the production of specialty. Spools, skids, module assemblies, custom steel fabrication and pipe supports

GCC has developed and registered a wide range of ASME section IX weld procedures including manual semiautomatic and machine weld process. Our fabrication abilities include the use of mild steel, austenitic, stainless steels, low temperature carbon steel, 1.25% chrome, 2.25% chrome, P91, specialty alloys including Inconel, Monel, 6Mo, Duplex stainless steel, Titanium and dissimilar Combinations are all covered with some procedures qualified up to 8" in thickness. The company holds AWS, ASME, certification for the fabrication of pressure lines.

Power piping. ASME B31.1 Fuel Gas piping. ASME B31.2	Process piping. ASME B31.3
Pipeline Transportation system for liquid hydrocarbon	Refrigeration piping. ASME B31.5
Gas transmission & distribution piping system ASME B31.8	Building Services piping. ASME B31.9
Slurry Transportation piping system. ASME B31.11	Repair and Alteration of pressure vessels in accordance with ASME Sect VIII Div.1
RTR piping (Reinforced thermosetting resin)	

Our mandate is to continually evaluate and incorporate new processes and alloy combinations to provide greater capabilities and services to meet our customer's changing requirements. The GCC team is comprised of experienced management, skilled crafts and dedicated administrative support who are all committed to delivering industry leading customer satisfaction

This deals primarily with Piping Systems, in accordance with Client specifications, and ASME B31.1, and B31.3 codes. capable of specifying piping Component Classes, as well as overall layouting, piping engineering, detailing, all the way down to Isometrics and MTO. Capability of 2D, and 3D is available for the piping. 2D AutoCAD is used. 3D Cad Works is Used. and performs stress analysis, and pipe support designs for the piping system Typical deliverables.

Piping material classes.	Wall Thickness Calculations
Piping Design Basis	Specifications for Materials (Pipes, Fitting, Flanges, Valves, etc..)
Datasheets for Specialty Materials	Specification for Valve interlock systems
Specification for Pipe Supports	Tie-in Schedules'
Piping Stress Analysis (Static / Dynamic) using CAESAR II	Plot Plan
Piping Demolition Key plan	Equipment Layout
Piping GA	Piping Sections and Supports details
Pipe Support Schedule	Piping MTO

# Project Works our Key Areas of Expertise

Reformers, Heater & Furnace	Composite Mechanical Works
Cryogenic Plants	Process modules & offshore Decks
Heavy Erection / Equipment (Static & Rotary)	Piping & Structural job (Fabrication & Erection)
Shutdown/Revamp jobs	Filter tank/Storage Tank etc
Material Handling System	Supply of Specialized technical services (Mech. Elect. /Instrumentation)

With our Operation & maintenance workforce, facilities and equipment; as well as our professional and experienced project management team; we can be relied upon to deliver fit for purpose, Cost effective and timely projects. Our early Involvement in a project assures the best possible chance of Optimizing project value.

The stringent quality standards required by the oil and gas Industry are complied through our ISO 9001 accredited Quality Management system. All fabricated items

GCC fabricates components and products of stainless Steel, carbon steel, galvanized metals, aluminum, alloys, and Other materials.

# Electrical Works

GCC's gamut of activities includes design, Project planning & control, manage, deliver and maintain projects of small, medium size operations. Preparation of technical bid analysis cost estimate, tender pre-qualification, vender development and procurement, project execution, testing and commissioning, warranty and maintenance services of our installations. During a project handling we evaluate and report development of the Project and its execution strategies and performance time to time. We take care of procurement, vender co-ordination and Operation & maintenance co-ordination, in order to deliver a job beyond the fullest satisfaction of our clients.

Electrical Works GCC Provides complete engineering and design, supply of equipment, installation testing and commissioning and maintenance for all kind of Electrical Works.

HV,MV and LV cabling	Switchgear, MCC's and all kind s panel boards
Engineering power generators	All kinds of low voltage systems
Telecom systems	CCTV systems
Public address systems	Security systems
Fire alarm system	Computer networks
Power and Lighting for Commercial and Industrial Projects	Power and Control wiring for Processing Equipment
Computer Room Installations	

# Instrumentation

GCC has been assisting customers in the Industrial Electrical and Instrumentation fields since 1999. Our experienced technicians, supervisors and project Managers are committed to completing your Project safely and on time. We offer a full range of instrumentation, automation, design and building services. Our capabilities include: Process / Prototype / Testing / Operation & maintenance. Control Panel Building / Assembly. Mechanical / Electrical Design and Installation. Controller Programming. Industrial / Commercial Automation. Custom Solutions. Plant relocations. Electrical power & process control we offer a wide range of electrical repair and installation services for industrial, commercial and government customers. All of our work is specified to code.

Oil & Gas, Oil Shale process design and Installation.	Power and Lighting Installation.
Motor Control Centers - MCC.	Power Distribution / UPS Systems/ Generators. Grounding / Surge
Suppression. Telecommunication Cabling Systems	
Fire / Security System Energy Conservation.	High and Low Voltage Work.
Fiber Optic Cabling Systems.	Custom control system
RF Control Systems	AC Drives.
DC Drives.	PLC / DCS Controls.
Pump Controls.	Control System Upgrades

## Air Conditioning

GCC is expert in installation and commissioning of various capacities of Air conditioning & Refrigerating systems for civil as well as specialty facilities such as oil industries. The portfolio of our varied projects includes many control buildings, substations, analysis shelters and administration buildings for civil. We have extensive experience for all types of HVAC and Refrigeration equipment including chillers, split window AC's, Refrigerators, air curtains etc. We have been capable to handling Medium and small projects including design, supply and installation HVAC jobs for new substations, control buildings, shelters, residential and high rise commercial complexes, process industries, hospitals, recreation centers, workshops involving low relative humidity. etc.

We are active players in providing complete solutions for design, supply, installation, testing and commissioning of HVAC and BEMS systems. Our team works with a scope to provide total project management from the planning stage to the design, scheduling, installation, start-up, and service. Their active communication with the client's engineers and architects ensures that our customers receive the best possible solutions.

# DRY-ICE CLEANING & SERVICES

## DRY-ICE BLAST CLEANING:

Dry ice blasting is similar to sand blasting, plastic bead blasting, or soda blasting where a medium is accelerated in a pressurized air stream to impact a surface to be cleaned or prepared. But that's where the similarity ends. Instead of using hard abrasive media to grind on a surface (and damage it), dry ice blasting uses soft dry ice, accelerated at supersonic speeds, and creates mini- explosions on the surface to lift the undesirable item off the underlying substrate.

## DRY-ICE BLASTING REPLACES SANDBLASTING:

This method is superior to sandblasting because the dry ice is soft enough not to pit or damage the underlying surface. The dry ice sublimates quickly into the air and only the removed material must be cleaned up. Dry Ice blasting eliminates equipment damage.

Dry ice blasting is an improvement over steam and water blasting for several reasons, such as:

- Electrical parts and generators can be immediately put back into service used without waiting to dry.
- Radioactive contaminate removal doesn't require large storage containers for contaminated water.
- Mildew and mold removal are far more complete with less chance of regeneration because of water vapor or moisture.
- Dry ice blasting removes more algae, sea slime, and mussels on boat hulls, than water blasting, which allows the organic the matter to reattach sooner.

#### **DRY-ICE BLASTING REPLACES ENVIRONMENTALLY DAMAGING:**

Since dry ice evaporates completely as a gas it leaves no wastes. Only the material being removed must be disposed of. When dry ice cleaning replaces hazardous chemical cleaners the disposal cost of that chemical is eliminated.

#### **BENEFITS OF DRY\_ICE BLAST CLEANING:**

- It is a non-abrasive, nonflammable and nonconductive cleaning method.
- It is environmentally-friendly and contains no secondary contaminants such as solvents or grit media.
- It is clean and approved for use in the food industry.
- It allows most items to be cleaned in place without time-consuming disassembly.
- It can be used without damaging active electrical or mechanical parts or creating fire hazards.
- It can be used to remove production residues, release agents, contaminants, paints, oils and biofilms.
- It can be as gentle as dusting smoke damage from books or as aggressive as removing weld slag from tooling.
- It can be used for many general cleaning applications.

**Before Dry Ice Blasting**

**After Dry Ice Blasting**

**Before Dry Ice Blasting**

**After Dry Ice Blasting**

### **DRY-ICE BLAST CLEANING RANGE OF APPLICATIONS:**

Adhesives are easily removed in comparison to alternative methods as the lowered temperature serves to weaken the adhesive bond. Many companies are blast cleaning old labels off containers that are being re-used. Abrasive methods often generate heat and can therefore fail with some adhesive removal.

### **FIRE REMEDIATION:**

Dry Ice cleaning is extremely effective in removing toxic residues, soot, and associated smell Is after a fire. Independent dry ice blasters often work with major insurance companies over a large geographic area to quickly clean fire and smoke damaged Locations.

### **FOOD AND HOSPITAL USE:**

Dry Ice cleaning of the surface of products and instruments is not toxic and will stop the growth of mold, mildew and other fungi as well as stopping odors at the source by elimination of the bacterial host environment, not as a masking agent or cover up. Dry Ice cleaning is 100% ecologically safe, USDA rated, biodegradable and harmless to humans, animals and marine life.

### **TOTAL CLEANING & RESTORATION OF DUCT & AIRE DEVICES:**

GCC as source removal equipment loosening dirt and debris with powerful vacuums extract them with HEPA filtration & contaminants are trapped within the equipment. The entire air conveyance system is treated to reduce microbial contaminations. GCC intends to become an authorized member of "NADCA" (National air duct cleaners' associates) in order to prove more professional duct & equipment cleaning services.

# Dewatering Service & Solutions

GCC expertise to develop state-of-the-art, practical and flexible ground water control systems catering to diverse projects involving complex site and soil conditions

GCC is proud on having professional and skilled team that enables them on providing a quality and professional technical service to the clients in domestic, industrial and Operation & maintenance industry. GCC provides the latest technology, equipment and engineering analysis in combination with a nucleus of highly skilled site personnel.

## **Dewatering Sub-Contract Solutions:**

GCC offer sub-contract solution to ground water problems consists of site

Ground water problems consists of evaluation including contract restraints, dewatering system design compatible with site conditions, technical expertise and on-going consultation with both the contractor, the client and the client's engineering representative.

## **Rental Services**

Hiring Pumps & Equipment from GCC gives you peace of mind and allows you to focus all your attention on your business. GCC have a vast range of Pumps & Pumping Equipment available from our Hire Fleet partners including Diesel driven Pumps in 6", 8", 10", 12" & 18". There are many advantages to hiring as opposed to outright purchase the main ones being The capital involved in purchasing Pumps.

## **Certificates Supporting Documents**

# Green Contracting Company (GCC) Passed Aramco Safety Prequalification

Classification: Saudi Aramco: Company General Use

Good Morning,

Please be informed that your company has successfully passed Saudi Aramco's Safety Prequalification for future contracts, following evaluation by Community Services Prequalification Evaluation Team (CS PET). Should you have communication with any other business lines, they can refer any queries regarding the prequalification to Compliance & OE Group, Community Services at the address below.

If any other Aramco business line requires details of safety prequalification, **you should save** & show them this e-mail as we do not issue certificates.

Your company will be added to Saudi Aramco's consolidated list of companies that have passed Safety Prequalification. Other business lines can choose whether or not to accept a contractor approved for the same type of work.

**Company Name:** Green Contracting Company (GCC)  
**Vendor No:** 10065076  
**Date:** 17 June 2021 **Expires:** 17 June 2024  
**Type of Work :** Construction and Technical Services

Safety Prequalification is valid for 3 years.

Your prequalification submission folder will be retained by CS Compliance Group for a minimum of 6 months, after which you may collect it.

**Please confirm receipt of this e-mail.**
